# How to get a knife for \$30-40

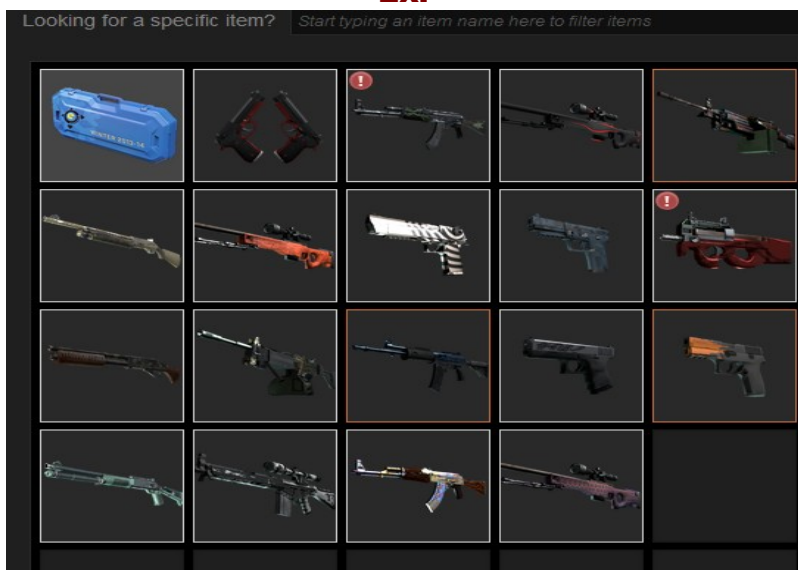

## Quick Over-view

The way I found out this method is by when I learned about steam analyst. The way this method works is trickery. Basically I thought of this and tried it and I got my knife on the second day. First we make a fake edited Inventory check and screen shot it and upload then we find a guy selling a knife for cheap and BAM!

## Starting Off

First you want to make sure your inventory seems expensive with a couple good expensive skins and not a lot of cheap skins that add up to 30-40\$.

**Ex.**

**(This is the guy I traded inventory)**

## Next

Now you want to go to <http://www.steamanalyst.com/checkinv.php> and type your steam id in the box and click enter, this is your inventory's worth, now you want to "inspect element" and edit the the numbers in the "AVG. PRICE" column to make them higher and then edit the total so it equals what you edited above. Also make sure its believe able and then screenshot it and upload to imgur.

Heres an example: <http://i.imgur.com/94XaLV2.png>

( I edited my ak, galil, desert eagle , m4 by \$2 or \$3 and made the total to equal what was listed)

Tutorial for inspect element: <http://youtu.be/LOKRNcrk2sQ?t=1m25s>

### **Finally**

**You want to find a knife that's really cheap. What I did was I found a guy selling a flip knife for \$53 while the next one on sale under his was \$56. I messaged the guy and said " Offer for your knife, My whole inventory for your knife. Heres a price check to save your time [imgur.com/example](http://imgur.com/example)" he checked the link and said was unsure and then I said "You are gonna get a \$5 profit and ill even give you my TF2 items" . So I traded him my whole inventory ( \$30.49) and someTF2 items I got for free about 20 things and he took the trade and got my first knife for \$25 less !**

### **Conclusion**

**I hope this guide works for you and that you can trick some guy to get a knife very cheap and be happy! Just make sure to be patient!**

**Any questions?**
