Terms of Service

Salesthrashing will solve nothing. I will always help you if there are problems or misunder-standings. I want you to succeed, seriously!

Publicizing (leaking/sharing) the information anywhere (other forums, friends, etc.) will have dire consequences such as the publication of your dox (as well as further actions).

Do not give out any hints whatsoever. Each document has a unique signature that will allow me to identify who leaked it, and then pair it to your information (such as Email, PayPal name, IP Address, etc.). You are solely responsible for your actions and anything that may occur as a result of breaching these terms of service.

Chargebacks will result in the dispute immediately being escalated to a claim, and all of the information being sent to PayPal. 99% of the time, this has worked in my favor as a seller for over nine years. Let's make this easier for all parties involved, you may always contact me if there are any issues.

We are not trying to kill the marketplace, nor narm any other Refunder. The refunding scene has grown rapidly during the last few years and has finally reached a point where almost every member has heard of refunding. I feel very confident to say that refunding will never die.

Prices for a refund went from 52 on average in 2012 to 2022 and even higher in 2020. They will continue growing due to the high amount of orders every Refunder receives. With this increase in demand, Refunders are more than likely forced to raise their prices.

Many unexperienced people have opened a refunding service lately, as they have the opportunity of making money with little risk on their end. They do not care about failing your order, as they don't get punished for that, nor do they know the inherent risks. Additionally, many Refunders conceal police investigations, police reports, and other harmful actions that could directly impact your life.

So instead of using a Refund service for roughly 25%, you can simply purchase my Ebook. If you haven't purchased all of the methods, you're able to perfect this Ebook and benefit from almost all current and the best working methods. We can assure you that your refund will go through without any troubles, ever!

INTRODUCTION

First, I would like to thank you for purchasing my Ebook. Secondly, congratulations on receiving this Ebook, it will be your guide whenever you want to know something about refunding. Every step and important information about refunding is included here, whether it is our much loved empty box method, or unique automatic refunding methods.

We provide stop-by-step methods to refund shops with 100% success up to 15.000 EUR (with only 20 EUR investment). Do this once and you will have already made 20x your investment back from this Ebook.

of experience is condensed into 40+ pages. This Ebook was not written overnight, but with pure love and emotion.

To my person:

I have been in the refunding scene since the very beginning. I am one of the few reasons why refunding is as big as it is today, due to me bringing attention to it across numerous forums. Refunding is my passion. There are not many people that know me from the very beginning, since I have used many aliases and switched names throughout the years. These were just precautions to stay safe. I have completed over 3000 refunds and over 500 for myself during these years. I have SE'd almost all of the big companies, including Apple, Bose, Amazon, DJI, as well as various Bitcoin Casinos and so much more.

In this Ebook I will teach you how to refund nearly every shop. No matter what payment method was used. There are many examples for multiple shops with screenshots, so you know what method works for these shops.

There is one note you should always keep in mind; Refunding is not about the method, however, it is about understanding the system of a company. With this knowledge, you can guide the representative through their own system to issue the refund you desire. Some level of brain cells are required in order to complete a refund successfully.

i

BRIEF OVERVIEW

Here I will explain the of refunding. If you see yourself not as a beginner, feel free to ignore the next method of this Ebook (Multiple Refund methods). This information will help you to understand how refunding actually works and how to overcome your about it.

Many people are scared to attempt the first step. They start to sweat and stutter while talking over the phone. I can assure you this will go away very quickly as refunds are extremely easy to handle and complete. Every company has a goodwill, this can be taken advantage of for refunding. A satisfied customer is key for every company.

PRIVATE SUPPORT

Page 1

WHAT IS REFUNDING?

It is very simple to explain. You complain about a problem you do not have and the company grants a complain or replacement to satisfy you.

Example:

- 1) Order a PS4 from Amazon
- 2) Wait for the package to arrive
- 3) Contact Amazon
- 4) Claim the PS4 is missing in the parcel
- Amazon grants you a full refund for the missing ttom

This is just an example! A more detailed version is included inside this Ebook

WHY DO THEY JUST REFUND RIGHT AWAY?

I know it's very hard to believe in the beginning, but customer salisfaction is key for every company! That is the most important value to run a customer company. You can only grow with happy customers and a good reputation.

