

Guys please remember that this is a free access made up for educational propose ONLY and I'm not responsible for the way in which you will use the information shared here. You can learn how to protect yourself against frauds and how your bank information can be used by someone else in different illegal ways.

Hello carders! I hope you all doing grate and are safe! Thank you for showing your interest for Carding School. I received all your mails and answer to all of you. I hope you found my replays util and that it could be useful to some of you. Feel free to send mails with your opinions, your questions or suggestions and I'll try my best to give you the best advice. I just received a mail from some of you with a request to write something about online shopping and cashing out cc and cvv's. I did answer to you D. via mail but I thought that this answer may be useful for some other carders so here it is.

How to cash out cc and cvv's using online shopping method:

1. The online shopping may look like a simple way to cash out cc/cvv's but before try to buy your first item online maybe you should give some minutes to read what you need and how to do it. Of course you will need a cc/cvv/full . I personal recomand to buy cvv's or fullz and to ask your provider if they came with DOB (date of birth). Now if you have your cvv you must (2)

2. Chose a web shop where you will like to try your luck and then you are ready to go!

STOPPPP!!!!

The cc/cvv and the web shop are the main steps but they are not enough for carding!

When you want to buy some item using cvv you must think where you will request the delivery of it. You can send something buy illegal to you home unless you want to spend some time in jail. And you don't want this happen, right?

This mean that you will need a drop for the stuff that you will buy using a cvv. It's called drop a person/place where you will request the delivery of the goods you will buy using cvv. So before use a cvv to buy stuff online search for a drop. If you ask me "Dumbby where can I find a drop?", then maybe I will get angry and send you beeeeeeeep!!! I just joke guys, carding is a serious business but this not mean that we can have fun and learn in the same time! Ok, back to the serious part of post, you can find drops using social network sites, via Y!M (yahoo messenger) etc. Want me to write about finding a drop with yahoo messenger? Just send a mail or post a comment.

Once you find a drop for the goods you may try to buy something in the web shop you chose but be sure that the web shop you chose allow the delivery of the goods to some other address different that the cvv address. Read the policy of the site to know exactly their rules, the delivery terms and so on.

One more thing that you must know about drops. You can never be sure about them unless you use that drop before and he was honest with you. Now, nobody will play the drop role for free. They may ask you for a 50% share or so. This mean that if you want to get a mp4 for yourself you will buy 2 mp4's, one for you and one for the drop. Also many times

happen that the drop will receive the 2 mp4's and send you nothing.....rip you.This is the part of the deal that depend only for luck.

This been said lets have a review over the up written

So for cash out cvv's you must considerate

- 1.first you have to find a drop (the person to who you will request to be delivered the good you will buy)
- 2.find a real cvv provider and buy some cvv's or try your luck and ask for a free sample but not make this a habit ,if you find a real provider don't change your e-mail and beg for free stuff every day!
- 3.find a web shop where you can use the cvv which accept the delivery to other address that the address of cvv.

Once you have a drop,cvv's and you chose a web shop try your luck .

Before start carding ,connect your VPN and apply SOCKS on Mozilla Firefox browser.Chose SOCKS from the same city or even near to the city where the real cvv holder lives.Now,clean the browser history and go to the web-shop where you want to try carding.Act normally as a real costumer.Go on the web shop page,read the terms and condition and check the products available.Pick the object you want to buy and click on the "check out"/"buy now" link.Then you should be redirected to the payment form.Chose the payment for using credit card and select from the list the type of card you will use(Visa,Mastercard,American Express,Diner's Club etc).Fill up the buying form with the information for your cvv(name,credit card number,credit card expire date,DOB-date of birth and so on).Then you should see the delivery address and the name of receiver ,here is where you have to fill up the information of your drop,it's name and full address.Then click done and wait the transaction to be process.If your cvv is alive and support the cost of the goods your transaction will be successful you will receive a confirmation mail from the web-shop and your drop will receive the good waiting the period of time necessary to the shipping and handling.Now pray that your drop will respect his part of the deal and send you your share from the goods.This is how you can use a cc/cvv/full to buy stuff online!

I hear you screaming that you follow this steps before but your transaction was declined and the web shop not approved your card to be charged even if this was a fresh and alive cvv.I know this happen many times mostly to those of you which may fraud the site before.But this not happen only if you anterior transaction were frauds but also happen in some other situation.So again review!

You have a drop,a fresh and working cvv,a web shop but still you can buy nothing because the site not allow your transaction?This use to happen when you are in X county and try to online shopping using a cvv from Y country.Well for this exist also solutions!If you want me to continue this post about how to make a site to accept your transaction even if you are from China and try to buy online something using USA cvv then all you have to do is to send me a mail at cardingschool@hotmail.com or to post a comment with your request on this post.

I really hope that this will help some of you which are new came in the carding world.Stay safe and I'll see you next time!
