Support

This Extreme version of BustaMill Money Making comes with full skype support. Feel free to add my personal skype: kapsieart for any questions/support and I will get back ASAP.

Introduction

Welcome to your new money making method. Pay attention to all details in this eBook and you will be on your way to potentially making thousands in a day. Before we begin I would just like to cover a few things with regards to this method. Keep in mind this is gambling, anything can happen... But if you really make use of this book you will definitely see your profits skyrocket in a short time. Bustabit can be a tricky and confusing game but with the right methods and plays you can really get bitcoins rolling in to your pocket. Trust me, I know firsthand what it's like to lose all your money to this game but I also know what it's like to get MILLIONS of BITS flowing in to your wallet with some simple concepts. Make sure you carefully go over all details in this book and you will be on your way to becoming a Bustabit legend and I really mean it.

These methods are 100% my own. I have not bothered looking into anyone else's methods/eBooks because I am confident that my own ideas will provide you with the best profit that can be made from this game. How? This isn't some typical write up for money. I along with the help of several friends/bustabitters developed all these strategies through trial and error. I am not some amateur. I have studied and played the game for weeks on end and found what worked best for me. All you simply have to do is read this compiled list of my findings to reach the heights I have.

Also a few things to keep in mind: I will refer to all currency as bits just like how it is in the game so for example 1500k bits = 1.5btc. Also this book is written in chronological order so I suggest you read from start to finish rather than brushing through sections. Have fun making profit!

Table of Contents

- Investments
- Mindset/When to Bet (Must Read!)
- Method
- Withdrawals
- Conclusion

Investments

Investing bits into the game can be very rewarding as it allows you to bet higher amounts and win bigger profits. This may sound absurd but in my case I would throw \$100 into the game which would give me around 200k bits to mess about with and that would be a good base to begin betting with. Please keep in mind that is just my personal preference. The higher your investment the safer your bets. Higher investments also really like lead to higher profit. For example, if you were to bet 50k @ 1.23x around 5 times you would get around 65k profit with only around a 15% chance of losing whereas if you were to bet 5k @ 2x you would have a 50% chance of doubling that 5k leaving you with less profit and a higher risk. When I would invest 200k I would do 50k @ 1.23x allowing me to really profit highly (more details in methods section). So bottom line is the higher you invest the faster and safer your profit can be.

Mindset/When to Bet

This section is very crucial to being successful in the game and I recommend that you read over everything a few times and really get it in your head because even I myself had difficulty following this at first.

When you get on Bustabit first thing you should do is get a notepad and plan all case scenarios to prevent you from making stupid decisions. Firstly, set points to when you want to cash out and when you want to pull out for a while. For example, If I had 500k to play with and got to 1500k I would transfer 1000k to my wallet knowing that I would never put that on the game again and continue to play with the 500k left on my account. I would also set up a point as to where I would leave the game for a while, go for a walk and then come back which would happen if I dropped from that 500k to 200k. This allows you to refresh your mind and think about how you can go about getting that money back smartly. This also prevents all impulsive bets which can easily lead to getting wiped because it's hard to control yourself when you're angry especially when it involves money. If you lose money at any point understand that it's fine and wait a bit until you feel comfortable going in again. Bustabit can very easily screw you over if you aren't patient with the game so just be really careful with betting after a loss.

As an example I just hopped on the game and found this. A lot of the time a lose train much worse than this can happen and if you bet crazy to get your money back you will end up losing a lot. (Method revolves around getting profit even in these situations)

1.19x	-	-	-	-	811c1290d3
1.01x	-	-	-	-	0ac696574f
1.51x	-	-	-	-	ad62d22427
1.16x	-	-	-	-	40ab58b6b0

When you are ready to bet you should first click on the history tab located to the left of the chat screen and really analyze the trends. This is most likely the MOST IMPORTANT thing you can do to ensure you rake in as many wins as possible. Here are steps showing you how to analyze the trends:

Take a look at the latest trend which in my case would be:

CRASH	@	BET	BONUS	PROFIT	HASH
1.36x	-	-	-	-	3d31710181
5.73x	-	-	-	-	0328a7fd40
3.68x	-	-	-	-	fb8b0be51e
2.00x	-	-	-	-	7cfb80bbe3
1.81x	-	-	-	-	e674208e37

