Awesome tricks.....

how to hide folder and these tricks have more benefit..and they are consists.....

>non deletable folder

>non moveable

>non renameable

>folder size will be zero (after conversion)

>folder file will be zero

following these steps...

step 1. open cmd just press CTL+R and write cmd hit enter

step 2.common the folder location

step3.write these codes..

"cacs folder name /e /p everyone:n" (for hide)

hit enter

and see folder size

folder size will be se 0 bytes

for unhide and restore file

just press these code same as.....

"cacs folder name /e /p everyone::f" (for unhide)

i hope u like it.....

enjoyeeeee.....
