

HOW TO CRACK WIFI ON ANDROID!!!!

NOTE:- Your android phone needs to be (rooted).

NOTE:-This only works for some phones.

Download these two softwares

BCMON

<https://drive.google.com/file/d/0B2hvS4HAsu3gVXB5UIk3bEpuNEk/edit?usp=sharing>

REAVR GUI FOR ANDROID

<https://drive.google.com/file/d/0B2hvS4HAsu3gRUEwZzIEN21sSzg/edit?usp=sharing>

INSTRUCTIONS

Install both of the applications on your phone. Open BCMON and enable monitor mode. (if its not working, then your phone is not compatible.) but also try a second time.

if you're lucky enough to correctly enable monitor mode, Open Reaver GUI.

After selecting an WPS-enabled router, click on "Test Monitor-Mode".

Now you can use RfA:), don't uninstall bcmon.

For more explanation and questions visit the official XDA forum
