I use google cuz its the best search engine en everyone can acces .  
The easiest search quote is "index of ..."  
Some kind of examples are:

index of ftp/ +mp3  
index of ftp/ +divx  
index of ftp/ +"whateveryouwant"

Google has many operators that should help you to specify your search  
USE EM  
There are also lots of advanced operators available  
here are a few:

cache:  
link:  
related:  
info:  
stocks:  
site:  
allintitle:  
intitle:  
allinurl:  
inurl:

eg:  
allintitle: "index of ftp/mp3"

try to combine things and maybe u'll find something
