Rat Kings Ebook!

Method #1

Ok so to start off with this ebook you will need a few things to make sure these methods work the best for your Ratting experince.

*FUD Crypter

*Ratting Program

*and A Brain

Ok so for this frst method you will wanna spread on the website "<https://www.freelancer.com/> " You wanna sign up there and Start spreading. So you wanna say that you are hiring people for a computer job like This. So this method is very great because there are abunch of people that wanna try to make money off your "Beta game" If you really wanna get the most ammount of slaves you can i would add somthing like this in your title of your post. "I need beta testers for my new Game 50\$ for the first person who beats the Game" Once you have added somthing like that to the title you will get alot of people messaging you like crazy. Once they do just tell them that you are making a game and you just need them to test it out. Once they say yes give them the download for your "stub"

Once they are on your "Slave list" just tell them that if the game did not pop up that your coding must not work on there current pc type. Or just tell them that they might need to update there System.

You wanna keep talking to them for a little bit so your post dont get taken down really quick. with this method you will get at least 50 installs aday.

Make your self look like you are a real game maker so also comment on others post and tell them to check out your post. This is good because it will make them want the 50\$ and wanna try your game and if they see abunch of other people downloading it they will download as well.

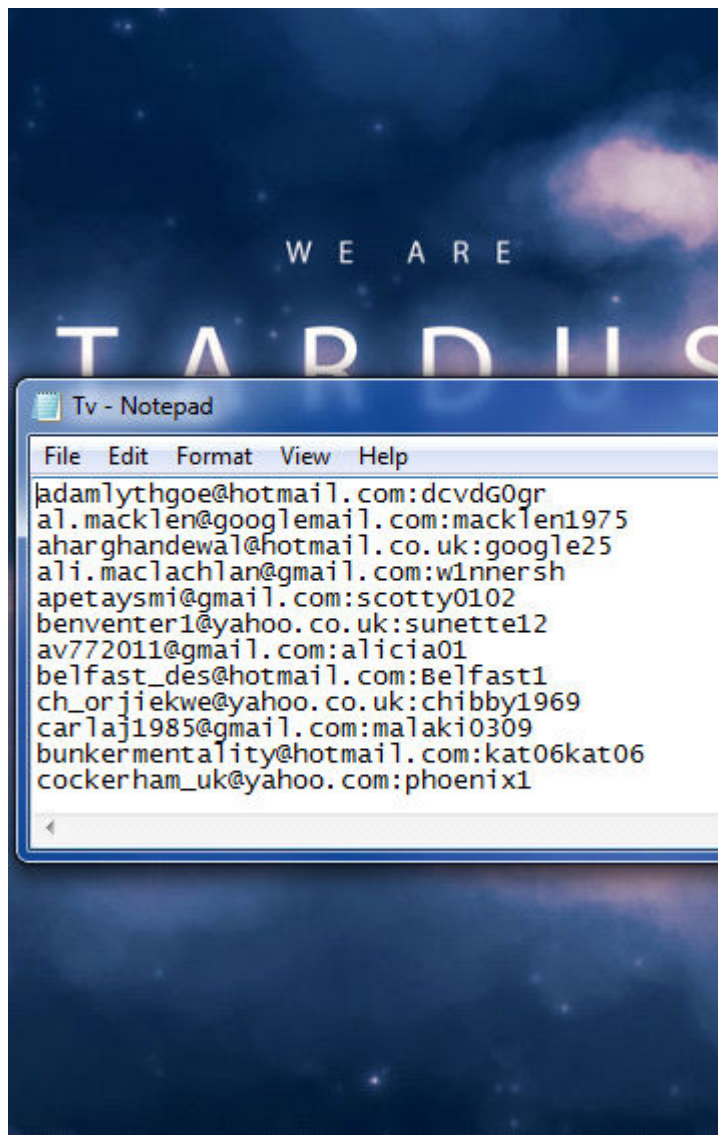

Example Text to use

Hey guys so i just made a new game and i wanna know what you guys think of it. This is a small little zombie game with 2 waves of zombies. The first 2 people that beat it i will give you guys 50\$ via paypay. So let me know how you guys like the game. if there are any bugs or glitches let me know. Thank you guys very much for the help and the feed back. To get the 50\$ there will be a code tell me the code so i know you beat the game and you will get your 50\$ via paypal. Good luck Guys!!

See you can use that text above us to get your slaves to download your Stub. This is one of the best methods to get your stub out there.

Method #2

This method is kinda the same as method #1 What you will wanna do is go on to <http://leakforums.org/> and download some teamviewer accounts passwords and emails. once you have done that you should get something like this.

once you have the accounts just sign into the account and see if there are any people online. once you see if there is anybody online just teamview them and remote control your stub on there computer! Keep on doing that for a little while and boom you will have a bunch of slaves!! If you wanna make this go by faster you can also download a account cracker from <http://www.hackforums.net/>

If you wanna get alot more Slaves what i would do is use method #1 with some slaves and ask the people if they have teamviewer and steal there accounts then see if they have any good friends on there. So once you do that you should be getting slaves like hot fire!

Method #3

The next method is also really good and will get you a shit ton of slaves

this is very simple to do. just make a facebook page. that gives free mods,hacks,games shit like that. once you are done just bind each file to your rat. this is very good and could get you 1000 to 50,000. but you need to seem legit and post on there pretty much almost everyday. make sure your file is 100 percent FUD if not at least 98 then say some bullshit like " oh yeah it does that because it is a Mod'

That is just it that is all the methods i use to get a shit ton of slaves. this ebook can make you at leats 100 slaves aday!