If you look at this carefully you will notice that there were 3 wins (green) in between 2 losses. This could potentially mean that the next 3 games are wins because that's what the pattern is showing. Keep in mind that this isn't guaranteed but it can seriously be really accurate sometimes. If you look at the aftermath you will see that the 3 wins after a loss trend happened a full 3 times before switching over to another trend:

CRASH	@	BET	BONUS	PROFIT	HASH
1.25x	-	-	-	-	c203825394
1.63x	-	-	-	-	c044f5fb88d
2.02x	-	-	-	-	7e4a36dad6
1.14x	-	-	-	-	b04dc67c13
2.52x	-	-	-	-	4828e1f6cc
1.00x	-	-	-	-	78e7267d48
3.18x	-	-	-	-	cf220de524
12.36x	-	-	-	-	9cb91ca851
38.23x	-	-	-	-	4dcdd579e
1.55x	-	-	-	-	e9564b750c
4.12x	-	-	-	-	89b02c4f21
4.04x	-	-	-	-	9a12aba2f2
2.85x	-	-	-	-	03141f79ff0
1.36x	-	-	-	-	3d31710181
5.73x	-	-	-	-	0328a7fd40
3.68x	-	-	-	-	fb8b0be51e
2.00x	-	-	-	-	7cfb80bbe3
1.81x	-	-	-	-	e674208e37

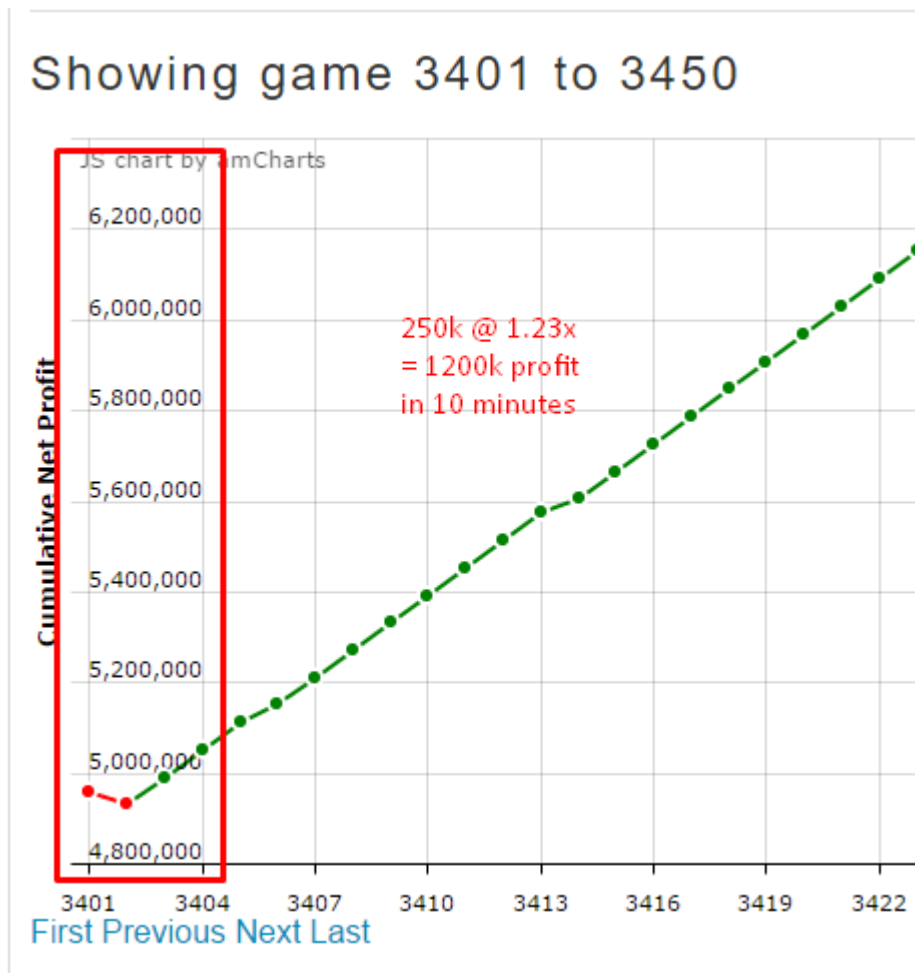

In this case you would have had 9 free wins which could have potentially been an insane amount of profit. So keep in mind that trends can be very helpful but at the same time follow your gut feeling. If you personally feel that it may be an early crash or the trend may change, then don't bother going in as you want to only go in when you feel your chances of winning are the highest.

