# INTRODUCTION

Hi there,

You are reading this because you have taken a HUGE step to making a great sum of money online by purchasing this eBook. I can promise you that you WILL earn money from the methods I have mentioned in this eBook and will support each and every one of you until you start seeing results from this eBook.

I have been making money online since I was fifteen years old and I have always found different methods to make money online, the recent ones being the ones which will be shared in this eBook.

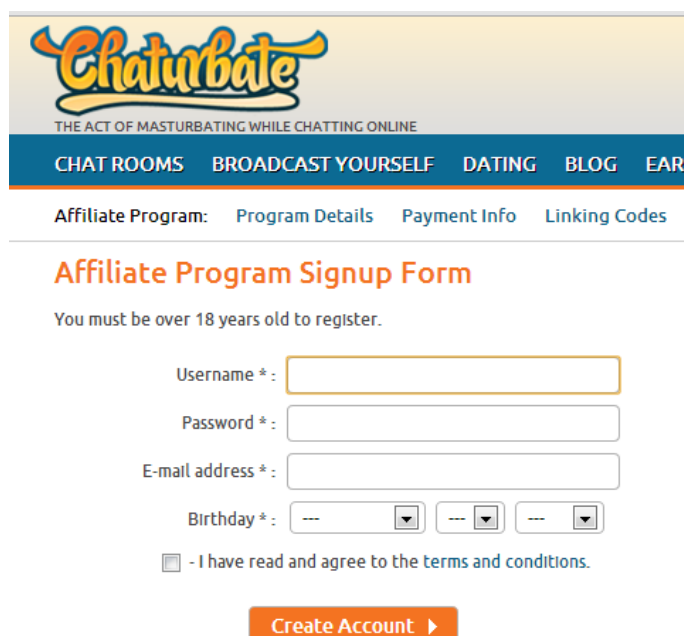

This eBook will be talking about sites such as Chaturbate but other sites can and should be used. Some parts of the two methods contained within this eBook are accompanied by videos, demonstrating clearly what you need to do for certain parts of the method.

Without further ado, let's get CRACKING!

# CHATURBATE

Chaturbate is one of the affiliate sites that we will be using and will be used for both the methods in this eBook. As mentioned before, you can use other sites that offer you pay you \$1+ per free sign up, however these will be mentioned over live chat support on my site, please keep this in mind, this methods works for so many affiliate sites.

The first thing you need to do is to sign up to chaturbate. As you can see below, this is what needs to be filled in to sign up to the affiliate program.

The screenshot shows the Chaturbate website header with the logo and tagline "THE ACT OF MASTURBATING WHILE CHATTING ONLINE". Below the header is a navigation bar with links: CHAT ROOMS, BROADCAST YOURSELF, DATING, BLOG, and EARN. Underneath the navigation bar is a section for the Affiliate Program with links: Program Details, Payment Info, and Linking Codes. The main heading is "Affiliate Program Signup Form". Below this is a warning: "You must be over 18 years old to register." The form fields are: Username \*, Password \*, E-mail address \*, and Birthday \* (with three dropdown menus for day, month, and year). Below the fields is a checkbox labeled "I have read and agree to the terms and conditions." and a "Create Account" button with a right arrow.

For this method, we want to use the \$1 per free sign up offer and we need to be approved by emailing the support team by clicking on “Affiliate Support”. Follow this email template and feel free to change/add anything.

HELLO,

THIS EMAIL IS IN REGARDS TO THE \$1 PER FREE REGISTRATION OFFER YOU ARE CURRENTLY RUNNING. I WAS WONDERING IF YOU WOULD BE ABLE TO APPROVE MY ACCOUNT SO I CAN MAKE USE OF THIS SPECTACULAR OFFER.

I AM EXPERIENCES IN THE ADULT INDUSTRY, OWNING SEVERAL HIGH QUALITY, POPULAR TUBE SITES WHICH I HAVE MONETIZED WITH OTHER NETWORKS SUCH AS DATING GOLD, CRACK REVENUE, TUBE CAM GIRL AND OTHERS BUT WOULD LOVE TO GIVE YOUR NETWORK A TRY AFTER HEARING NOTHING BUT OUTSTANDING REVIEWS.

