Disclaimer

This eBook is simply for educational purposes, what you do with the methods described is to your discretion and I cannot be held liable for what you do with this eBook or anything that occurs because of its use.

This method is not advised if you have been involved in Black hat activities or such with your PayPal.

In this eBook I have recommended you deal with trusted users that I have described, please do not deal with anyone sketchy, in order to minimize/remove risk, deal with the people I have described. I cannot be held liable for any trades or deals done whilst using this method

Introduction

Ever needed a way to earn some money... **easily**, without the hassle of PPD or PTC websites or having to eWhore? Well, in this quick **free** ebook, I will explain in detail how to earn between \$5 - \$20 on **small scales**, but this method can be used for much larger scales to earn a good amount, depending on how frequently you do it. Now, in this eBook, we will use a **new untouched method** of money making that can be manipulated to earn a few bucks or a large income, but first, as described in my thread, there are a few requirements:

- A **Bank Account** (UK Preferably)
- A **Legit PayPal Account** (Verified Preferably) Don't want your funds getting limited
- **An Investment**, can be as little or as large as you want (Depends entirely on how much you want to make)
- A bit of time (again, depending on how much you want to make)

The Overview

Ok, I am not going to waste your time with frivolous facts or information that have no relevance what so ever to how to make your money, let's get straight into the details.

READ THESE NEXT THREE PARAGRAPHS FOR AN OVERVIEW
--

In a nutshell, you are going to be making your money via Habbo. But WAIT, this DOES NOT MEAN that you are going to be actually using Habbo to increase your earnings; it just means Habbo will be used in the process. The actual way you are going to make your money is via buying and selling of the Habbo currency, let me explain further.

Habbo coins are sold on a 'Black Market', for cheaper than Habbo retail price, and of course cheaper prices attract customers. Habbo coins are sold via many methods, including but not limited to: Bank Transfer, Liberty Reserve, Paypal, Moneybookers etc. (You can probably see where this is going). Buying this currency via Paypal costs more, as of course because of the risks involved with Paypal, but do not fear, you will be using a secure payment middle man (which I have used and can recommend) when accepting Paypal payments during the transactions. Now how are you going to make the money? Its simple...

Habbo coins sell on Bank Transfer for about £1.5 (\$2.38) per 50 coins (Gold Bar), and the same amount of coins can be sold via PayPal (through our secure middleman processor) ranging from \$3 - \$3.5 (£1.90 - £2.20) So as you can see, that's a possible \$1.00 per unit you convert, that's a 47% profit on each unit (Gold Bar you sell) So lets put it this way, If you invest \$12, you could end up with \$17.50

The Method

- 1) If you have got all your requirements, you'll need a Habbo account, register here <http://adf.ly/CQo87> use a valid email, you'll need to confirm in order to trade.
- 2) Now, here's the website where you'll be finding the 'Black Market' sales <http://adf.ly/CQoKM> register an account.
- 3) Now you'll need to purchase some Habbo coins, they are sold in sets of 50 coins (Gold Bars) which you can get for around £1.5 via UK Bank Transfer (US Bank Transfer may be around the same price) on the Black Market website. Now, be VERY CAREFUL of who you deal with here, make sure you CHECK THEIR REPUTATION / FEEDBACK system which the website has in place, I would advise to only deal with Staff and Verified Sellers
- 4) Once the deal is done and you have collected your Coins (Gold Bars), its time to setup your sales with the 'Secure middle man'. Register here: <http://adf.ly/CQohh> make sure to use REAL details that match your Paypal account or any sales you do will be heavily delayed or cancelled. They also do phone verification.
- 5) Now, once you have an account, you need to create a new listing for selling here <http://adf.ly/CQorL> make sure to put it under the right server and with a good description.
- 6) Now, here I will explain the process of the middleman.
When a buyer places a purchase on a listing, he must send the money to the middleman (the website) and they securely hold it until they can verify it is legit and verify all the details. Once this is done, you are due

to deliver the items (The coins). And once delivered and confirmed, the money will be released into your Paypal account. Viola

Now, you can repeat this process as many times as you want, simply if you need a quick buck, or if you're trying to make some serious revenue. Some friends of mine are using this method to pull in over \$70 a day simply on conversions with about a 35% profit rate.

The best thing about this is, once you've made a sellers listing, you don't have to do any work until you get emailed that you have a buyer 😊

Thanks for reading, and Good Luck with your money making!!
