

# **HELLO, EVERYONE, WE WILL DISCUSS ACCOUNT CRACKING! METHODS TO GET BETTER IN ACCOUNT CRACKING AND MAKING MONEY**

OK, WE START WITH BASICS!

## **WHAT IS ACCOUNT CRACKING?**

Cracking is the act of obtaining unauthorized access into a computer system without the user's permission and knowledge. Cracking doesn't require extensive hacking knowledge and capabilities, but rather persistence and the dogged repetition of tricks that exploit common weaknesses in a targeted system or account!

## **So this is a question, what is cracking used for?**

For example, you don't have money to buy expensive games! And also you really want to play that game! So you can crack other people account and use them for free!

## **HOW WE CAN CRACK ACCOUNTS?**

Account cracking is almost a simple process! You just need to put Email and Password on Login webpage and if the email & pass was correct you can access to the account and do whatever you want and if it's incorrect you need to use other email and password! For that you need to use crackers, checker/cracker is a program to check all email: pass to the login page! And if a some of them was correct, program give it to you as Hit

You need to use crackers/checkers and combo list

## **WHAT IS A COMBOLIST AND HOW TO MAKE IT?**

Combolist is actually info that you need to put into a Login page to access the account! We have 2 type of combos!

Email:Password = yourname@Email.com:admin123

User:Password = yourname:admin123

You need to use E:P for the site's that you need an email to log in at it same about U:P combo!

E:P to site's like origin, facebook, Spotify, Uplay, ETC

U:P to site's like Steam, Instagram, and also you can use both E:P and U:P to same site's! like Instagram, origin, and more

We have 3 methods to get ComboList!

- 1- Dumping combo's from Databases User SQLI Dumper!
- 2- Leech Combos from sites like Pastebin!
- 3- Buy combos from guys who sell it!

## **HOW CAN I DUMP COMBOS FROM SQLI DUMPER?!**

SQLi Dumper is an excellent, advanced, automatic SQL injection tool for testing links that may contain SQL injection problems in Windows. By this tool you are able to access site's DB and dump its Users info! like email and password!

Also you can use this to get other people Credit cards but! Don't do it

## **WHAT IS THE SENTRYMBA AND HOW IT'S WORK?!**

### **Sentry MBA: A Tale of the Most Popular Credential Stuffing Attack Tool**

If you want to crack specific site account but you didn't find any cracker for that site you can use sentryMBA and make a config for that site and start attacking them!

Also making config for sentry doesn't easy, but you can use some peoples who make configs!

## **THE WAYS TO CRACK ACCOUNT?!**

There are just a few ways to crack accounts!

- 1- Using crackers/checkers to crack accounts
- 2- Using sentryMBA or Storm for cracking!
- 3- Using Aio for MailAccess Cracking! (The Easy way)

## **WHAT SITE'S ACTUALLY DO AGAINST CRACKERS?!**

Some of them try hard to make crackers broken just like PSN ... but crackers do those ways and try to find a bypass! These are some issues in cracking

- IM NOT ROBOT! (GOOGLE RECAPTCHA) And Captcha(you can bypass it with SentryMBA) for Recaptcha there are some site's that you can pay them for bypassing recaptcha like DBC, 2captcha, ETC ETC
- Account 2step verification
- Account Guard (Email, Phone)(Steam)
- Some of them get account limited if the passenger access to the account like Paypal

## **HOW WE CAN BE SAFE AGAINST CRACKERS?**

- don't tell anyone your main password!
- don't click on any link!
- don't use public email and password for your account!

- don't use easy passwords for your social media accounts
- don't trust anyone!
- don't download any app! run them on VM or Sandboxie

## **IS THIS GOOD TO CRACKING ON OUR LAPTOP OR COMPUTER?**

- I always say don't use your own PC for cracking and stuff like this! Why?!

Because cracking need HQ speed Internet and traffic

- Your IP address will be ban by google
- take a lot of time (For example using NLbrute can spend time about 23H +)
- can take serious damage on your PC! (This happens on my own)

So what we can do for cracking!?

You need to buy RDP/VPS from databases! Like Amazon, 1&1, GoDaddy, AmazingRDP, ETC ETC

## **What IS A VPS/RDP AND HOW TO USE THEM?**

Remote Desktop is a program that allows you to connect to your Windows VPS machine from the remote location and allow you to take a complete control of that virtual machine.

