

# BITCOIN EXPLOSION

Watch your Bitcoin wallet Explode!

## Method #1

Website - <https://bitify.com>

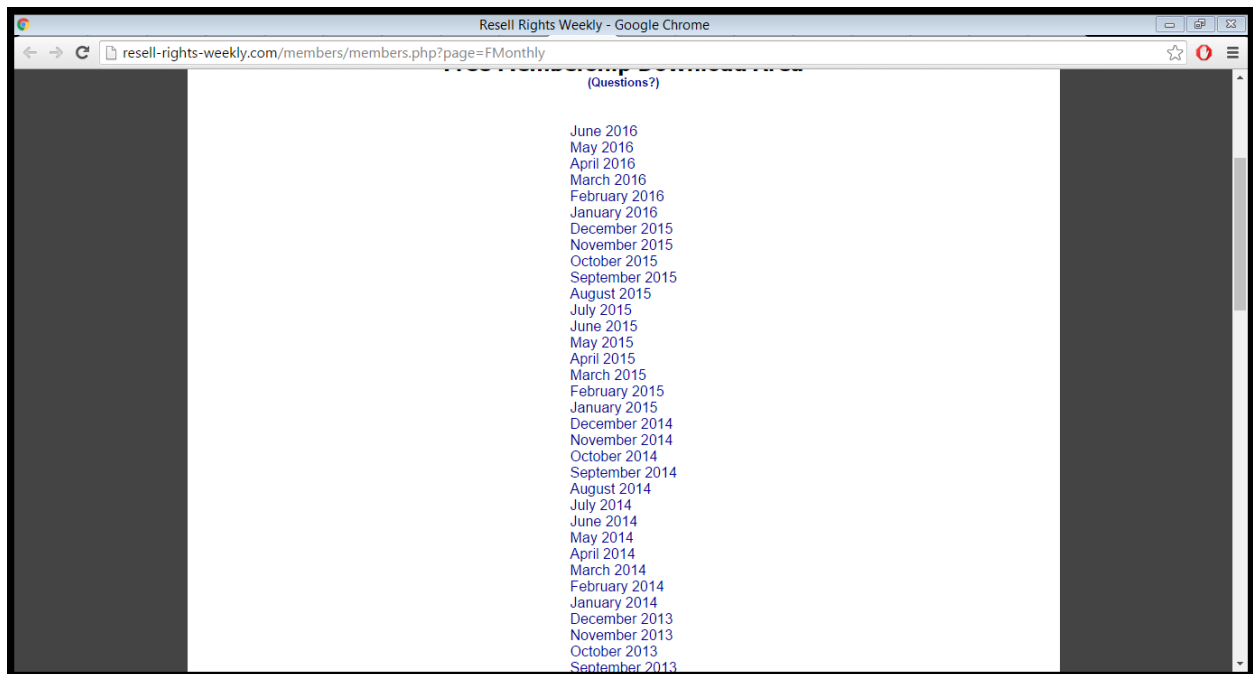

<http://resell-rights-weekly.com/>

Sign up on these 2 websites.

After you sign up go to the free section  
on resell-rights-weekly

<http://resell-rights-weekly.com/members/members.php?page=FMonthly>

it is located here ^

Now what you're going to be doing is  
downlading ebooks from any of these  
dates

These are all free and hq ebooks.

Now what you're going to do is go onto  
bitify.

Now you're going to click on sell and  
you're going to put up the free ebook

you just downloaded. All the ebooks will have names on them. Simply google an image and press save and then post the image when it asks you to on bitify.

Here is an example of a listing

Title- Make thousands of dollars per day

Country- Usa

State- Arizona

Category- Digital Goods- Misc. Digital goods

Condition- Brand new

Buy now listing only

Quantity- 99

Also remember to click on the feature listing option! This is crucial to click on this to drive you more traffic.

No shipping required

Once you put the listing up the site will do all the work for you. Just enter the ebook in on the site and it will auto deliver to the customer once he/she purchases

I get around 30 sales a day and I sell for \$5 each which is \$150 per day simply on autopilot. The more guides you put on there the more traffic you will get and the more sales you will get.

If you got ebay you can also sell these free guides on ebay. You could basically sell these anywhere on any bitcoin marketplace or on any ebay-type website.

Other types of things that you could sell are web scripts/cracked programs/etc..

There are millions of free things that you could find online that are free and you

could just end up reselling them for btc or you could sell on any ebay type of marketplace.

Another thing that you could do is go to the non-free accounts section on H.F and buy accounts on there and then resell them for more \$ than what you originally brought them for. You can price it 10-20x the price higher.

## Method #2

<http://www.vegasinsider.com/>

This requires investment.

If you do not have a decent investment then do not use this method.

Yes this method does require a risk.

<https://www.cloudbet.com/en/sports>

Basically What you will do is buy picks form Vegasinsider and then what you will do is you will use those picks on cloudbet. Now vegasinsider does have free picks that they give out but the free picks aren't that efficient.