WHY DO THEY NOT PATCH THIS?

Companies are aware of refunding, but there is nothing they can do to stop it. They have to provide good support to every customer, and bad word of mouth can ruin their profits. So it is better to have every customer happy. It takes ages for them to to a reputation, and only takes minutes for them to ruin it.

"A good support does not cost + it pays." - CEO of Zappos

HOW SAFE IS THIS? AND WHY IS EVERYONE NOT LIIVNG A RICH LIFE THAT DOES THIS? Refunding is technically logal, so you have to play it sale. You can not do 10x 10.000 EUR orders every day. You have to make sure the company does not catch on to you doing refunds, as it costs them money. Technically it is possible, but it requires a lot of premise and almost no mistakes. Possible mistakes might result in an account closure.

However, it's still recommended to play it safe and not let companies have the policien to pursue legal options against you. There are a few tricks which let you do unlimited refunds at zero risk.

THE THE THE THE WASHINGTON TO THE

QUESTIONS & ANSWERS

Page 2

CAN WE FIX FAILED
ORDERS USING THESE
METHODS?

It always depends on the situation. If a refund failed because the method used was 'empty box' or anything similar was attempted, you can simply go ahead and use the TID method.

CAN I RETURN THE PACKAGE AFTER A FAILED REFUND ATTEMPT?

Yes, you can always the item(s) if you are within the return frame. You are legally allowed to return it within 14 days without any reasons.

If you are outside the return frame and do not have a return label, go ahead and contact them. Tell them you were on a business trip or on vacation and you were not able to send it any earlier.

WHAT IS THE MAXIMUM NUMBER OF ITEMS PER ORDER? If you are using the Fake IID method, you can order as many items as you want. For any other method it is recommended to order one item only, because the seller might ship multiple packages and claiming motivator on multiple packages it very unrealistic.

If you want to do a partial refune, the cheapest item can be 0,50 EUR. It does not matter what amount it is.

HOW OFTEN CAN WE DO THIS PER ADDRESS?

We can always refund every store unlimited times.

When creating a new account...

- You have to add a typo in your first name
 e.g. (Marco Devil -> Marco Dewil)
- You have to add a typo to your address e.g. (backstreet 10 -> back street No. 10)
- So it's not 1:1 the same, but carrier is still able to locate your address.

Doing so, will make it nearly impossible for their system to track your previous accounts. If they start closing your accounts, make sure to use a different payment method, remove caches or use different browser and use different IP.

Page 3

WHAT THE FUCK IS THE FAKE TID METHOD?

It is currently the seed and most successful method used by big Refunders, including Asclepius, Penis, Gucci, Diesel, myself and many other people who came across this method. This method can be purchased additional to this Ebook.

DOES REFUNDING WORK ON FRESH ACCOUNTS?

Yes it does. Legit orders are always recommended, but they're not required. In order to grant the highest success rate possible, make to legit orders before placing the order that you want to refund. The amount for these orders do not matter. You can go ahead and place 3x 1,00 EUR orders.

MY NEIGHBOR ACCEPTED THE PARCEL, IS THIS BAD?

Nothing to worry about. When the representative mentions that, he will try to blame your neighbor. Simply tell him you were cooking some food and opened the door after your neighbor signed for the package. You personally appears the package from the carrier, but your neighbor signed for it.

DOES THIS WORK FOR RESHIPS?

It always depends on which method you use and what company you are refunding from. For the TID method, you can use a reship without any complications. For all other methods, it depends on what company you are trying to get a refund from. For Amazon, you have to use a non saturated reship.

Tip: Simply just use your personal address. I can assure you are 100% safe. Reships/lockers/pickup stores are just making the whole process more complicated.

WHAT METHOD WORKS THE BEST FOR XXX SHOP?

Please do not PM me with questions like this as you are generally unable to answer this. Make sure to checkout the Store [55] as I do not know more than what is inside there:

>> [LINK: STORE LIST] <<

(This is only available to Telegram Members)

Page 4

MY REFUNDED ITEM STOPPED WORKING, WHAT NOW? There is no need to worry. No matter what item it is, you can get it proposed in a simple way. Go ahead and re order the item from Amazon. Once you have received it, go and start a return for the original device and then switch the broken item for the new item. Then simply return it as normal. Make sure to use the original box of the new item.