The virtual machine is just like other PC's and laptops, it has windows but! It has more power and more speed than your own computer! You can crack any type of account with that faster/safer

## **PROXY?**

A proxy server is a dedicated computer or a software system running on a computer that acts as an intermediary between an endpoint device, such as a computer, and another server from which a user or client is requesting a service

For example you test about 10 email and password on random login page and the site get your IP address baned that's why you need to use Proxies!

We have some Proxies Types and levels!

HTTP

HTTPS

SOCKS 5/4

## **Anonymous**

An anonymous proxy does not send your real IP address in the HTTP\_X\_FORWARDED\_FOR header, instead it submits the IP address of the proxy or is just blank.

## **Transparent**

A transparent proxy sends your real IP address in the HTTP\_X\_FORWARDED\_FOR header, this means a website that does not only determine your REMOTE\_ADDR but also checks for specific proxy headers will still know your real IP address.

## **ELITE**

An elite proxy only sends REMOTE\_ADDR header, the other headers are blank/empty, hence making you seem like a regular internet user who is not using a proxy at all.

# HOW TO **\*\*ACTUALLY\*\*** MAKE MONEY FROM CRACKING | EASY \$\$\$

If you want to begin to start making good money from cracking then you need to avoid your "easy" sites, its pointless cracking Spotify, Uplay, etc if you want to actually make some good cash from cracking. You need to crack accounts that have high demand and are also very rare. I HIGHLY recommend cracking LOL accounts.

LOL accounts are gold mines if you can learn to crack them effectively. You can sell level 30 unverified for roughly \$8-10 per account whereas if you are cracking Spotify or Uplay's you are lucky to get 0.01 per account.

## How to crack LOL accounts:

This is not a cracking guide exactly, but I will briefly explain some methods that will help you crack LOL accounts. (If you want a complete guide with all you need, check the resources section at the end of this ebook)

### 1. Getting Proxies

For getting proxies I recommend getting Socks 4/5 proxies

### 2. Getting Combos

Getting HQ combos that will get you those level 30 unverified is the toughest part IMO.

Ideally, if you want to get as many hits as possible I recommend that if you have some money to splash to buy user:pass gaming combos.

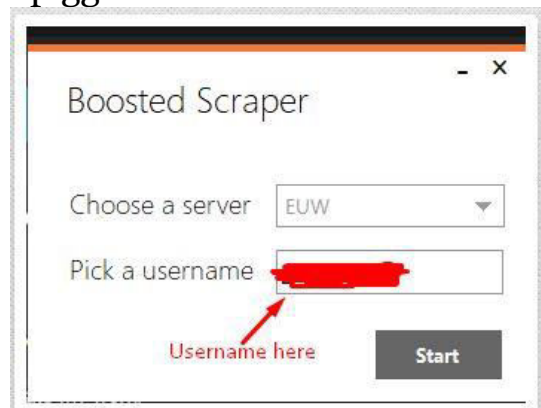

You can also use a program for Boosted Scraper,

Download the program here:

[https://anonfiles.com/M6Beo5x6b5/Boosted\\_Scraper\\_zip](https://anonfiles.com/M6Beo5x6b5/Boosted_Scraper_zip)

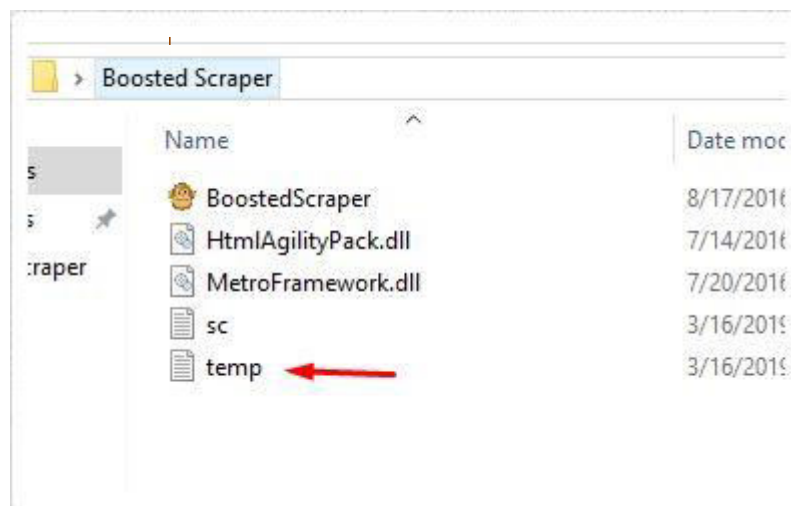

### Step 1: Getting usernames

Once you have downloaded Booster Scraper open it, type in username from op.gg and click Start

Let it generate few thousand usernames like 10k, I also recommend to scrape usernames from low tier like bronze, silver or iron.