YOU CAN BE ASSURED THAT ALL OF THE TRAFFIC THAT I WILL DELIVER WILL BE THE HIGHEST OF QUALITY, WITH THE MAJORITY OF THE TRAFFIC COMING FROM THE UNITED KINGDOM, UNITED STATES AND CANADA.

IF YOU WOULD LIKE TO KNOW ANYTHING ELSE REGARDING MY PREVIOUS EXPERIENCE WITH AFFILIATE NETWORKS OR ANYTHING ELSE, PLEASE DON'T HESITATE TO CONTACT ME.

BEST REGARDS,

(YOUR NAME)

When it comes to being approved, it will usually take Chaturbate 24 or more hours to approve you for this offer. As I said, I can direct you to other sites that pay for free register sign ups via live chat support on my site, so if you're tired of waiting or don't want to wait, I can inform you of other affiliate networks you can use instead.

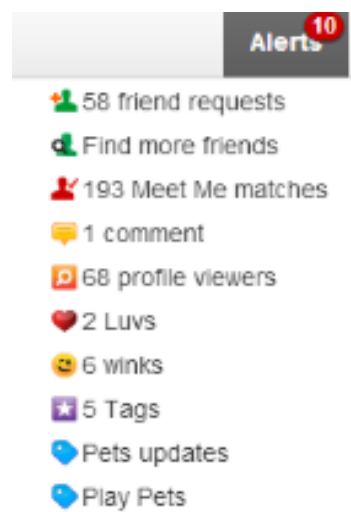

Once you're approved for the \$1 offer, you need to mask your Chaturbate affiliate link. To do this, firstly use tinyurl.com to create a URL and then shorten the tinyurl.com link by putting that it goo.gl to shorten the entire link.

The next step for this particular method is to sign up to tagged.com. This is a social network site full of guys who want to meet woman and just talk dirty with them. You need to register on the site, use a hot girls image as your avatar and you're half way there.

A screenshot of the Tagged.com sign-up page. The background is a solid blue color. At the top, the text "Join Free!" is written in white, bold font. Below it, in a smaller white font, is "Over 100 million people here". The form fields are white with blue text labels: "First Name:", "Last Name:", "Gender:" (with radio buttons for "Male" and "Female"), "Birthday:" (with dropdown menus for "Day", "Month", and "Year"), "City:", "Email:", and "Password:". At the bottom of the form, there is a small line of text: "By clicking Sign up, you are indicating that you have read and agree to the [Terms of Service](#) and [Privacy Policy](#)". Below this text is a green button with the text "Sign Up" in white.

Once you've signed up, as I mentioned earlier, add a hot girl as your profile and use a girl's name. Then what you need to do is get friends which is very, very easy on tagged as long as you're a hot girl. What you need to do in order to gain those friends is you click the "Meet me" button the navigation bar near the top. Then all you need to do is keep clicking the green button, whether it says "match" or "yes", keep clicking it. Please refer to my video "Tagged Video 1", for a quick tutorial of what I've just mentioned.

In next to no time at all, you'll have a ton of friend requests, click where it has the number of friend requests and click "accept all friend requests", located above the first friend who wants to add you. This will as it says, accept all friends at once.

Once you've got quite a lot of friends, they will message you, you wouldn't even have to message anyone. Wait until you get 30+ messages, then you copy the same message to everyone, starting from top to bottom. Below is an example of the message I use which works great, DO CHANGE IT though.

IF YOU WANT TO SEE ME NAKED, YOU CAN CHECK OUT THIS SITE WHERE I SHOW OFF MY BODY, PLAY WITH MYSELF AND OTHER STUFF. THE SITE IS 100% FREE AND IT LITERALLY TAKES 2 MINUTES TO SIGN UP, NO STRINGS ATTACHED. IT WOULD ACTUALLY BE DOING ME A HUGE FAVOUR XX I NEED MORE VIEWERS XX INTERESTED?

