

# Tyskeen's: How to automate dating apps to make passive income with snapchat

Are you tired of being an ewhore on snapchat?

Do you hate the fact that you have to chat with many of your followers, so you can make money off them?

This shit is over! I will show you how you can automate the whole process, so the only thing you have to deal with, is to post in your snapchat story ONCE a day, without having to have conversations which most of the time lead to unwanted dickpics and sometimes even worse.

My earnings from doing this 2-3 Times per week, on my PC WITHOUT using a VPS:

[HERE](#)

What we'll need:

- I HIGHLY RECOMMEND A VPS from **\*\*[HERE](#)\*\*** (Check Your preferred Emulators Requirements first!)
- Android Emulator: Nox, Bluestacks, Memu (whatever works for you, but bluestacks is recommended)
- Dating App like Tinder, Lovoo etc..
- Girl Snapchat Account
- Ewhore Pack Including non nude pics
- The BEST Adult Network: **\*\*[HERE](#)\*\***

# The Method

I'll be talking in short sentences, so you understand it easier (also ist actually not that much).

So:

- Setup several Dating App ACCS (use non nude pics from your pack)
  - Setup location for your accs (test some)
  - Write in Bio: „Hey guys, I'm never active here, text me on snap if you wanna get to know me better. I'm answering and exchanging pics with everyone :\* My Snap: MsW1080PHDDXD2018HD4k“ (Something like that, you get the Idea)
  - Now Setup your VPS
  - Download and Install the Emulator
  - Run it, download the dating app and sign in with one account
  - Now switch to the match feature
  - Now start your macro feature on the emulator and like and dislike people, try to be as natural as you can.
  - Now Stop the macro recording, and edit the options as you like them ( for example: Run this macro for ever) I'd suggest to stop it some time though, otherwise the apps might ban you
  - Now Create another Emulator instance (in Settings), and repeat the whole process with another dating app account.
- 
- Now Login to snapchat and post a nude + your call to action for your smartlink.
  - People will start to add you and click on your smartlink
  - Let some hours pass and bank \$\$\$\$