WHAT ARE THE LIMITS
FOR THE SHOPS?

It is very hard to give an acquired amount, as the limits change very often. If you want to do a refund with PayPal + TID method, then I suggest to do a max amount of 15.000 EUR. A tutorial can be purchased from the configurator, if you did not do so yet.

WHAT IS THE BEST ITEM
TO RESELL?

The best items to resell are <u>electionics</u>. I personally always refunded graphic cards, as they are very easy to resell at a high price. Additionally, Apple products are easy and quick to sell as well.

WHERE CAN I SELL
REFUNDED ITEMS? WHAT
ARE THE RISKS?

You are 100% safe to sell refunded items. Just make sure not to give the buyer the receipt. If they ask for the receipt, simply tell them it was a present for your birthday and therefore you have no receipt. If they don't want to buy it without the reseipt, then just go with someone else. There are enough buyers out there.

WHEN CAN I SELL THE REFUNDED ITEMS? You can sell them anytime you want. **BUT!** I highly recommend to wait until the refund is completed. Always keep in mind that refunding does not come with a 100% success rate. So if your refund were to fail (for whatever reason) you can still return it without any doubts.

Page 5

WHAT IS A DOUBLE DIP?

Double dip = 1x replacement, 1x refund Triple dip = 2x replacement, 1x refund

You get a replacement. Once you have received it, you complain about a problem again and then got afterwards. I do not recommend doing so, as it will come with a lower success rate. Having the same problem (e.g. empty box) twice is kind of unbelievable. It depends on the store you refund but in general it comes with a much lower success rate.

You can do strainness instead, it's the same outcome but an easier process as the representative will probably not notice your previous refund. Make sure to make controller in between of course.

HOW DO I PREVENT INVESTIGATIONS AND OTHER ISSUES

The most common mistake is when a representtative asks you questions about the package. Was there damage on it? <u>ALWAYS SAY NO!</u> If you tell them yes, they will most likely start a carrier investigation, as they assume the package was stolen or lost in transit.

If you follow our chat example with Amazon and they tell you an investigation is required in your case, hang up and call/chat apain! They always make a note on your account after every call/chat, but it takes roughly 5 minutes to be updated on your account. So you only have 2-3 refund attempts.

It is very important to say averything is fine, so the carrier does not take any further actions. Make sure to read the "investigation" page at the very end of this Ebook. It explains in detail how to react and what to do.

Page 6

SIGNED FOR MY PACKAGE, IS THIS BAD?

In general, the signature does not matter at all. Even if you attempt the DNA (= did not arrive) method. It always depends on the Store you are refunding, but there is only a very small amount. Companies usually check the tracking ONLY when an investigation has launched, but we are always trying to get the order refunded before an investigation is about to happen.

CAN I BUY ITEMS FROM THE MANUFACTURER DIRECTLY? Yes you can, but keep in mind they can blacklist or even continue the device you refunded. So always refund items that cannot be deactivated (e.g. Apple iPhones). I suggest finding an alternative store.

WHAT VCC (VIRTUAL CREDIT CARD) CAN YOU RECOMMEND ME? It depends on what country you are from. There are plenty out there and easy to get if you are above 18 years old. Please go to Google and search for "Prepaid Credit Cards".

CAN I USE THE ITEM BEFORE REFUND IS COMPLETED? You can surely do that. Always keep in mind if your Refund fails (for whatever reason), you will need to return the item if you want your Refund. It's up to you if you want to go through this scenario.

Electronics can only be turned on before Refund is completed when you are not Refunding the manufacturer directly.

I highly recommend waiting until the Refund is fully complete.

REFUNDING METHODS

OVERVIEW

matter much. It depends on are trying to get a refund from. This is because every system works different. You can find a few

refund

stores mentioned on the coming pages, and which of the methods works best with them. You can also find methods that are explained in manner, which include screenshots and further details for multiple companies. Besides that make sure to check out the as well if you are inside the Telegram Group.

