

# CSGO RACKS

Hey guys, in this ebook i will teach you how to make racks from CSGO. These methods in this ebook will teach you step by step to ensure that you get the most from your CSGO Account. These methods include many things, some of them are better than others :) None of these are public, if you try to make them public there will be consequences.

Alright so let's get started with something you need to get through these methods, a brain, you need to know your "client" you can't just be like "oh hey gimme ur knife" on all these methods, you need to lure them in enough so that they trust you enough to trade your knife considering that almost everyone has mobile authenticator now and it's almost impossible to steal.

Alright so let's get started.

## **Method #1.**

This method is a little bit unethical, but still you can make a lot of money from it! You will need funds/paypal to start this method, so what you are going to want to do, is create 5-10 steam dummy accounts, sign them up on the community, and buy something for 1\$ on each of them, that way the account will be verified and you will be able to use the market in a few weeks, after that just let them settle and then go and do whatever you want. Once they are all setup, find a public vpn, create a new account on your computer, and then you are going to want to setup the vpn on the new account on your computer, download steam login to an account, ADD funds whilst you are on the VPN via paypal, then you are going to want too buy loads of skins, and launder them through 3-5 accounts to your main account, then you are going to want to create a chargeback, just remember which payment is for which account and the method will work amazing, also in the trade notifications on the last trade to your main account, put "Thanks for buying skins with BTC, Great seller" or something so steam isn't suspicious, make sure you don't log into any of these accounts without a vpn or steam will ban your main also.

## **Method #2.**

This method is probably one of my best methods, and can have a huge income if you do it right! So first of all you are going to want to find a mid-range youtuber, like for example one with 30k subs and has 10k views per vid or some shit like that if you know what i mean (make sure it is a csgo youtuber), after that, you are going to want to find small csgo gambling sites, like for example type something like this on google.com

After that you are going to want to go through the pages and find a result like this

marketplace for skins, a gambling site for coins (I'll get ...

[OFFtopic] ELITESKINS - NEW GAMBLING WEBSITE - posted in CS:GO

Discussions: Hi, my name is Filipe Goncalves. I'd like to present you my ...

After that you are going to want to visit the site, and find the owner, next you are going to want to add him, or get more info about him like his skype etc, rename your steam name to the same name as the youtuber you found, exactly the same as your skype if you contact him on skype. After that, you are going to want to contact them regarding creating an advertisement for there site, say something like this "I'd be happy to do a promotion video for your site if you gave me skins to gamble there with lmao" after that if they are that desperate to get users to gamble on there site, they should give in and give you some skins. That method is really efficient once you get the hang of it, just make sure you delete bad steam rep and delete the owners as a contact as they can ruin it for other times you pursue this method.

### **Method #3.**

This next method is basically ewhoring csgo users, change everything on your profile as if it was a girls. Like set your name to something like this

☺ Jessica <3 ☺

And set your profile description to some bullshit like "Hey i'm jess, please don't perv :P I like to play csgo sometimes, and i really like gambling but some people say i have an addiction hehehe :D

snapchat - XXXX"

You are going to want to get snapchat on your phone and create a bullshit name that you want for your ewhore, so you after that, set your profile out how it is, and find a picture of a medium - hot girl from tumblr, after that you are going to want to find guys and talk to them for a bit, and tell them to add you on sc, get something called "fake camera" and then you are going to want to message the guy on snapchat for a while, after that start sending photos of "legs" or some shit of a body then the guy will feel a strange vibe, after that be like "i can send more for some skins :) might be my gambling addiction kicking in but oh well :D" these kids should be hella nude hungry, therefore they will send you skins. Me and my mates used to do this when we were new to csgo, i actually got a awp asiimov a long time ago from this xD

### **Method #4.**

This method includes gambling, but in a efficient method, so you are going to want to go to a website like gamblecsgo.com (not a large gambling site, min bet is low) so you can snipe small pots. This method is amazing, because the website is probably fair, so you basically can never lose lmao, so you are going to want to look for 20\$ pots, at the very end, put in 100-200\$ you have gained from the other methods, and then just repeat with some of the profit etc, it's actually a really simple method, just don't do it too often or people will notice that you have a routine of sniping, and therefor they will try to snipe you, that's why i do it after every 10 matches, the best time to gamble on these types of websites are times when there is next to no

rich/hq people online, for me it's around 9-10 PM (Gmt + 13) because the majority of the americans are offline and they tend to be the richest people in csgo skins, and small sites are a lot less popular then, just remember to find ones with low min bets considering it all adds up :)

#### ***Method #5.***

This method is super unethical, you are going to want to play with toxic af kids in competitive, and the ones that swear a fuck load and cause shit over the internet, next you are going to want to add them as a contact, and play a few games with them, if you know how to dox then you are going to want to get there address/phone number, if you do not know how to dox, then you are going to want to get someone on HF to do it, a lot of people do it for free or some people would even do it for 5\$. After that once you have there phone number, you are going to want to send it to the kid who is toxic af, and say this "You have 30 minutes to give me \$XX in skins unless i will call your parents, tell them what you have been doing online and the things you say, and I will also send pizza to your house if you do not meet the certain requirement" considering you already have their info, they will definitely send you that amount to make sure no trouble is caused. You can also threaten them in different ways, but that's probably one of the best considering it's simple to follow through, just make sure when you order the pizza online you use a vpn as many pizza companies log ips and can actually find ya and charge ya, although that is highly unlikely. This method can gain you upto 500\$ skins easily if you pursue it all day and do it really efficiently.