Once they reply saying yes or something along those lines, send them the shortened goo.gl url link you made. Refer to my video "Tagged Video 2", I show you three responses I got within minutes of people who wanted the link. It takes 3 seconds to post the link and then I have a word document with replies so you literally don't have to type. Also, you don't need to reply, you can use a whole automated system to auto send the message and the link once they reply. When you do send the link, you need to put brackets around the full stop in the goo.gl url as they don't allow links to be posted. So it would be like this "goo(.)gl/Gtfxs". No http or www. Either. Along with the link put something like, "remove the brackets around the full stop after goo".

You'd be surprised with the amount of signups you can get. My record was 356 in an hour, that's over \$356!

Another great way to get sign ups once you have friends, and a quicker way to get the links out to tons of friends is making a group, inviting all the friends you have then posting the link within the group. This is an awesome way to get sign ups and in order to learn how to do this, please refer to my video, "Tagged Video 3"

# METHOD 2

## 1. Get an adult related .com domain.

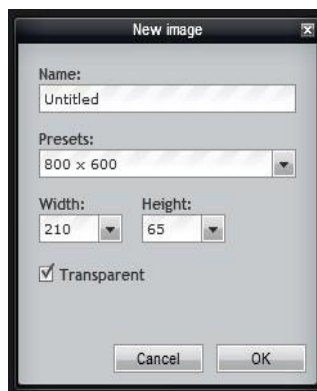

Now, the best domains for this method are the ones that have any of the words “webcam(s)”, “cam(s)”, and “chat” in them.

To find some good domain names use [thisonlinetool](#)

## 2. Create your logo.

For this method we will also need a nice .png logo (210x65 px) with our own domain name on it. We will use this logo for our cam site and for watermarking our videos.

To edit your logo go to [Pixlr.com](#) click on “Create a new image”, in the “Width” box enter “210” , in the “Height” enter “65” then check the “Transparent” box and hit OK.

Then, to complete your logo just refer to the video named, “Logo”.

### 3. Create your cam website (White Label).

In this step we will create our own cam site using Chaturbate's White Label. To do this, first you need a [Chaturbate.com](https://chaturbate.com) affiliate account.

The registration is very simple and you will be auto-approved. After you registered and verified your e-mail you need to login and click on "White Labels" and then on "Add a new whitelabel".

The next page is where you actually design your new Cam Website.

**Preset Color Options :**

**Chaturbate alias \* :**   
Your whitelabel will be http://xxxxx.chaturbate.com/ where xxxxx is your chaturbate alias.

**Site name \* :**

**Domain alias :**   
Optional. Point yoursubdomain.yourdomain.com with "yoursubdomain IN CNAME chaturbate.com"

**Featured gender \* :**

**Logo :**    
Logos should be 210x65 pixels to be displayed properly.

**Title :**

**Tagline :**   
Appears directly below your logo.

- “Preset Colour Options” field - here you can select from different colour presets and choose which one you like better.
- “Chaturbate alias” – here you write the name of your domain without the extension. For example if your domain is “mycams.com” you just write “mycams”.
- In the “Site name” field input your full domain name. i.e. “mycams.com”
- The “Domain alias” field you can leave it empty.
- On the “Featured gender” field, depending on what gender you are planning to target you have to choose from “Men”, “Women”, “Transsexuals”, “Couples” or “All” and since our targeted gender with this method is Men we are going to choose “Women” as the Featured gender.

- “Logo” field – here we are going to browse and select the .png image we have created in the 2<sup>nd</sup> step of this tutorial.
- In the “Title” field we just write our domain name again.
- “Tagline” – here you should write a catchy phrase that will go right below your logo. Think of something sexy that your visitors will remember. Use this [taglinegenerator](#) to get some inspiration.

You can also play around with the other colour settings to make them look as you see fit or you can just leave the default ones and when you are ready click on “Save” at the bottom of the webpage.

