

AMAZON CARDING METHOD USING ANDROID (2017)

Requirements :-

- HideMyAss! Pro VPN - [Download](#)
- Mozilla Firefox - [Download](#)
- Credit Card (Amex/Visa/Master Card)

Steps To Card Amazon Using Android :-

1. First of all connect your VPN to the Credit Card owner's country.
2. Open Mozilla Firefox.
3. Go to Gmail.
4. Make a new account with CC owner's name.
5. Don't put your number for verification.
6. Now visit Amazon.com and Login Amazon.in
7. Make new account with CC owner's name.
8. Now add to cart any product Sign Out.
9. Do not disconnect the vpn.
10. Sign in after 15 minit.
11. Proceed to checkout.
12. Put the address of cc owner in the billing address and your address in the shipping address.
13. But make sure the delivery of the product is available in India. If not then change the product.
14. Check Gift option, if available.
15. Place the order.
16. Don't sign in again.
17. You will get the shipping details in gmail so dont sign in through amazon.
18. Wait for the product.
19. Done.

Reason If Product Not Shipped :-

1. The Credit Card is dead.
2. VPN not connected for 15 minit.
3. Steps not followed correctly.