Multiple people claim, if you contact a company with an "unsaturated" method, such as

- leaked battery method or
- blood (cut self on sharp item and postal carrier doesn't allow you to return an item with blood all over it)

you will have a much higher success rate. When somebody claims this, you can tell they did not complete more than five refunds in total. You only have to understand the system of a company to perform a proper refund. You can find a detailed tutorial for all of the three methods on the next few pages. My recommended method is the Fake TID method for high valued items. Follow the and you won't run into any trouble. Fail to follow any step and your refund might fail.

INFORMATION BEFOREHAND

It is compared that these methods are the most saturated and stupid methods ever. This is a huge misunderstanding by beginners as they believe big Refunders have some high exclusive and private methods. The following methods are the most common ways used by any popular Refunder nowadays. The reason for that is simple: They work the best. Companies are already best prepared for such issues. You only need to understand their system now, in order to guide the representative through their own system to process your refund.

Through the time I met multiple people working at various companies, including Amazon Call center and various return centers for big companies like Dell, Bose, Canon, etc. Therefore I can tell that it is very important that you give answers which matches with their system. All are made by the system, not the representative. This is because the system is best prepared for almost every single situation. So while you talk to them, explaining your issue, they click through their system and then give you the best solution. No mistakes from representative can be made like this.

Make sure not to oxagorate and drag out your issue. Do not talk too much. A refund can be completed on the call within injuries. You just need to explain your issue for like 30 seconds and they will do everything else on their system. On the right site of the next page is an example from the view of an Amazon representative, who is in a call/chat with you.

UNDERSTANDING THE SYSTEM

Almost all big companies work the same nowadays, so they always make sure the customer gets the right solution. That's why most call centers have cheap-workers, like Indians, etc. They do not need any experience and basically anyone can work there. They basically just do, what a machine can not do: Talking to you and prevent abuse. The representative is 100% guided by the system. There is not a single step he decides by himself.

Amazon.COM and Amazon.CO.UK are currently testing out a new automatic refund system to see how profitable it will be. They think personal cost is more expensive than the damage of people abusing the system. We are selling a method to do instant refunds using this automatic system.

INFORMATION BEFOREHAND

Here I will explain the did not arrive (short: DNA) method to you. It is already self explanatory. You basically contact the company and start complaining about the package, that you did not receive it. Act very frustrated but also from IV.

- You and your wife are utterly upset and frustrated about the situation, because it was a present for your son
- It's your sons birthday in 2 days already (to speed up the process and skip possible investigation)
- You did not expect this from such a big company, as you never had any troubles with them before

Always wait 2 business days (until 5PM) after delivery to grant you the highest success chance.

Now there are some various versions of this method for every company. I personally recommend using this method as many shops check tracking nowadays and start an investigation with the carrier when they see the package being delivered. This method worked very well a few years ago, but due to some workers stealing products in the packaging center, as they are mainly low cost workers, they started recording and tracking the people packing each package.

There are not many shops where this method works the best. For most shops you have to use No matter if you sign for the package or not, if they shipped the package with all the items included, they blame the carrier and mostly don't care much

Only for very few stores (like Amazon.com and Bestbuy) the DNA method is still one of the . Today, it's better to use other methods than this one, but I still mentioned it here, to get you a brief on how methods might change over the time.

AMAZON SYSTEM EXAMPLE

Refund/ replacement

The chances of them refunding the package are still not too high at this point. It always depends how deep they check the order (e.g. for signature) and especially how good you are able to make him believe it is

INFORMATION BEFOREHAND

Here I will explain the empty box/package method to you.

You simply contact the company and start complaining about the item being You only received the box of the item, but the item was not inside the box. If they ask you to return it, you go ahead and tell them that the item is completely missing, you only received the box which is basically trash (paper and plastic). Act very minutes that it is your son's birthday in 2 days and you need a solution right away. If they still insist on you returning the box, tell them your wife most likely had thrown it away, since you are currently moving and did not expect to keep the box as it is trash only. If they still decline to grant you a refund, act very frustrated and disappointed. If there is still no positive outcome, simply hang up right away and recall as soon as possible before they make any note on the account.

Your refund will most likely go through after the second or third time.

Some orders are not possible to process a refund manually (very rare), which means an investigation has to be started. In this matter do not give up and go straight to our Fake TID method. While you are reading this, I highly recommend you to reread everything, as all of this information is very important and a failure of providing any of the above mentioned information, might cause a failed refund.

