

okay lets keep this tutorial short. you want movies and games/mp3 / games and dont' know where to get them,  
thank god there is google.com  
goto [www.google.com](http://www.google.com)

---

put this string in

"parent directory " /appz/ -xxx -html -htm -php -shtml -opendivx -md5 -md5sums

"parent directory " DVDRip -xxx -html -htm -php -shtml -opendivx -md5 -md5sums

"parent directory "Xvid -xxx -html -htm -php -shtml -opendivx -md5 -md5sums

"parent directory " Gamez -xxx -html -htm -php -shtml -opendivx -md5 -md5sums

"parent directory " Name of Singer or album -xxx -html -htm -php -shtml -opendivx -md5 -md5sums

notice that iam only changing the word after the parent directory, change it to what you want and you will get  
lots of goods. i got plenty of movie sites heh.