Stick to your gut feeling. If you think that the next game might be an early crash don't bother going in or go in with a smaller bet. This can save you so many times from losing money and if you combine your gut feeling with the trend analyzation it can be a deadly combo towards generating bitcoins.

Method (low risk/medium profit)

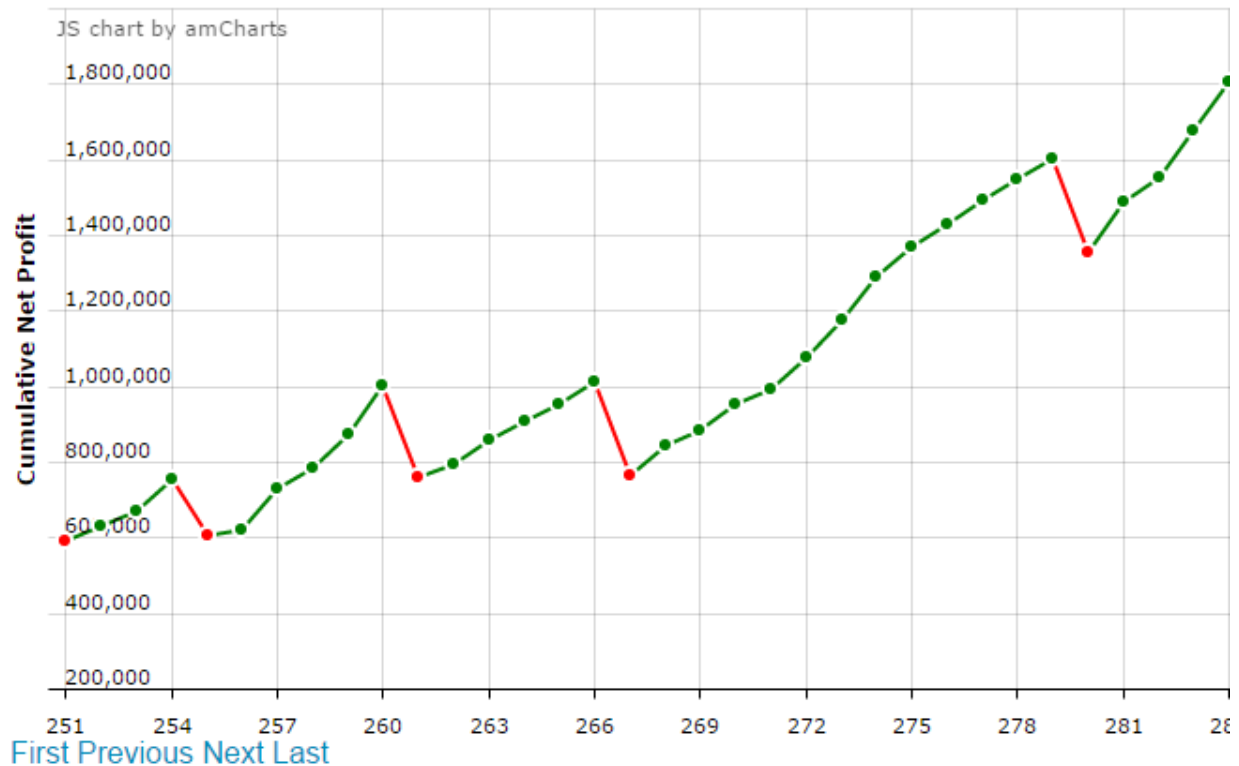

Bustabit can be quite fair of a game with a 50% chance that the multiplier goes over 2x and a slight chance that it skyrockets to crazy numbers that can lead to crazy amounts of profit. In this method we don't look for a 50% chance though, we look for an 80%+ chance and this can be accomplished by betting high and pulling out @ 1.23x. Now normally there would be around a 20%-25% chance that it may crash before this but if you read over the trend analyzing section the chances of you losing become very slim. First things first hop into the history tab if you

notice that there is no trend you can follow or the loss ratio is far higher than the win ratio then I suggest you go about your business for 5 minutes and then check again to see because we always want to make sure our chances of winning are at its highest, and yes it is random but I am a strong believer of following trends and if it's all reds on that history tab get out of there. Ok so once you find a good time to go in set your auto cash out to 1.23x. This will prevent you from getting greedy because the chances of it crashing after 1.23x are likely. If you are unsure about how much to go in with I would suggest trying $\frac{1}{4}$ of your cash so I had 1000k I would do 250k bets @ 1.23x. At this rate I would be able to gain 250k every 4 rounds but I want to aim for at least winning 5 games before losing since this will get you into profit. After following this for a few games here is the profits I managed to rake in:

