WELL GUESS WHAT!!!!!!!!!!

You can now get it without paying a cent (that is if you have a free 2 month trial)

First go to <http://www.xbconnect.com/downloads.php> and download the current version of XBConnect...

Secondly you must get a Ethernet cable and connect your X-BOX to your router (if you have, you MUST have one BTW)

Thirdly install and open xbconnect. Create a new account .....

Fourthly go on [www.xbox.com/live](http://www.xbox.com/live) and sign in your .NET passport and create a profile for xbox live

Fifthly open your xbox with a xbox live supported game and follow the setup for xbox live ....

And YOUR DONE!!!!!!
