

# **CASHAPP LOADING**

This method I'm about to walk you through is updated method for Cashapp loading and it can Earn you up to \$100-\$1500 per go if you follow the process accurately.

## **Pre-requisite**

1. Common Sense
2. A new Cashapp
3. CC with good balance (Must come with Full i.e include SSN/DOB)
4. A bank drop

a• Find someone who got CashApp and they must have access to the bank or CashApp card to get the cash off, the account must have been active for at least 30 days and must have at least 1-2 transactions.

b• Get a Good CC from any trusted vendor who sells CC of cashapp BIN with good balance and must come with fullz so you can sign up for new CashApp with.

C• Once you buy the card, type all the fullz information to sign up under a new CashApp but you gotta Make sure you create the account on a different phone, preferably an Android with a VPN downloaded.

( **WARNING**): some of your cardholders may already have CashApp, so, if there's already an account created under the fullz you are given... Then skip over it and try the next piece. To know this, your card will tell you that your bank is already linked to cashapp.

d• Once you activate the CashApp, sign up for a cash card and send it to the address where you want it to land so when you want it, you can go straight to the ATM and get the cash out or you can use the Cash back method entering stores grabbing a small item and getting cash back (the change) from the purchase.

e• If you have someone CashApp and a bank account, you can type in the amount you are sending and pay it out to them. Since this is your first payment, I advise you not to send anything over \$500. Over time, you will be able to send more without worries as long as the piece is popping.

f• You can do this every 24 hours \$1000+ daily, as soon as you send the cash over to the other CashApp, have the person withdraw it from their bank from the teller make sure not to get it from an ATM or the ATM will keep the card stuck inside.
