

# Introduction

This tutorial Shows you how to Upload your **Shell.php** as a **Shell.jpg**

## Requirements :

- 1) FireFox Browser
- 2) HTTP Live header Firefox addon [\\*Click Here\\*](#)
- 3) a Shell (.php or .asp) I will provide a good private shell at the End of the Tutorial
- 4) Tools I will provide at the End of the Tutorial (up.jpg & up.phtml)

## Steps :

- 1) Find a Website where you can Upload Images \*you may need to Register on websites\*

I Used this Dork on Google => **inurl:upload\_image.php**

If you don't know whats a Dork ... Just copy and paste it on google

I got This Website : [http://installshieldindia.equestind.com/...\\_photo.php](http://installshieldindia.equestind.com/..._photo.php)

- 2) Now We are going to Browse for '**up.jpg**' then Open Live HTTP Header From (Tools >> Live HTTP

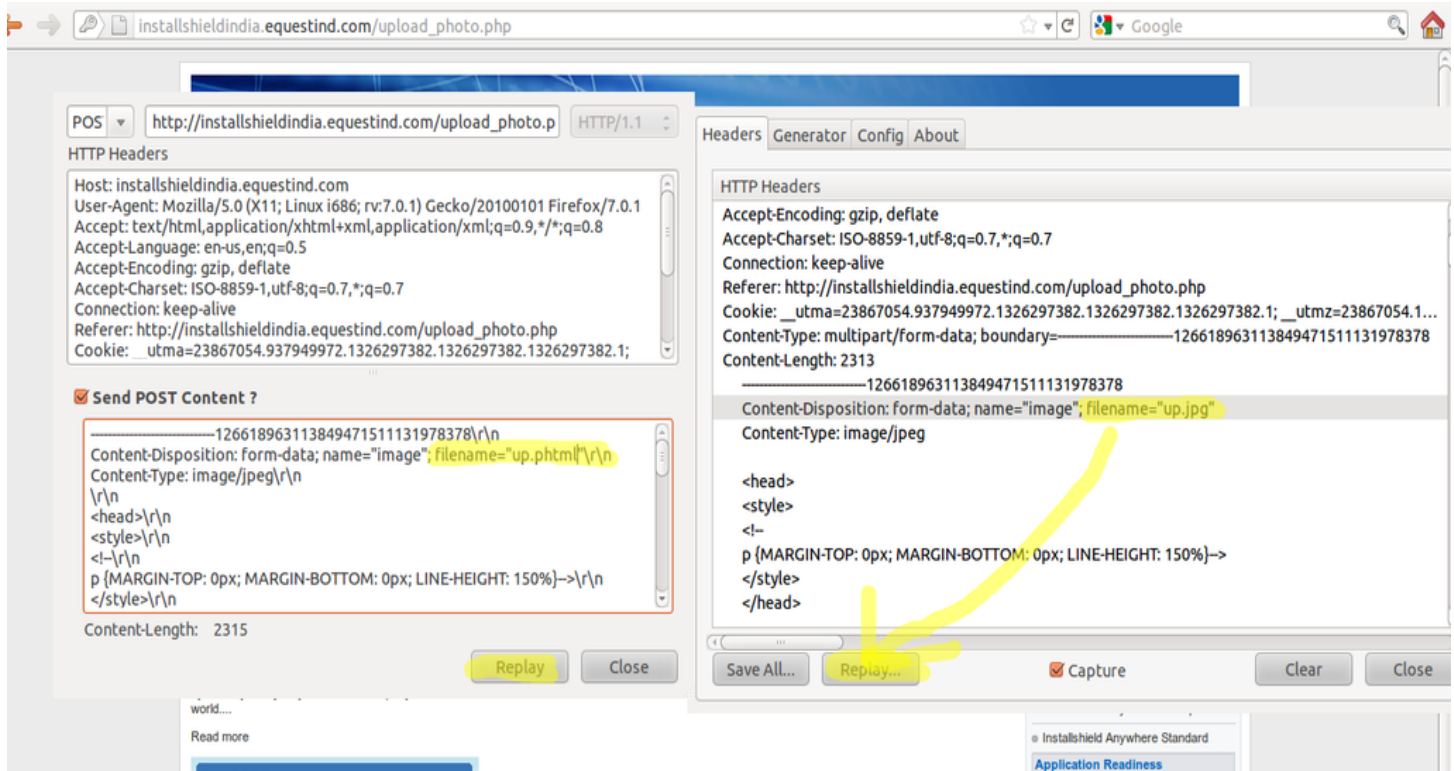

Header)

Then we Click on 'Upload'

Now go to Live HTTP tool and Search for 'Filename = up.jpg' and Click on it then press the 'Replay' Button.

Now Change 'Filename = up.jpg' to 'Filename = up.phtml'

Just like what I did Here :

3) Now We Uploaded the Image :D ... time for Soma Nasty Stuff.

