## **Note to the reader**

Hi! n4n here. I received a bunch of feedback (some negative, some positive -- mostly positive) and have decided to write another edition of this eBook. I've created some of the methods in this eBook and some of them are public methods which you might or might not know.

Anyways, I'm not responsible if you get into any legal action -- but honestly? I could give two shits.

# Steam Revolution v2

## Chapter 1 - Deception:

If you like identity fraud, you've come to the right place. Although it doesn't involve stealing social security numbers or credit cards, it does involve pretending you're someone else. We've all done that at some point, right? Right?

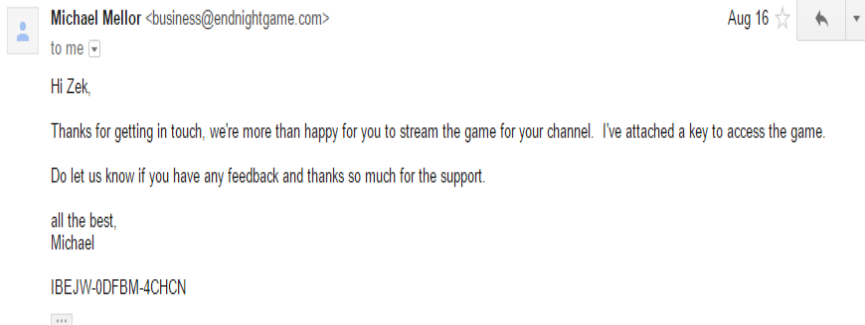

Welp, let's get to it!

1. Go to Youtube and find a small gaming channel. I've used ZexyZek in the past.
2. Create an email address that fits with the users name. Try **(Youtuber) Plays @ Gmail . Com** or some shit like that. I have [ZexyZekPlays@gmail.com](mailto:ZexyZekPlays@gmail.com), for example.
3. Choose the game you want to get (we're doing The Forest for this tutorial) and find the developer's website.
4. Search for their email address or contact form. Especially a business address ([business@gamedeveloper.com](mailto:business@gamedeveloper.com))
5. Email them something along the lines of this  
"Hello **Game Manufacturer**,  
My name is **YouTuber Name**, and I run the Youtube channel **>insert youtube channel name here<**. I do Let's Play videos of **>whatever game they play<**, but am looking to expand into other games, and I thought **>game you want<** would be a perfect choice. We cannot afford this game, unfortunately, so we were wondering if we could get it for free. By sponsoring your game, we will be able to pay you guys back

by adding a link to your Steam page on the first line of our video's descriptions.

Regards,

**>YouTuber Name Here<"**

6. It can take a couple hours to a couple days. It depends on the support team of the developer company. In fact, you might not receive one at all. I couldn't get some games like Goat Simulator or Portal but it was worth a try.
7. ???
8. Profit

## Chapter 2: Wow, this is gentlemen:

This is so public, it's an actual website. You can get a crapton of free Steam games using reddit. If you aren't using reddit yet, do it.

### A list of subreddits that have free games:

- /r/freegamestuff
- /r/freegamesonsteam
- /r/giftofgames
- /r/randomactsofgaming
- /r/freegamefindings
- /r/freegames
- and about 1,000 more

In order to save your lazy ass hours of searching, I've compiled all of these into an multireddit for easy viewing:

<http://www.reddit.com/user/vansonthewall/m/steam>

It's pretty self - explanatory and I've gotten over 30 games and game items from it.

## Chapter 3 - Steam Stealing:

Alright, this is pretty big. I'm expanding on this since people didn't get it last time.

What's a steam stealer?

Something you don't need to pay for. In this version, we are going to learn how to install a RAT. That's *Remote Access Tool* for you **non tech savvy uncultured swine**.

You can find a pretty detailed tutorial on installing DarkComet here:

<http://www.hackforums.net/showthread.php?tid=3633110>, and

instead of using NO-IP, use this tutorial instead:

<http://www.hackforums.net/showthread.php?tid=4097749>

Anyways, head on to Chapter 3.1 for Chapter 3.1 of this eBook.

## Chapter 3.1 - Torrent Spreading

1. Find a popular game such as Minecraft or CSGO, one that people would want to pirate.
2. Search “cs:go crack” or “mc cracked” on any torrent website and download it.
3. Create a server, crypt your file to make it FUD and put it on the infected server.
4. Find a popular torrent site such as Kickass Torrents or The Pirate Bay and sign up.
5. Upload your file and fuck bitches, get money.

**You have a risk of being banned, so use a VPN and/or VMWare/Virtual machine to access these torrent networks. You will get a bunch of slaves easily.**

### **Chapter 3.2 - Forums and Facebook/Twitter spreading:**

1. Create your server and crypt your file.
2. Spam your link on Twitter, Facebook, Instagram or some forums.
3. ???
4. Profit

### Chapter 3.3 - DOOP:

Now for the final part -- how to actually get the items and shit. **THIS WONT WORK UNLESS THEY'VE CLICKED THE "REMEMBER MY PASSWORD" OPTION!! \$@!+**

1. Close the Steam client from task manager.
2. Open your DarkComet Rat and find the slave you want.
3. Open their files and search Steam directory folder.
4. Receive ALL THEIR vdf files and the ssfn files which you previously backed up and replace them with yours in your Steam Directory! By replacing the vdf files you can access immediately the account as long as they have previously pressed the "Remember my password" button. Now by replacing the ssfn files you gain access without having the Steam Guard popping up.
5. ???
6. Profit

## **Chapter 4 - Tremor Games:**

<http://tremorgames.com> is a pretty legit site. I've gotten a crapton of Steam items/cards and 2 or 3 games from there. Try it out!

## **Chapter 5 - Cracked steam:**

If you've got nothing to lose, download yourself the cracked version of Steam. It has all of the Steam games (over 2000) but you can't go online. You can play every single game tho, so yay I guess?

I'm not going to help you find it, but you can Google it yourself pretty easily.

## Chapter 6 - Get a job!

This one's pretty shitty, but here goes.

1. Get off your fat lazy ass
2. Go get a job application at a local grocery store
3. Meet a nice girl, settle down
4. Be financially stable
5. ???
6. Profit
7. + Steam games

As a finale to this eBook, **stay safe.**
