Its very easy to fool Rapid Share server if your IP address is assigned by your ISP. Just follow these simple steps:

clean up IE or netscape cookie(In this case the one that belong to rapidshare website)

On Command prompt

type -----> ipconfig /flushdns <---Enter

type -----> ipconfig /release <---Enter

type -----> ipconfig /renew <---Enter

type -----> exit <-----Enter

Or save these commands in a bat file and run it everytime you need to fool Rapidshare server. Remember to clean up rapidshare cookie in your temp Internet files folder.

Now you should be ready to download as many files as you want from their server.

And there is this cool link: paste it in the browser and see
