17 May 2013	Refund From	Dental	Completed	<a href="#">Details</a>	\$25.00 AUD

Hello, I would like to say **THANK YOU** for purchasing my eBook. I worked very hard on this book to help you people make money online. I haven't seen this method posted on HF

or many other forums. Some HF members that are "White Hat" do this for "Google" and other famous websites.

1) Firstly, you need to go make a Hotmail account (Hotmail.com). You want to make your Hotmail account something High Quality and sounds REAL.

e.g. TheScanneNetwork@Hotmail.com

SecureSites@Hotmail.com

SecuringLive@Hotmail.com

You will be using this email to send emails to companies to report bugs. I suggest you use a VPN to make the account.

2) Okay, now that you have done that you will want to Download "Acunetix Web Vulnerability Scanner 8"

(<http://thepiratebay.sx/torrent/7357150/Acune>

[tix Web Vulnerability Scanner v8.0 \[13-06-2012\] Cracked By \)](#)

---

3) Head over to "Yellow pages". Google search it and find your country. I suggest using the US instead of where you live due to more traffic.

---

4) Look up stuff like "Doctors, Dental, Restaurants".

---

5) Once you have found a place click on "Website".

---

6) You will now have to find there "Email". Once you've found that move onto the next step.

---

7) Open up "**Acunetix Scanner**" and run a scan on there site.

---

8) If you don't pick up anything repeat steps 3-6 and find another website. If you found something that is either in the "**Red Zone**" or "**Orange Zone**" move onto step 9.

9) WOW! You're nearly done! You now have to go back to Hotmail.com and login. Once logged in start a new email and put the websites contact email in.

Follow the template below:

*"Hello -Insert Name-,*

*I recently scanned your site to make sure it was secure from hackers. I scanned your site with "Acunetix Web Vulnerability Scanner". Acunetix cost \$1,300 a year to have on my computer.*

*The scan picked up a VERY bad "Vulnerability" that hackers could use to hack into your site. If a hacker gets a hold of this "Vulnerability" he will be able to;*

*- Steal Credit Card Documents*

*- Steal customer information*

*- Steal your whole site*

*- Blackmail you*

*If the Hacker gets ahold of your customer information you  
COULD BE under quite a lot of trouble. The hacker could  
also purchase goods online with theirs & your credit card  
information.*

*If you would like it patched please read the image below. If  
you would like me to "Secure" and do scans for you weekly  
please just respond back. Also, if I may ask... Would I be  
able to get a "Prize" for my effort.*

*Thank you, -Name-"*

Post pictures of the scan report from your  
scanner:

Example:

Apache httpOnly Cookie Disclosure

Severity  
MEDIUM

**Vulnerability description**

Apache HTTP Server 2.2.x through 2.2.21 does not properly restrict header information during construction of Bad Request (aka 400) error documents, which allows remote attackers to obtain the values of HTTPOnly cookies via vectors involving a (1) long or (2) malformed header in conjunction with crafted web script.

**Affected Apache versions (up to 2.0.21).**

**Affected items**

- Web Server

**The impact of this vulnerability**

Information disclosure.

**How to fix this vulnerability**

Upgrade Apache 2.x to the latest version. Apache 2.2.22 is the first version that fixed this issue.

**Web references**

- [Fixed in Apache httpd 2.2.22](#)
- [Apache httpOnly Cookie Disclosure](#)

---

10) Go scan more sites and do everything again.

---

11) Wait around 1-3 days for a response. Once they respond you want claim your reward via PayPal.

---

## ***Tips/Tricks***

- When emailing your person make it sound heaps bad as if the hacker could steal credit card details.
- When waiting for a person to reply go play some games or scan more sites.
- Remember to sound heaps "Posh". Make it sound like your a company.

## **THE END**

Well, this is the end. Hope you learnt something from this eBook and will use it too make extremely good amounts of money. Please, leave a vouch on the thread.

(I ALSO DO HAVE A LEAKFORUMS ACCOUNT! NO LEAKING!)