Go to where the Image was Uploaded ... mine was <http://installshieldindia.equestind.com/userphotos/>

   installshieldindia.equestind.com/userphotos/				
<h1>Index of /userphotos</h1>				
	<u>Name</u>	<u>Last modified</u>	<u>Size</u>	<u>Description</u>
[DIR]	<a href="#">Parent Directory</a>	13-Jan-2012 03:49	-	
[TXT]	<a href="#">404.php</a>	12-Jan-2012 15:14	73k	
[IMG]	<a href="#">agnes-ph.jpg</a>	27-May-2011 08:05	1k	
[IMG]	<a href="#">ravi.jpg</a>	27-May-2011 08:05	2k	
[IMG]	<a href="#">velnov.gif.php</a>	04-Jan-2012 06:06	13k	
[TXT]	<a href="#">wso3.php3</a>	04-Jan-2012 06:07	65k	
[TXT]	<a href="#">wsowner.php</a>	04-Jan-2012 06:05	65k	

404.php is my Shell 'Its a Private shell so u cant access it :p'

.

4) Now go to [installshieldindia.equestind.com/userphotos/up.phtml](http://installshieldindia.equestind.com/userphotos/up.phtml)

you will find a Page like this :

  [installshieldindia.equestind.com/userphotos/up.phtml](http://installshieldindia.equestind.com/userphotos/up.phtml)

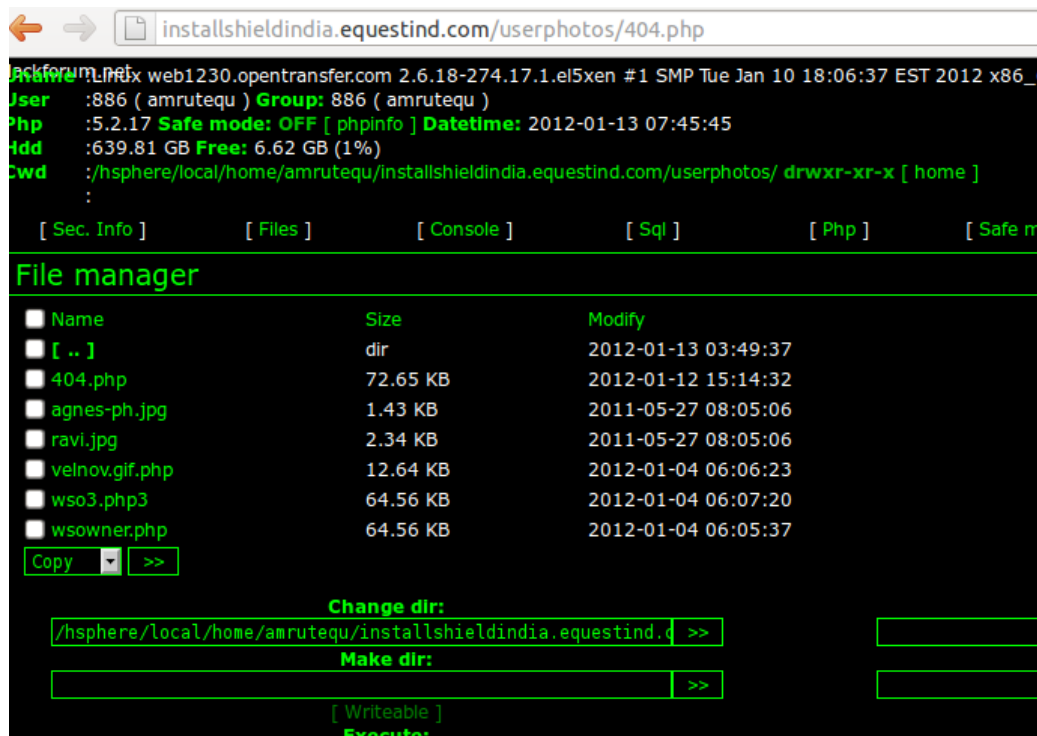

Upload

.

5) Choose your Shell.php or whatever you want and Upload it.

.

6) go to the Shell Location, Mine was : [installshieldindia.equestind.com/userphotos/404.php](http://installshieldindia.equestind.com/userphotos/404.php)

7) Enjoy Hacking :D

Websites I hacked with this Vuln : [Click Here](#)

**Note :** Please Don't Remove the Upload\_image.php from Site or make Any Damage to Make this Tutorial more Understandable for others, yet find another Dork (exploit-db.com/search) is the best way to find some good dorks.

Help Me get a **L33t** or **UB3R** so that I can Make more Tuts

Oh I was gonna forget, **Tools :** [http://www.4shared.com/photo/YJqs5hsU/up\\_online.html](http://www.4shared.com/photo/YJqs5hsU/up_online.html)

For the **404.php** Private Shell, Post Down that you want it and I will send it to you (Dont PM me !) me and I will give you Link

Regards ^\_^