Once it has generated few thousand usernames go to Boosted Scraper file, **WARNING:** Do not close boosted scraper or your usernames will be deleted! Your generated usernames will be located here

Open Temp file and copy usernames, paste it in a new text document save it.

## Step 2: Modifying usernames file

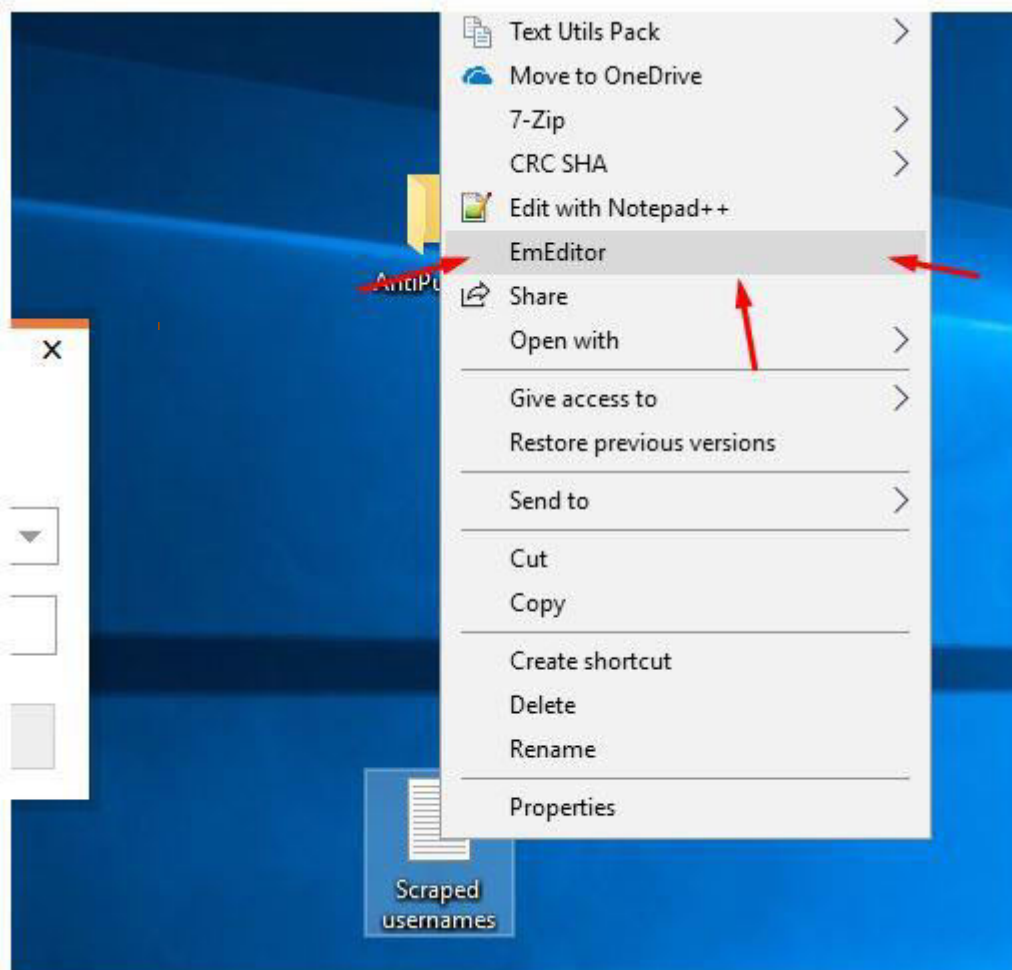

Now that you have scraped few thousand usernames and pasted it in new text document, we will need to modify it because some of them look like this

```
x0XDragonX0x  
Dirty Juggalo  
I am kayle  
not INTElligent  
Necos  
Elrond McCarry
```

