

BITCOIN **EXPLOITED**

"Easiest way to make Bitcoins on Auto-Pilot"

Introduction

Hi there, thanks for purchasing my eBook. Today I will show you the easiest and fastest way to make a cool amount of bitcoins online on auto-pilot with only 5 minutes of setup. I am not here to bullshit you; instead I am here to show you how I exactly made \$117.56 in 3 days from the investment of 5\$.

Here is my personal payment proof...

Cool! That's \$117.56 just from investing \$5. In next couple of pages I will show you how I exactly made it :)

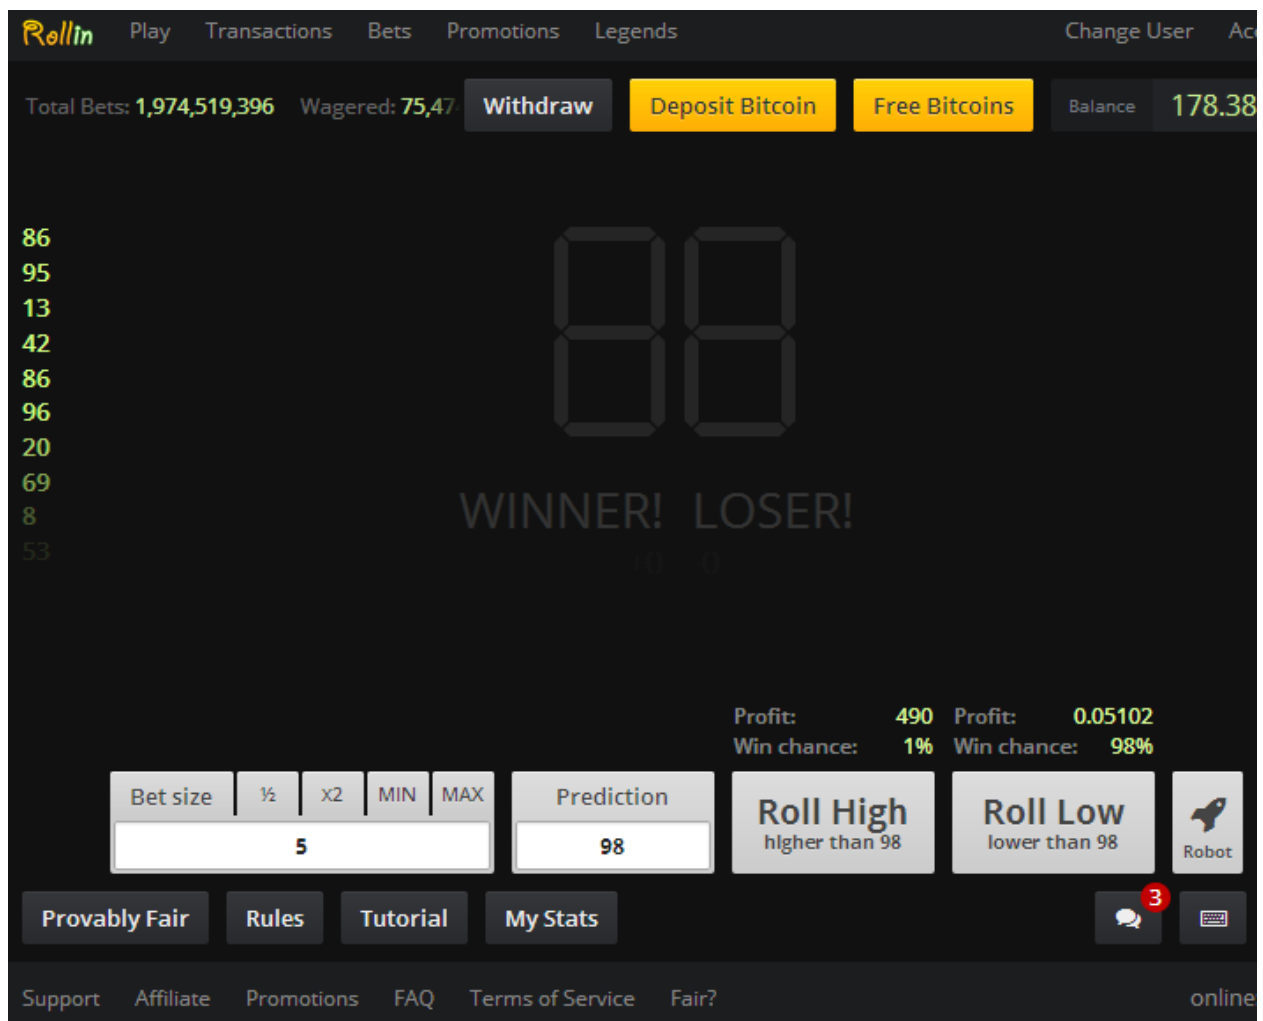

Before we start there are a few requirements:

1. A bitcoin wallet
2. \$5-\$10 BTC as Investment
3. 5-10 minutes of time

Feel free to scroll down if you have these requirements.

Let's start...

1. To get started firstly open - <https://goo.gl/eMeQmK> - and deposit around \$5-\$10.

Click on “Robot” and make the settings like this:

The screenshot shows a 'Robot Roll' settings window overlaid on a game interface. The window has a title bar with 'Robot Roll' and a close button. It contains several input fields and options:

- Base Bet:** A text input field containing the number '5'.
- Prediction:** A dropdown menu set to 'Lower than' and a text input field containing '98'.
- Profit:** A text input field containing '0.05102'.
- Win chance:** A text input field containing '98%'.
- On Loss:** Two radio button options: 'Return to Base' (selected) and 'Increase bet by 0 %'.
- On Win:** Two radio button options: 'Return to Base' (selected) and 'Increase bet by 0 %'.
- Limit the number of rolls by:** A text input field containing '0'.
- Start Playing:** A blue button at the bottom right of the window.

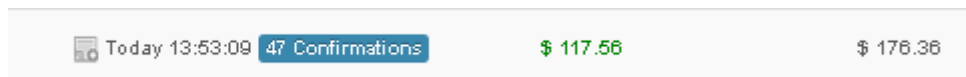

The background interface shows a 'Total Bets' of 1,974,506,231, a 'Balance' of 178.38, and a list of numbers on the left: 86, 95, 13, 42, 86, 96, 20, 69, 8, 53. At the bottom, there are buttons for 'Bet size', '5', '98', 'higher than 98', 'lower than 98', and a 'Robot' icon.

1. In **Base bet** enter the 10% of the amount of bits in your account.
2. In **Prediction** enter 98 and in selection above select “Lower than”
3. Click on start and **boom!** the **autopilot profiting** will start.

This is how my Auto-Pilot is working, I am making 0.05 mBit every 10 seconds, that's that's like 2 mBit or \$1 per minute.

Here is my personal payment after three days of using this method.

Conclusion:

Thanks for reading; what you have got is easiest way to make Bitcoin. If you try this method than you will actually start seeing money roll in.