If you plan to refund multiple items (mostly clothing stores), you tell them that you only received one item. You can go ahead and add one cheap item (amount doesn't matter) to the order and tell them you only received this item. It does not matter if the order is 700,00 EUR and the cheapest item 1,00 EUR only. It might be hard for you to believe if you are a beginner, but I can assure you this will work flawless without any trouble. You can find a few working stores on the next page.

Believe it or not, this is the most used and most effective method by any Refunder the last couple of years. Some Refunders are better than the others, as many do not know on what details they have to pay attention.

I personally probably used this method for 90% of my refunds (even customers) as it was the most

DETAILED TUTORIAL

Besides the Fake TID method, is this still the best and most effective method to use as of today. I can assure you if you follow all the details mentioned here, you will have a lot of success. Below you can find a detailed version on how to refund on few specific shops. You can use this method for other companies too obviously. Some shops which are working as of today are mentioned below too.

Info:

You can use this method for all non-clothing stores like Amazon, RayBan, Michael Kors, Vans, etc.

Method:

Keep in mind, all Amazon stores (.de, .com, .co.uk, .it, .fr, etc.) are not connected to each other! Only the login is the same. Representatives can not see any details from other countries.

The system on all countries work similar, but not the same. If you plan to perform a refund for Amazon.com or Amazon.co.uk. first try our automatic refund method. It's method .4.1. If it does not work, please follow our guide on page 11 (right site).

- Go to the Amazon page, scroll down and click on "Help" link; SELINK, AMAZON DE - SUPPORT SECTION.
- Now you click on "Need more Help?", then "Contact Us" link: SEQUING AMAZON DE CONTACT US]

 Now for the reason you choose "item missing" and start a chat and use the method for Amazon which was described one page back.

I do not have any screenshot of a chat log, as I personally perform all refunds on phone. But you can use the Amazon system example (2 pages back), it should be enough for you as it is really not that hard. Once I have a screenshot, I will update this Ebook.

Here is an old screenshot (2017), where they refunded me right away without asking any further details. This sometimes happens, but is very rare. This is just an example to see how easy refunds can be.

Zalando

Info

You can use this method for all clothing stores like Nike, Calvin Klein, Hollister, Abercrombie&Fitch, Tommy Hilfiger, Victorias Secret, Rebook, Raiph Lauren

Method:

To skip step 1-4, go to next page

Zalando is currently one of the passes, if not the country, clothing store to refund on using this method. Asos used to be much easier, but has been patched in early 2018.

Zalando might get patched one day too, just like Asos. Stores like Zalando.pl and Zalando.co.uk has more likely been patched already. They still work, but they are ablaying the whole process a lot.

Important: To grant you 100% success, always attempt a partial refune.

Here is now:

- 1) You go ahead and open their website
- You scroll down and click on "all help topics"

3) You then click on "where is my order"

 Contact them either through chat, call or Email See here: >> [LINK-SCREENSHOT CONTACT US]

If you want to speed up the process, you can also go ahead and chat/call them, but Email is completely fine for Zalando as well.

...or simply just click here to skip step 1-4:

Please make sure to edit few details, as other people who purchased this Ebook will most likely use the same/similar text.

If you plan to call/chat them, you tell them the same.

Hello.

I recently made a purchase of multiple items. Unfortunately I only received "CHEAPEST ITEM HERE" for "€€€". All other items are completely missing. I checked the package for damages, but didn't find any. Me and my wife are utterly upset and frustrated about the situation, because it was supposed to be a present for our son. I would appreciate if you can solve our issue as soon as possible.

Thank you "NAME HERE"

Email for clothing Refunds:

6) Once you have done so, they will reply/respond asking you to fill out an affidavit. This is always required in order to process a refund on Zalando. Simply fill it out, or use our template which can be found in the folder. Reply to their Email the following text and attach the affidavit.

Reply with affidavit:

Hello,

thank you for the quick reply. I am sending you now the requested form. It's attached to this Email. I hope we can get this solved very soon, because it was a present for my son. Thank you.

Kind regards, "NAME HERE"

For other stores, they will most likely not ask for an affidavit, but offer you a replacement (usually) or a refund at this point.

Nike for example usually answers, that they will start an investigation. After 2-3 days, they will then automaticly process your refund.