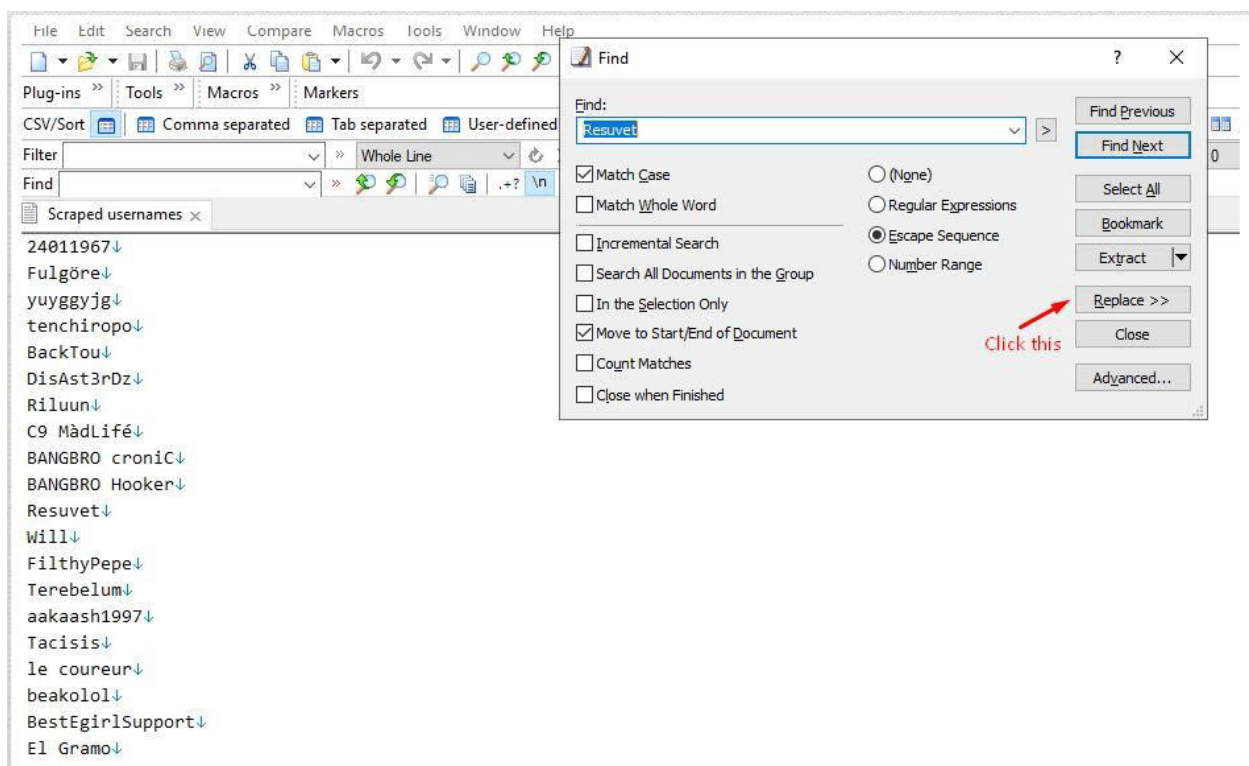

(This is basically useless cause it has spaces in it)

Download text editor tool Emeditor: <https://www.emeditor.com/#download>

Once you have downloaded and installed Emeditor, right click your username text file and open it with Emeditor as shown in this screenshot