The people on vegasinsider make a living just off betting so when you buy the picks you're buying the picks from the pros. The pros will always win more games than they lose. As long as you bet the same amount every single day then you will have no issues making money.

Now there are other vegas sites/etcc that you can choose from and cloubet isn't the only betting site. There are paypal betting sites/etc..

You'll just have to look around and find which one you think will suit you.

I'd say the bitcoin one is the easiest to use since you can just transfer your winnings from one wallet to another.

Now what you could also do is that you could sell these pics at a markup of what you got them for.

For example

If you make a group of people who want to buy picks and you have 10 people and

you charge them \$5 a day for the picks  
you will make \$50 a day just off selling  
them picks alone.

Now imagine if you had 20-30 people.  
You'd make \$100-\$150 per day just like  
that!

### Method #3

Using exchanges to your benefit

### Altcoin

Name/BTC	Price	Today	24 hours	7 days	30 days	Exchanges
----------	-------	-------	----------	--------	---------	-----------

Bitstamp Price is \$627

Bitfinex price is \$630

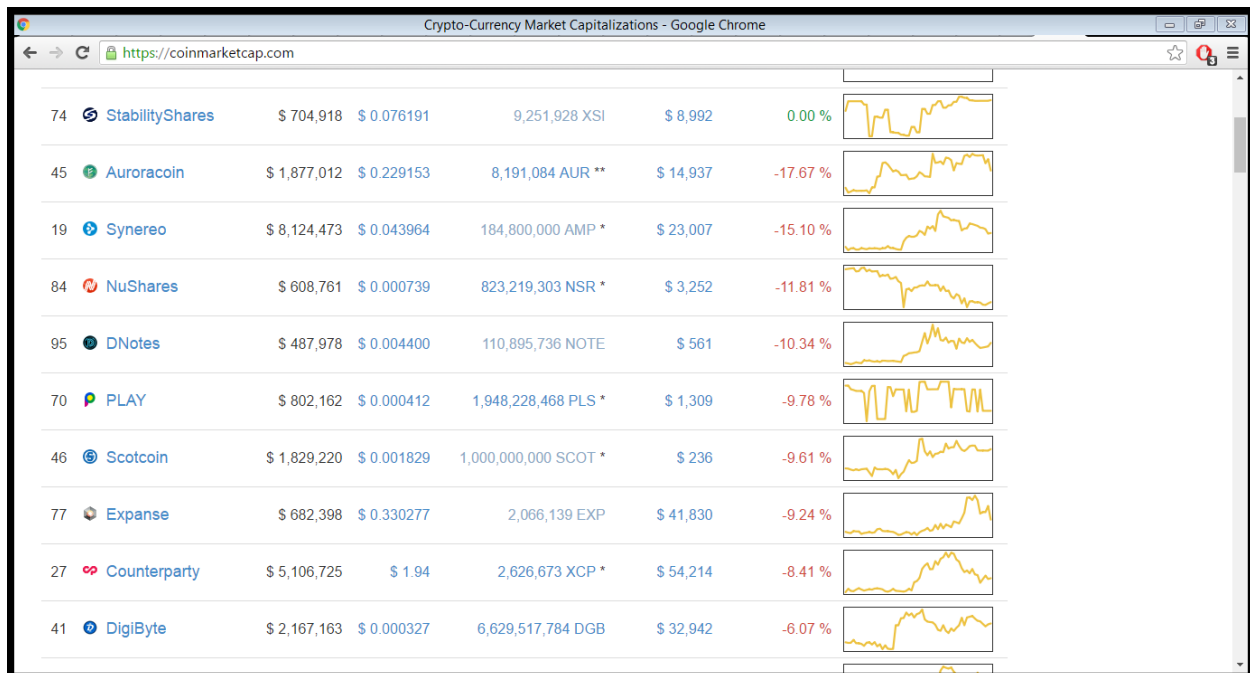

Btc E Price \$608

Just go around and switch the btc through the exchanges. Buy low off one exchange and sell high on another.

You could also buy alts off one exchange and then exchange em on another exchange for a difference in price.

Chinese exchanges always have higher prices than U.s exchanges.

## Method #4

Buy coins that go down

Majority of the time they will go up again

Of course you should do your own research beforehand

Bitcointalk.org

Is one site you can do research on^

Do not fall for people hyping up a coin and don't get suckered into it.

A lot of people lie on bitcointalk

If a coin you bought keeps going down don't panic sell.

Wait for it to go back up.

It might take months but a coin will majority of the time always go back up

Another method is that you can buy bitcoin for 1;1 off exchanges and sell it on our very own site H.F at a 15% rate Which means for every \$100 you sell you make \$15 profit :😊

Sell \$1000 worth and that's \$150 profit

Some people will buy 200-500 at a time! Make sure to deal with trusted people only.

You can even purchase like \$10 worth and sell at a 15% rate