Possible scenarios:

"Were there any damages on the parcel?"

"No, I checked the package together with my wife, but did not find any damages. The package was intact and looked completely fine."

Why are you contacting us so late?

 "I am very sorry about that, unfortunately I had an car accident and was in the hospital for multiple days. I was not able to contact you any earlier, I hope you can understand."

Investigations

This is an account investigation. They check further details regarding your concern/refund in order to fix these issues with their company in future. If they think there is something suspicious with you, then they might check patterns or recurring suspicious activity on your account. This can lead to an account closure. From my 9 years experience and completing over 4000 refunds, nobody ever got into legal trouble. The companies might blacklist your address, but this can easily be bypassed by adding an extra letter or typo to the address (so it's not 1:1 the same). They even blacklist your payment method as they are no longer interested in doing business with you. You can simply bypass this all by using a different credit card and typos in the address.

This is a carrier investigation. If you do not explain your issue very well to the seller they might start a carrier investigation without your knowledge. If they offer you to start an investigation, tell them right away it's not necessary and leave the chat/call. A refund will most likely not work when they start an investigation. For example if you claim your package is empty, and you do not mention that the package was intact, the seller will blame the carrier and start an investigation with them. The carriers job is now to locate the package. Usually they do nothing, but sometimes they come to your area and try to locate the package together with you. They ask neighbors, check the signature and confirm the information with the driver who delivered your package. If this is the case, then I suggest to tell the carrier everything is fine and you are not aware of any issues.

How to profit from Refunding?

The effort that is needed to complete a refund is extremely low. Therefore you can make yourself a huge income within a short amount of time. Starting a Service grants you even a higher income. But I suggest that you not start a Service right away. Gain some experience, test it on cracked accounts before you attempt to do refunds for yourself or customers. You can successfully complete hundreds of orders, but if there is one angry customer who got a failed order, it can ruin your whole business.

I personally do 1-2 Amazon refunds a week, each order worth around 400 EUR. In total, I have probably completed well over 400 refunds just from Amazon. If you are from Germany then I highly suggest you to look much more further into Amazon as they had a huge potential for multiple years now. They are the most customer centric company.

Furthermore there are many other shops with huge limits at the moment. Many of them are mentioned inside the private store list. Everyone who is inside the Telegram group has access to it. They require minimum effort and make you big profit. The only negative aspect is the long process for PayPal at the moment. But let's be honest: You can complete a 15.000 EUR Paypal refund within 2-3 weeks with minimum effort. Isn't that great?

You have to find your own strategy, and I am pretty sure you will find one once you completed a few refunds. Refunding has a huge potential. There are so many people making a living doing refunds for years.

Final words

With this being said, I would like to thank you for purchasing my Ebook and hope you were satisfied just like my many other customers. I hope you learned a lot from this as of now. You will learn so much more by attempting refunds and become much better over time. INFORMATION BEFOREHAND

Here I will explain the Fake TID method to you. If you have not heard of it before, do not worry. This method is and was not published anywhere as of now.

The name itself might sound very difficult, but is actually very easy. Fake TID stands for [77]

So unlike other Refund methods, where you complain about a problem, you do it in a different way. You have to prepare some stuff before you first contact them for your Refund. So once you receive your package, you go straight to your order and You now more likely box them (send them an empty package). Once they have received the package you go ahead and contact them. asking why your order still has not been refunded yet. This is the rough method. There are many important things you have to take care of. So make sure to read the following instructions very carefully!

This method can be applied for basically every shop. Some shops might be easier to do, but most shops which has been tested, we managed to have an extremely high success

You can use this method directly at shops using their will seem. If you paid through PayPal and these companies are hard to refund using this method, or your refund is about to fail (for whatever reason), you can get it refunded through PayPal. PayPal payments are currently very easy to refund using this method, because once you upload tracking of the false return, PayPal will immediately refund you without checking it with the seller itself. A more detailed version for both methods (at shops directly and through PayPal) can be purchased as well, if you did not do so yet. It's my absolutely favorite method right now!