NOTE: You can edit any of the changes you made on the steps above so no worries if you don’t make it right in the first place.

#### 4. Domain redirection.

In this step we are going to redirect our domain to the newly created cam website.

What you need to do is log in to your account with your domain registrar at <http://godaddy.com> or <http://namecheap.com> or whatever registrar you’ve chosen and redirect your domain to

<http://XXXX.chaturbate.com> where XXXX stands for your domain name (without the extension) that you have purchased in the 1<sup>st</sup> step of this tutorial.

If you have never done a domain redirection before just contact your domain registrar's live support and ask them for 1 minute to help you do this.

When all the above steps are done you should have your own Cam Website with your logo on it and everything.

## 5. Recording and watermarking videos.

Now we are going to record 10 live videos from broadcasters on chaturbate.com or myfreecams.com and watermark the videos with our own logo. Refer to the video “Recording and watermarking”, for a clearer guide.

The optimum video length is somewhere above the 5 minutes mark and it can go up to 10 – 12 minutes.

To do this we are going to use a screen recorder.

The best I've found is [FastStoneCapture](#) which is really cheap and automatically saves the videos in .vmw format after you finish recording and you can also use it to watermark the videos.

If you don't want to invest in it right now you can download a 30 days free trial from [Camtasia](#) and it will work just as good.

