You like ( email of sender the title of thread ... )  
and to allow you to send spam to million email  
with

just one click , i will show you in the next thread

#### 5 :: Letter

Its The letter who you wil send it to the  
mailist , for example if you will spam Paypal  
account

you need a letter for paypal, this letter is  
programed  
and it like the original letter of paypal or bank  
company ..

( Hello , You need To confirm Your paypal  
Account .... )

#### 6 :: Your Email

you will use it and place it in the skam page  
To get your result of spam in your email  
That All Now i will explaine you The Setup

::

First We need to Get a mailist ( i will shuow you  
in the next Post )

then we need a mailler and hosting and we start

,

you need to upload The skam page in the  
Hosting and place

Your own email in it to receive the spam result ,  
Then

you need to upload the mailler scripte in the  
hosting

and now you Need To change somme thing in  
the letter

You need To add your link of your uploaded  
Skam page

to send it , Here We start scam page and mailer  
uploaded  
in the hosting letter modified with ower  
informatin ,  
Now go to the mailer link and put the mailist  
and the letter  
and the information of sender ( if you will spam  
paypal account )  
you must pute service@paypal.com like email  
sender  
the title of letter is you need to confirm your  
account .... ) and you start  
to send spam to the hacked mailist  
now you need just to wait to receive the spam  
result  
when they access to the scam page and write  
there information (   
credit card ..... ) you will receive it in your own  
email ^^  
It just Beginning i wil post Detailed explanation  
of setup