Most companies do not have their own companies to handle their returns. They are saving huge amounts of for example, has a huge partnership with DHL. Every return goes straight

"Refunding has never been that easy before! This is my most recommended method as of now." -Bob

FURTHER DETAILS

Performing a Refund using this method comes with an extremely high success rate. I first this method when I accidentally returned a very cheap item for a big order on Amazon. I did not do this on purpose and did not know I have done that. I called them, explained my issue and got a Refund right away. This refund was processed manually, which means it's for them to get to know their "mistake" as the case is now fully closed on their end. If they process an automatic Refund which also sometimes happen, they might rebill you if you do not contact them and explain you have returned it already.

a small bubble-wrap letter. -

The reason for that is, companies do not believe this is an original return, but a random or something similar. They usually throw it away right away without making any notes on the system.

For companies who make notes for every package/letter they receive, you can still refund them by removing personal and order related information from the label (just cut it off with a scissor). It's explained more in-depth on the next few pages at "Option 2".

When they receive your package they are the package, which means the tracking says 100% delivered and nothing is logged in their system, as we previously removed all personal and order related information. Therefore, an automatic Refund will not happen and you will need to contact the company once the package has been delivered to them. The company checks with their but since there is nothing noted regarding your return, except that it was successfully delivered to them, they are most likely forced to decide in your favor and refund the order. You have (tracking) that it has been successfully delivered to the address, while they have nothing on their end.

IMPORTANT

meant to be used for packages, but it's completely fine if you stick the return to use a normal label as the tracking number is very important for the whole process. If you do not have the tracking number, you are unable to process the

"Refunding has never been that easy before! This is my

MULTIPLE OPTIONS

There are numerous ways to manipulate the tracking. Which works the best always depends on the store. You can basically apply all options on every store as they are very similar in nature.

Remember...

... always use public wrappine (recommended) or a letter envelope. Do not send an actual package. You do this not only because it's less effort, but also because most companies think it's just advertising and not an actual return so they usually throw it away right after. If this happens, there will be construct in their system for your order and you are good. Sometimes (very rare) they make a note saying they got an empty package, in this case you usually have to return the item in order to get your refund. But as I said above, it's very rare. Luckily, there are various options to prevent this. Which option works the best, always depends on the store itself. They are explained on the next page.

As usual keep the letter empty, never put something inside. For the native English speakers, I am talking about an envelope.

Get the label...

If you have a prepaid label from the seller already, go ahead and print it. If the package was shipped nelional, most sellers provide you with a free prepaid label. Once you have it, print the label and put it on the letter.

If you do not have a label from the company yet, you need to create one on your own. This usually happens for international shipments. When creating a label, make sure it comes with tracking. I suggest using DHL, as I personally have the best experience with them. You can buy a label directly on their website (or any other carrier website).

Make sure not to buy a label for a letter, but for an actual package, so it comes with tracking and the impression you actually sent a package, while you only sent a letter.

"No changes"

This is the method which was opplained in VI of this Ebook and which I personally used the most for Amazon.DE. As of today it's recommended to use either Option 2 or Option 3 as they come with a higher success rate.

canerer amail.com

If you make "no changes" on the label the chances of the seller to finding out you returned an empty package can be very high, especially if they don't use 3rd party companies for their returns.

Since Option 2 and 3 require you to do some changes on the label, which are very easy to do for everyone, I will no longer describe this option any further as it only comes with disadvantages compared to Option 2 and 3.

Option 2

"Remove personal and order related details": This method can be applied on both, prepaid labels you got from the company and your own label. But keep in mind it's still recommended to with a prepaid label if you are able to get one.

If you have to create your own label, I suggest buying one from the carrier's website, which you have to print on your own.

So once you have your label, you have to remove all personal/order related details from it, so there is no way for the company to find your order! Below you can find an example of what information needs to be removed: Senders address and 2x tracking number in this case.

Zoom in for better quality

The label on the previous page was a selfcreated one. It was purchased by myself on the carrier's website (DHL). Below you can find an example from the same carrier, but a prepaid return label, which is directly from the store.

The only difference from the label on the previous page is the blue marked part

The code is not from the carrier, but from the shop you purchased the item from. It allows the company to trace your order.

Another example of a prepaid return label can be found on the next page

The company barcode usually has the order number or something similar attached. This allows the company to trace the shipment directly to your order. We are going to remove it so the company can not trace the empty letter we sent them earlier.