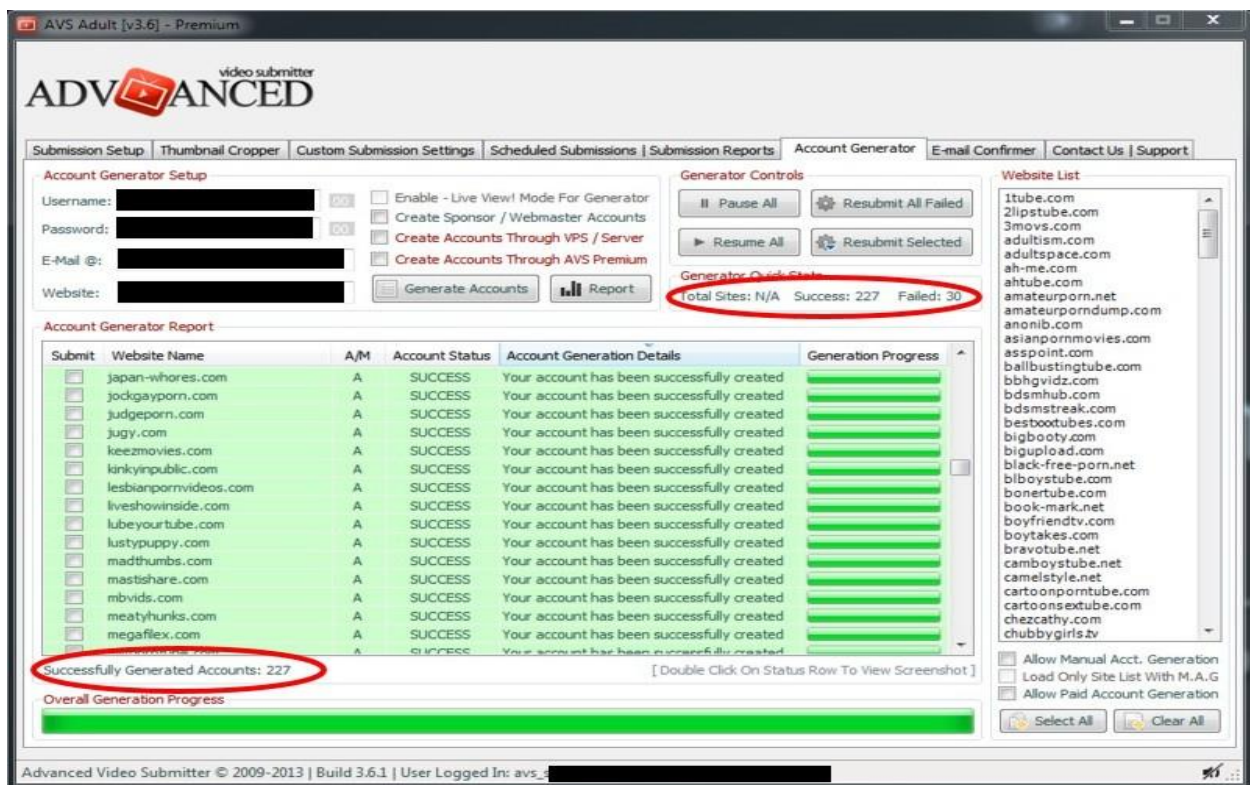

To see a quick example of how this is done please watch the video #2 that you have downloaded along with this tutorial.

## 6. Uploading videos

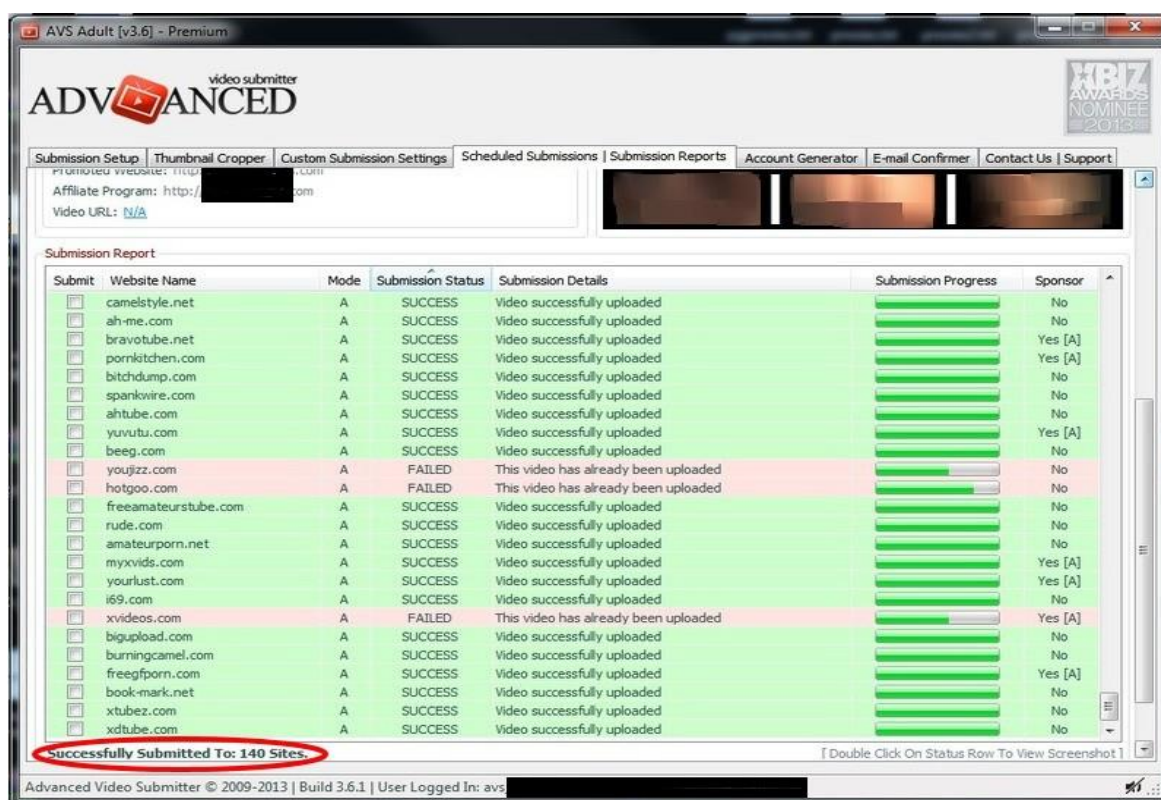

OK, assuming that you have everything set up and the videos are watermarked, we are going to go to the next step which is uploading our videos to anywhere between 130 to 160 Adult Tube Sites.

The best software to do this and the most used amongst the top adult webmasters is [AVS\(AdvancedVideoSubmitterPRO\)–Adult-Version](#) which you can get on a \$29.95/mo subscription.

