-----  
METHOD 1 Staying on YouTube If you want to stay on the official YouTube site, you can just remove the 'watch?' in the URL

and replace the '=' sign with a '/'.  
For example:

youtube.com/watch?v=1223445

...becomes...

youtube.com/v/1223445 This bypasses the restriction and lets you go straight to watching the video without the age confirmation.

METHOD 2 GOING OFF YOUTUBE If you don't mind being redirected to a different site, you can instead add "nsfw" in front of

YouTube in the URL.

youtube.com/watch?v=1223445 ...becomes...

nsfwyoutube.com/watch?v=1223445

This takes you to a site dedicated, as the name

suggests, to letting you watch YouTube's NSFW side to your heart's content. Dont miss a single post hit like,share and feel free to

ask any computer related problems....!!!
