

## HOW TO MINIMIZE JAVA APPLICATIONS IN S40 JAVA MOBILES

Good news for all nokia s40 v5 and 6th users. Yup! You can now minimize java applications or send them to background. And can almost run 5 applications at the same time!!

### PROCEDURE:

1] Open the jar application with WinRAR via PC

2] Goto META-INF >>MANIFEST.MF

3] Edit MANIFEST.MF using notepad and add followings lines.

Nokia-MIDlet-auto-start: no

Nokia-MIDlet-no-exit: true

4] Save it and drop in the same folder That's it. Now whenever you press red button on your phone instead of closing the application goes to background

.note : after u have minimize application if u want to open it again then simply go to application where u have stored it (memory card / phone) then open it.