What AVS does is it will create accounts to over 200 Adult Tube Sites (including the most popular ones like xtube.com, xhamster.com, youporn.com) then click on the links in your e-mail to verify the accounts

And then upload your videos to those accounts.  
(With captcha and everything at no extra costs)

Now of course a lot of the videos will not be successfully uploaded to all accounts every time because from time to time some sites make changes OR may require some manual intervention OR may be down for maintenance etc.

As you can see in the first screen shot AVS successfully generated 227 accounts and in the second screen shot you see my video was only uploaded to 140 accounts from those 227.

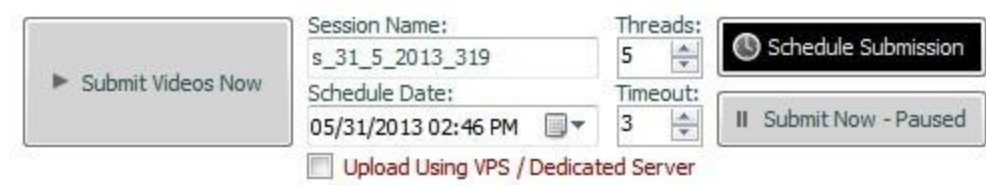

Also, some of those successfully uploaded videos will not be approved on some sites for different reasons like poor quality, video too short/long, watermark too big etc. but still ...

With a reasonable upload speed in 2 hours you will be able to upload your video to anywhere between 130 to 160 sites.

And the whole process shouldn't take you more than 3 hours if let's say you spend 2 hours every day recording and watermarking your videos and another one hour to schedule AVS to upload those videos with a 2 hours delay between each uploading session.

*Yes! It is that set-and-forget type of tool which has a scheduler so you don't have to come back for it every 2 hours. You just feed it with your videos and video details , give a session name, set the hour/date for upload, set the thread number and the timeout according to your Needs and hit the “Schedule Submission” button after each video setup.*

The screenshot shows a web interface for scheduling video uploads. On the left is a button labeled "Submit Videos Now". To its right are input fields for "Session Name:" (containing "s\_31\_5\_2013\_319"), "Threads:" (a spinner set to 5), "Schedule Date:" (containing "05/31/2013 02:46 PM" with a calendar icon), and "Timeout:" (a spinner set to 3). To the right of these fields are two buttons: "Schedule Submission" (with a clock icon) and "Submit Now - Paused" (with a pause icon). At the bottom, there is a checkbox labeled "Upload Using VPS / Dedicated Server".

*That's it. AVS will be busy uploading your videos for the next 20 hours so you can work on some other projects for the rest of the day.*

So let's do some simple math:

If you upload 10 videos per day with an average success rate of 140 sites per uploading session that is 1400 videos uploaded per day.

From those 1400 maybe 1 or 2 hundred will not be approved for the various reasons I specified above but in the worst case scenario you will still be left with

**Over 1000 live uploaded videos per day.**

Now here comes something else, with a VPS and some private proxies you can DOUBLE that amount because AVS comes with a VPS Submission Engine (no extra \$) that you can install, repeat the steps above and run both simultaneously.

10 videos/day from PC      X      140 sites      =      1400

10 videos/day from VPS      X      140 sites      =      1400

Again, being the most pessimistic and saying your videos are really bad and a lot of them will not pass approval, by uploading from PC + VPS you will still have

**Over 2000 live videos/day**

And as it wasn't already enough, if you want to really milk this cow like I do (if you look in the upper left corner of the AVS Screen Shots it says "Premium") , you can purchase some credits for the Premium version of the AVS and upload 10 more videos per day using their own servers.

PC:  $10 \times 140 = 1400$

VPS:  $10 \times 140 = 1400$

Premium:  $10 \times 140 = 1400$

**TOTAL: 4200 VIDEOS UPLOADED DAILY**

Now, as I said before some of them will be deleted or not approved by the tube sites admins but in the worst, WORST case scenario (which IMHO is not possible) you will have at least 3300 live videos uploaded at the end of the day.