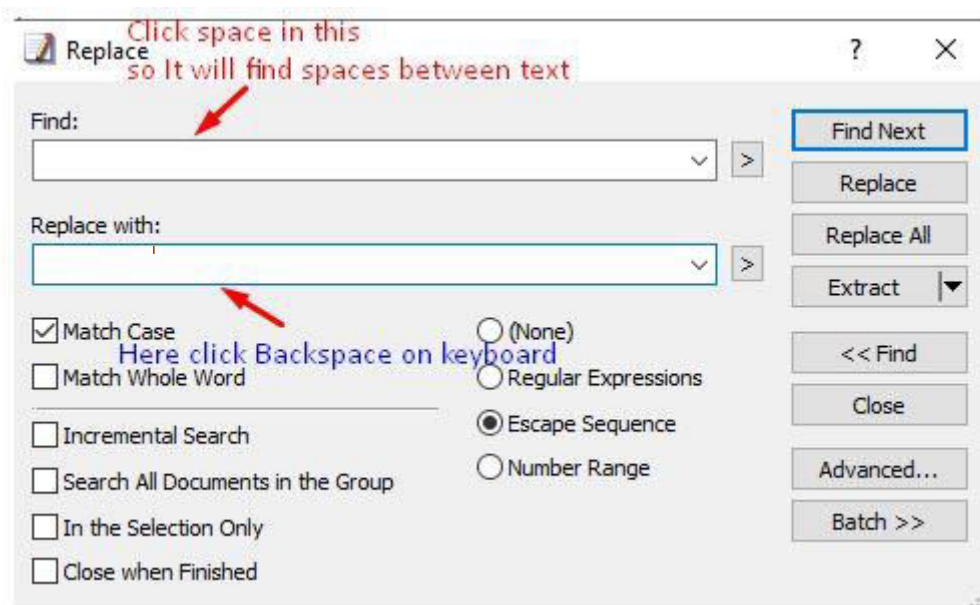

Once you opened usernames text file with Emeditor click CTRL+F inside box like this should come up

Click Replace and do as shown in screenshot

Once you have done this save file, and exit Emeditor.

