

BITCOINBENEFACITOR

A product of zSernity (UID = 1327245)

Hello there future tycoon!

Thank you for taking an interest in Bitcoin Benefactor. If you have made it this far, then I can already tell you are ready for financial success.

In this short and informative eBook you are going to discover an opportunity that **will pay out for years to come**. This is abnormal when compared to Hack Forum's barrage of available eBooks with outrageous and fake claims.

In these next couple pages I will document and explain the process as clearly as I can, to provide as much help as I can when applying this process.

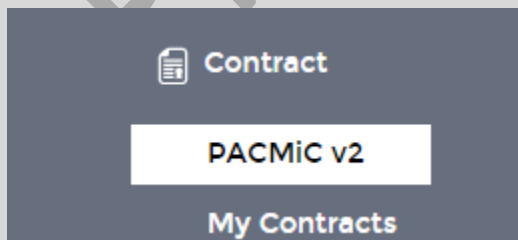

Note: This is a method not seen before; setup takes only a few minutes, and is **100%** autopilot from there on out. However, you could choose to use the autopilot hands-free time to invest some more time into research or furthering the first investment. My method will be based on **ONE** website; however there are already multiple services and sites offering the same deals. You can absorb and soak them all up (register everywhere) to increase your maximum payouts.

Step 1)

Visit the following website and register your information. Feel free to use illegitimate information. Register [here](#)

Step 2)

Now that you've successfully registered on the website and have provided your Bitcoin address for payouts, you may begin to login and then head to the **contract** page.

At this page, you will see you have the choice of renting a 100GH/S all the way through to a 20,000GH/S selection. Basically, here you are renting power/usage of hardware that Hashrate

owns, in exchange for a **contract**. This contract will pay out **weekly or biweekly**, for the duration. That's a long time for it to complete, but think about how much money you'll have made by the time it's through.

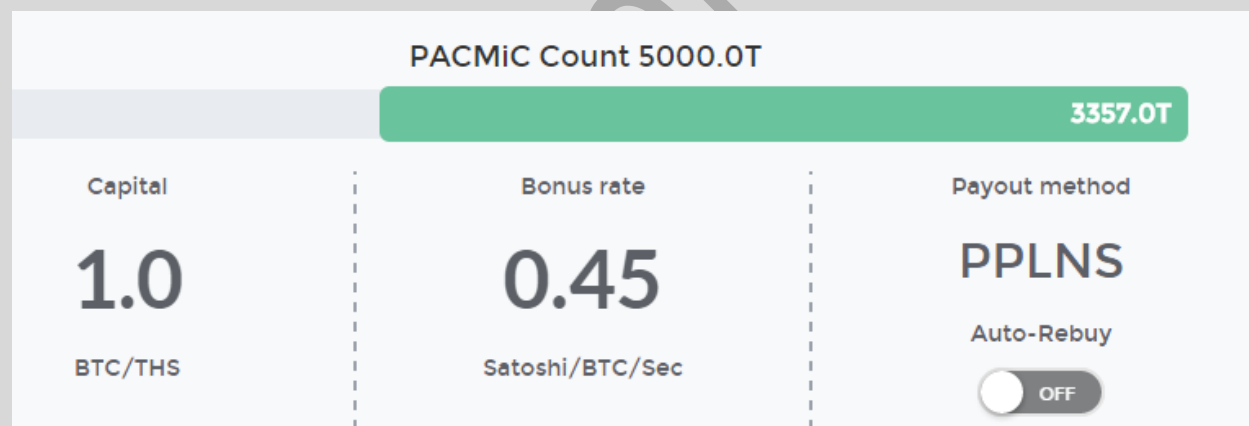

You can use the slider on the same page to determine your investment ratio. Obviously, every person will put in a different investment and get different results. However, that's where it changes with this method.

This method is guaranteed. The only way you could fail is by not investing enough - too tiny of an investment will only earn you satoshi.

The higher you invest the faster and steadier your payments will become.

When I initially started this method, I started with only a \$10 investment in GH/S. Still, that \$10 over time made me enough Bitcoin to re-invest for more power. Right now, that \$10 investment is still going strong and is worth a total of \$110+ after a few months. As more GH/S is available to mine with, more Bitcoin will be paid out. Continuously re-investing your Bitcoin profit for more GH/S is the smartest way to approach this without having a large lump sum of money to throw at it immediately.

A simple \$25-30 investment into GH/S + my referral code will, as of May 15 2015, it would get you:

This would be more than enough power at the time that within a month of mining you should be able to afford another 100-200GH/S and re-invest or start cashing out.

Step 3)

The last step is to sit back, relax, and think. Think about how you want to approach this, because everyone will do it differently depending on their financial structure and decisions. While being a long-term investment, this is one the single handedly most useful and non-trendy

solution for a "Bitcoin" investment, suiting people that want to get into crypto currencies without really, 'getting into them'.

As you can see, the payouts are quite steady and improve over time. The more you have invested to mine with, the more power you have, therefore the more you will get in return.

Investing a whole Bitcoin into this method would net you an awesome \$158 within your first year.

Respectively, people who decide to buy 2000GH/S or more in a single transaction are entitled to VIP status. VIP status gives you a huge 10-15% discount on all GH/S, meaning you can make more money by using more power, **for less money**. You will have a major advantage over everyone else. This is another reason this method is immune to saturation.

Last tip: Investing a medium sized amount like \$100, turning on the Automatic Investments feature and letting the contract sit for a few months is a good idea. Keep checking on the contract every few weeks and you will see your investment growing. You will be surprised at how little you have to do, and how much you are going to make.

Lastly, you can combine this investment with other contract-based mining opportunities. Keep your eyes out for new crypto currencies coming out to mine, and keep an eye on new contracts available. With a little Google searching you can find another 50+ contract mining sites to greatly improve your possible profits. Thanks for purchasing Bitcoin Benefactor, and the best of luck to you!
