Tutorial: Free Hosting For Warez (how to do it...)

By: darkraven (aka bobbasic)

Level: Average (takes time)

Place to stick your warez and how to do it.

if you have a file you wish to upload and its too large for a free webhost and you still want it online try this method.

www.rarlab.com: download rar and cut the file up into 1MB files.

Mass Rename them to .doc (i forgot how to do it but its via CMD)

www.hostultra.com: sign up for the free hosting, which has unlimited bandwidth and space with a REAL (yet not your main) hotmail account.

Upload the files via FTP

Goto www.projectw.org

and tell people the link ie. <http://www.hostultra.com/blah/blah1.doc> - blah100.doc

Use Flashget to download!

And there you have it, as long as the people on hostultra dont find your site your fine icon_razz.gif