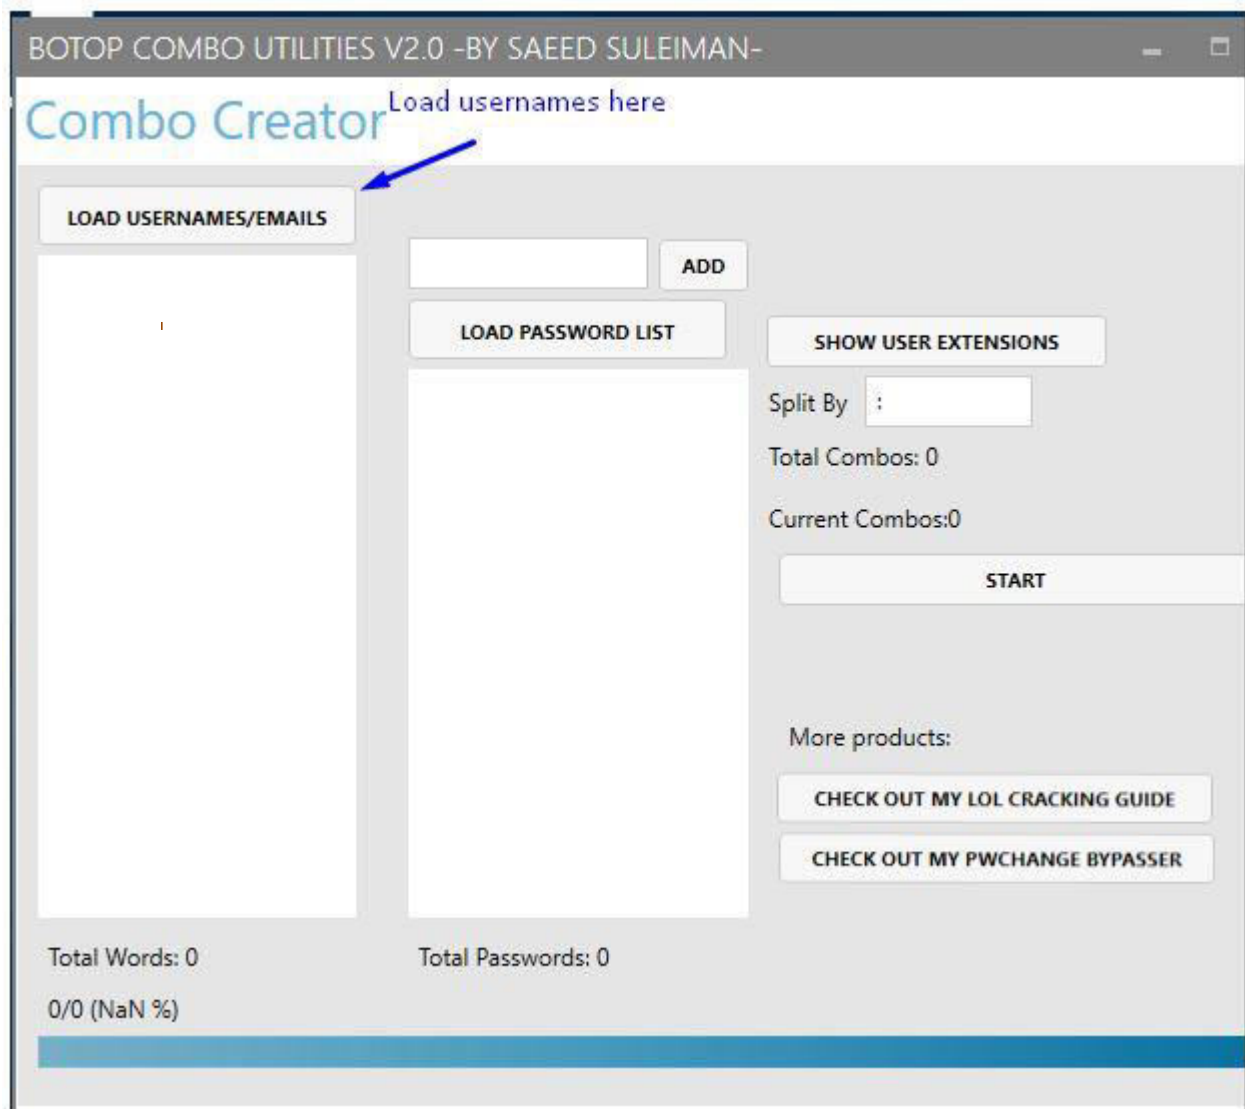

### Step 3: Making combo

Okay once you have modified your usernames file and removed spaces between words, we will now need combo maker program, you can download one I am using here:

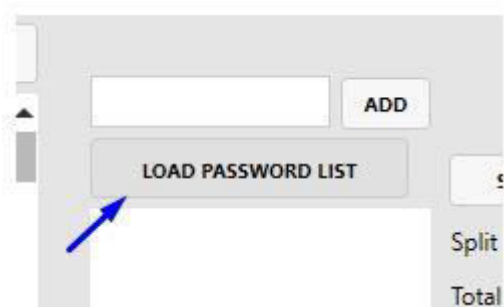

[https://anonfiles.com/ScF4o1xcb8/Botop\\_Combos\\_Uilities\\_7z](https://anonfiles.com/ScF4o1xcb8/Botop_Combos_Uilities_7z)

Once you have downloaded Botop combo utilities open it and load usernames that you have scraped and edited as shown in this screen