## 7. Money!

Here are the stats for the first pay period after I started doing this.

Note that until the 26 of April I was only uploading 10 videos/day using AVS from the local PC.

Revshare - 20% of Money Spent + \$50 per broadcaster + 5% Referred Affiliate Income Stats by Date

Total	6508	544	0	\$2691.50	\$538.33

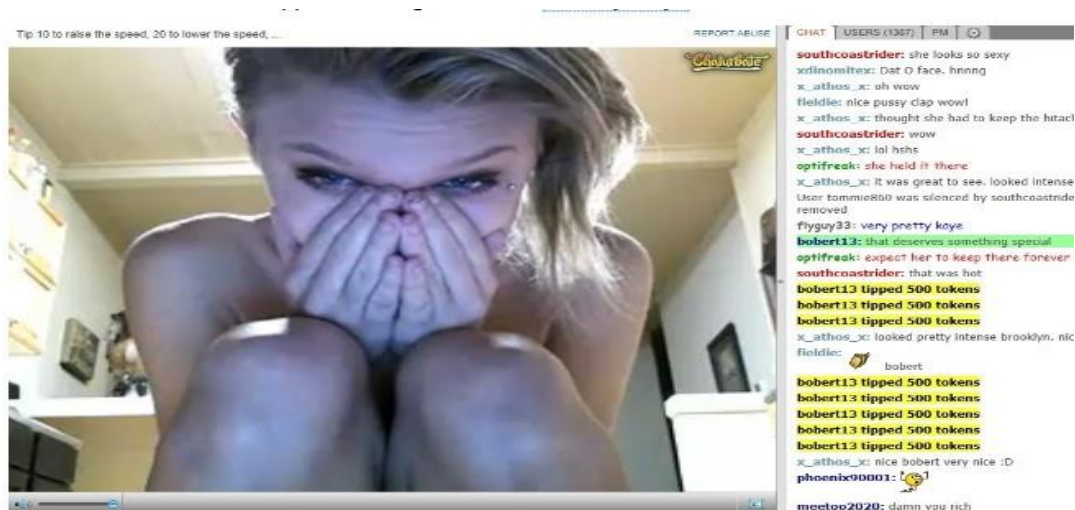

And here are the stats from the 2<sup>nd</sup> pay period. Starting from May 3<sup>rd</sup>

I also used VPS and Premium credits so I was uploading 25 to 30 videos/day.

A picture is worth a 1000 words so I don't think there is anything more I can say about how much money you can make using this method but just in case you're still somehow sceptical, check out the following screenshot.

This is taken from a broadcaster's chaturbate page and those lines highlighted in yellow are tips of 500 tokens each, in a total of 4000 tokens which means the tipper spent \$400 in that night

On this girl alone. And if this guy signed up under someone's RevShare affiliate link, that affiliate instantly earned \$80 from this tip.

$$\text{\$400} \times 20\% = \text{\$80}$$

Now, while you may be right to think that tips like this don't pop up every couple of minutes on chaturbate, I've seen a lot of big tips while "hunting" for videos to record and this one is by far not the biggest one.

## 8. Summary!

OK, I realize this is quite a complex money maker so I'll try to summarize it in a few short steps just to make it more clear for you.

1. Get a good domain name. [FreeDomainGenerator](#)
2. Make a nice .png logo with your domain name on it, you can use [Pixlr.com](#) or any other photo editor you like.
3. Make an affiliate account at [Chaturbate.com](#) and use their White Label to make yourself a nice Cam Website.
4. Redirect your domain to your newly created Cam Website.
5. Get any screen recorder you like and record some nice cam shows on [MFC](#) or [CB](#).
6. Make a monthly subscription for [AdvancedVideoSubmitter PRO](#)
7. Upload your videos using AVS.

8. Buy yourself something nice.

Optional for more income:

Get a VPS and some proxies and/or buy some credits for the AVS Premium and leave no money on the table.