That's right, that's around \$535 USD in just 10 minutes. More realistically you will probably end up with a chart like this:

Showing game 251 to 300

My only goal would be to get those 5 wins in before losing one and if you manage to follow the trends you can get pile even 20 wins before losing one which really can lead to insane profits. In this picture you can more realistically what this method looks (prefer to be honest with you). Even though there are losses I adjust my bet accordingly and continue to rake in the wins to get that chart flying sky high. As you can see there is nothing special to it.

If you notice or sense a loss streak just simply take a brake and if it doesn't end up happening just be happy knowing that at least you made the effort to try and avoid it (this helps practice your self-control and can be very useful in the game). Also a good time to go in is when there are 2 very early crashes back to back. Chances are the next one will be a win or at least above 1.23x.

Withdrawals

Before even beginning to bet set a number where you will withdraw at. This way you will be able to keep the money you were aiming for. For example, if I started with 75k I would aim for 300k before withdrawing but I would get up to 400k so I can withdraw 300k and continue to bet with the 100k left. I will repeat and repeat and if I fail to reach the goal I will call it a day or take a long break before depositing a small amount again. This way you don't throw all your money away from frustration. This is quite simple to follow but if followed correctly can guarantee you to keep the profit you made.

Conclusion

As you can see this method is quite simple to follow and the profit can be ridiculous. In reality all the auto-bet scripts are non-sense and will make you little to no money. This is an honest method and will require a lot of patience if you are aiming for goals in a day like myself. Personally when I used to play bustabit a lot I would see myself making around 3 bitcoins a day just off this method. Manual betting can get tiring so I suggest you take several breaks to keep you mind fresh and sharp to prevent any stupid mistakes. If you follow this method correctly, you can see some serious profits as promised. What are you waiting for? Go rake in those bitcoins!

NEW 2.0 Method (medium risk/high profit)

Before beginning this method please make sure to go over the trends because you do not want to use this method a time where there are far more wins than losses in the history tab and if there isn't just wait. This method will make you some good money if you learn to unleash it at the right times so if the charts aren't good please wait, it can sometimes take 20 minutes to see some nice trends but it is worth it 100%.

Now that you have found some nice trends going on you will want to go in on the expected green rounds rather than every single round. So play your cards right and wait for the right times. What you will be doing here is betting 2/10 of your money @ 1.44x. So for example if I had 100k in my balance I would bet 20k @ 1.44x. With this method you are aiming to get only 3 wins before losing. Even if you get 2 wins before a loss you will only lose around 5% of your money considering the bonuses that Bustabit includes. I have found this method to be far more useful in most situations and as mentioned if you follow the trends well you can profit nice.

As an example here is a picture of me going on bustabit right now:

	CRASH	@	BET	BONUS	PROFIT	HASH
HISTORY	3.22x	-	-	-	-	dfd403 
	2.99x	-	-	-	-	1bc17t 
	1.11x	-	-	-	-	86d4f3 
	14.56x	-	-	-	-	380f03 
	8.48x	-	-	-	-	cd62b0 
	4.66x	-	-	-	-	84b0aa 
	1.82x	-	-	-	-	a10cd0 
	2.18x	-	-	-	-	e50fd5 
	107.27x	-	-	-	-	0be4a5 
	1.55x	-	-	-	-	a05952 
	1.12x	-	-	-	-	1b89cc 
	1.57x	-	-	-	-	fe54dd 

As you can see in 12 games there was a total of 10 games that would have been won compared and only 2 losses. This can clearly lead to mass amounts of profit with little risk. If you also include the trends part and don't go in recklessly every round you will be likely to see an even bigger amount of profit.