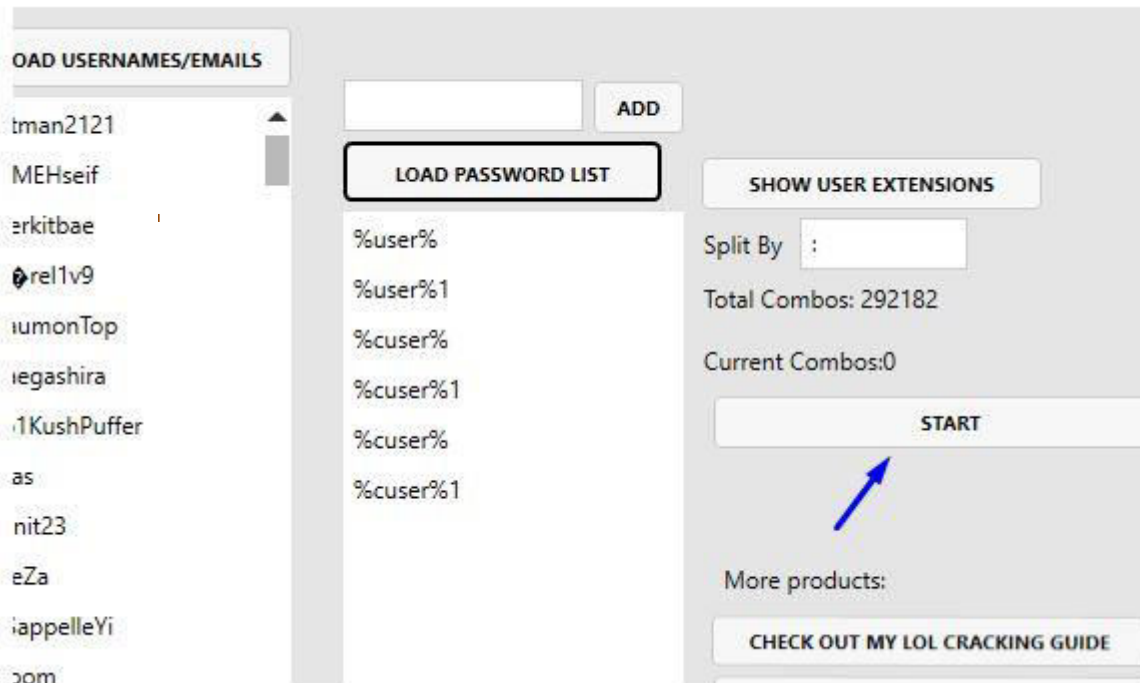

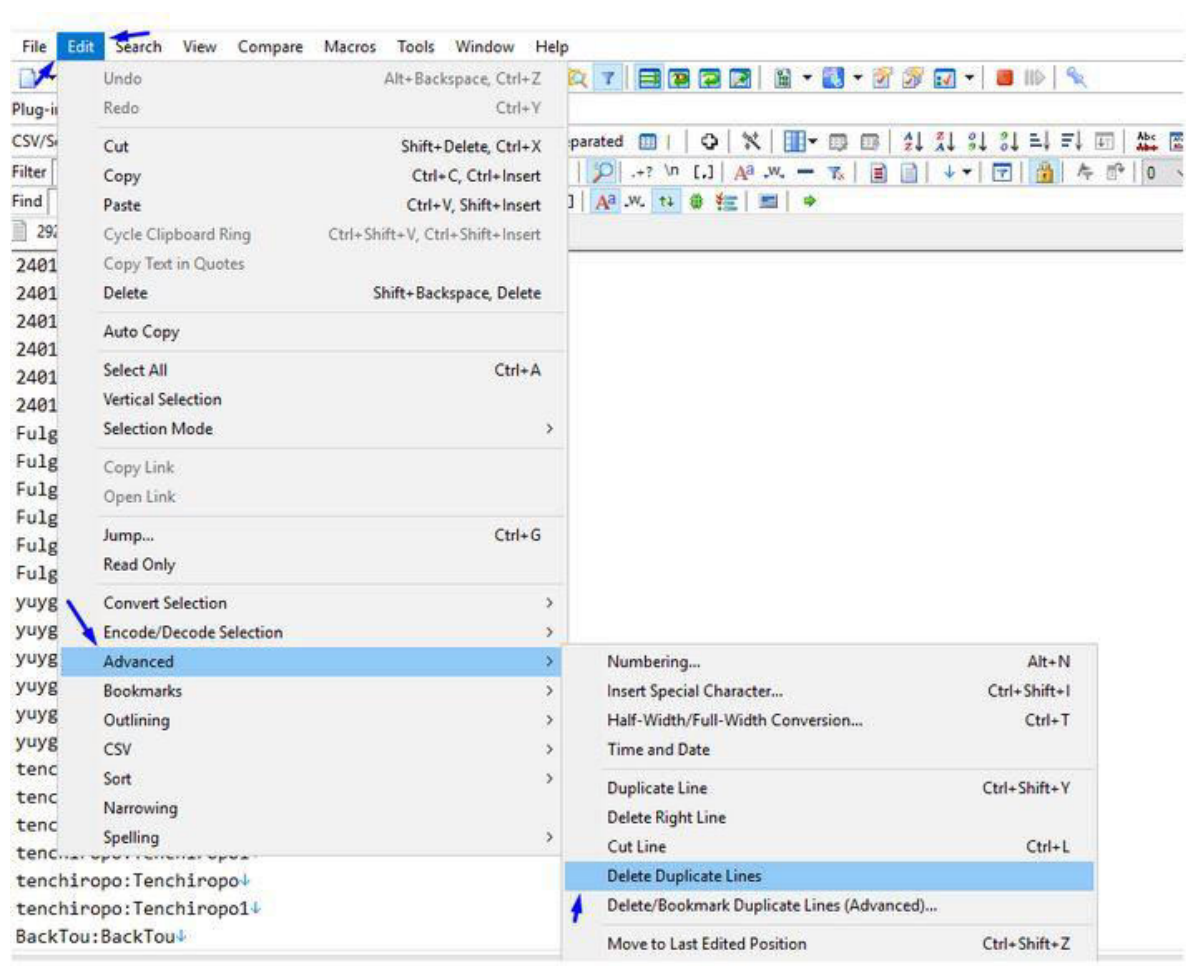

Now load password list

Now just click Start and wait until it generates combo.

Once you have combo, we will need to remove duplicates, to do so open your combo text file with Emeditor go to Edit > Advanced> Remove duplicate lines as shown in screenshot

Save and exit Emeditor.

Your combo is ready to be checked.

### **3. Start Cracking!**

If you have some money, you can buy a program called League-Sharp for \$35 which offers high cpms and working configs for all regions. Alternatively you can use SNIPR if you have that; however, some of the configs on SNIPR for LOL have been reported to not be working.

You may also use blackbullet aswell;

BR: [https://anonfile.com/V7o6b2x2be/LoLBR\\_Huffy\\_bbc](https://anonfile.com/V7o6b2x2be/LoLBR_Huffy_bbc)  
EUN: [https://anonfile.com/R8P6bdx5ba/LoLEUN\\_Huffy\\_bbc](https://anonfile.com/R8P6bdx5ba/LoLEUN_Huffy_bbc)  
RU: [https://anonfile.com/UbPab9x3b3/LoLRU\\_Huffy\\_bbc](https://anonfile.com/UbPab9x3b3/LoLRU_Huffy_bbc)  
TR: [https://anonfile.com/EbZ4b5x5b1/LoLTR\\_Huffy\\_bbc](https://anonfile.com/EbZ4b5x5b1/LoLTR_Huffy_bbc)  
PBE: [https://anonfile.com/k8idcfx1b6/LoLPBE\\_Huffy\\_bbc](https://anonfile.com/k8idcfx1b6/LoLPBE_Huffy_bbc)  
LAN: [https://anonfile.com/scp5c2x5be/LoL\\_LAN\\_Huffy\\_bbc](https://anonfile.com/scp5c2x5be/LoL_LAN_Huffy_bbc)  
LAS: [https://anonfile.com/2b3ccaxfba/LoL\\_LAS\\_Huffy\\_bbc](https://anonfile.com/2b3ccaxfba/LoL_LAS_Huffy_bbc)  
OCE: [https://anonfile.com/na77ccx2b4/LoL\\_OCE\\_Huffy\\_bbc](https://anonfile.com/na77ccx2b4/LoL_OCE_Huffy_bbc)

Storm is another option aswell; however, I do not have configs to give for this one.

### **4. Checking Accounts**

Once you have got all your hits, you need to put them into a checker to find the details of those accounts, lvl, champion, verified/unverified etc.

You will need this to give to buyers of your LOL accounts

### **5. Start selling**

Easiest part, you can either make your own thread in the sellers section of different nulled and cracking forums or ask for offers for what you have.

Also you can go to the buyers section and talk to the people there looking to buy LOL accounts

"How could I make money from this?"

Well I'm going to help you with some methods.

### **Selling Combos**

So this part is probably the most hardest since you need to satisfy your buyers.

Things to never do while selling combos:

**1. Sell public combos:** Probably you thought "Hmm they are gonna buy

combos from leecher."They probably gonna buy , if they don't ask antipublic but after 1-2 hours they are gonna ask for a refund or a replacement since they gonna notice that your combo is public and raped.

**2. Selling half public and private combos:** This mean half of your combo is private and public.You are gonna ask where do I know if my combo is public or private.Use an antipublic combo.There are much of them. It's usefull.

### **How to sell them:**

So you can make a thread and just say your rate. Don't be Jew and ask \$20 for 5k line of combo. Be gentle with prices. Like 100k \$10, but be sure they are pretty good.

Or you can make a autoshop, I don't reccomend this since its bad for begginers.

Tips while you sell combos:

Always do anti-duplicate and parse + randomizing them.

### **Selling Dorks**

Things to never do while you sell dorks.

**Selling public dorks:** They are gonna buy it but as I mentioned them gonna ask for refund or replacement.

### **Tips while selling dorks:**

Remove duplicates , you don't want more than 1 line in your dork-list.

Randomize them, if you made the dorks with generator then randomize them.

Use custom parameters. If you use generators make your own parameters.

Write with hands. Use sublime text, notepad++, Atom to write your own writed dorks with hands.

### **How to sell them :**

It's easy make a thread and write your rates.

Don't be Jew to take too much for your dorks.

\$10 for 15k dorks is good rate.

### **Selling accounts**

So here's the most profitable one.

Selling cracked premium accounts.

### **Things to never do if you sell cracked accounts:**

Changing the password of the account. You don't know if they buyer wants to change the password of the account or not. Leave the password as it was. This

also makes the account more fresh and hq.

**Selling old accounts:** Just think most subscriptions are for 1 month. If you cracked the account before 1 month the subscription is done, if the cracked account owner won't have autobuy. But always check your account before checking so you don't sell already no premium account.

**Tips to do when you sell them:**

Have a screenshot of the account so the buyer knows what (s)he will receive.

**How to sell them:**

It's easy as before.

Make a thread and put your own rates.

Here I can't say your rates since it depends on accounts.