On the next page you see another label from the same company (Amazon), but with a different carrier.

erchandise

uthorization

Even though it's a different carrier, we remove the same details. They are just on

different positions.

We keep the code above the tracking number, because it's required when you ship the letter/package.

We remove the tracking number, because this allows the seller to trace our order when we use a prepaid return label.

They can simply enter the tracking number in their system and trace our order. Therefore, it's recommended to remove it.

The company barcode usually has the order number attached, or something similar. This allows the company to trace the shipment directly to your order. We are going to remove it so the company can not trace the empty letter back to us.

More details of Royal Mail labels can be found on the next page.

Explanation of a Royal Mail label

You can find more details on the previous page.

As usual we remove same information as on the other labels.

More details of UPS labels can be found on the next page.

Explanation of an UPS label

You can find more details on the previous page.

The problem with option 2 is...

...we remove all personal and order related things, **BUT** as we keep the parcode above the tracking number the seller can still trace your order. Here is why:

If you scan the barcode with a QR-Code scanner it shows you the actual tracking number.

Some companies allow searching for tracking number in their system. Therefore, they can trace your order. Only a very small amount of companies are aware of that and do this, but that's a way on how they can trace it back to your order.

So if a company is being raped with refunds and they receive like 50 envelopes a day, they might start an investigation to find out what is happening. If they are smart enough they will find out what is going on.

It's very unlikely they do this and I have never seen this before, but if you want to prevent this, I suggest going with options which can be found on the next page.

Option 3 does not come with any disadvantages compared to Option 2.

Option 3

"Change shipping address"

This method allows you to get the tracking to 100%, without the package being sent to the original destination. This option is for almost all of the shops not required as they do not check your label in detail as explained on the previous page, but if you would like to go the safe path, I'd recommend using option 3.

This is basically the same as Option 2, but with one little extra modification - You change the shipping address. Here is how:

When you buy a label from the carrier's website, make sure to put the address of the company you are Refunding. So basically where the package should originally be shipped to. If you have a prepaid label already, then there is nothing else to do right now.

Once you have the label, you are going to manually change the shipping address to a different address which is in the same city. This can be anything from a McDonalds to another electronic company.

Make sure they accept the package for sure, otherwise your refund will fail.

A label example and how you are going to change the shipping can be found on the next pages. There are minimum ways of doing so.

It is very important that you change the address near the original shipping address, because every label has a routing code which automatically ships the package to the near location. Once it arrives, the package will be shipped to the address which is noted on the label.

This is basically the same like Option 2, but with one little extra modification: You change the shipping address!

Below you can find the same label which was shown in Option 2 already.

The red marked parts of the label are order/personal related information, which we removed in Option 2 already.

The blue marked part is the addition we change in Option 3.

The city stays the same. Explanation is on the previous page.

CHANGE LABEL INFORMATION

Some people wonder how they can remove / edit these details. It's actually very simple. There are various ways, depending on what kind of tool/skills you have.

You can only edit PDFs with the paid version of Adobe Acrobat. I am not aware of any alternatives.

Here is how: Simply click on the right site on "Edit".

And that's it. I personally use Adobe as well.

I assume everyone has some basic knowledge about paint and how to remove parts of an image, so I will not explain this any further.

The name is self-explained. If you can not to it via Paint or Adobe, you have to do it the oldschool way.

Simple print out the label and then cut out the part you want to remove with a scissor. It's fine if it does look manipulated. It's not that big of a deal.

AMAZON(.DE) STEP-BY-STEP GUIDE **USING OPTION 2**

Make sure the order is max 30 days old

AMAZO STEP-BY-STEP GUIDE

If the package was shipped <u>nationally</u>

If your package was shipped international.

Info: Amazon can be applied on all sites)

Keep in mind, the serenshots posted below are from Amazon.de. They are not exactly the same for other Amazon stores, but they are very similar. I am pretty sure you will find your way through. If not, feel free to message me for further help. First of all I will show you how to get a return label from Amazon.

Cet a label:

- 1) Login to Amazon
- 2) Open your Orders

3) Now find the order and click on "Return item"

n а

- Now you have to enter a return reason.
 I recommend to use either
 - "no reason given" or
 - "missed estimated delivery date"

so you can later complain about all the delays you have... and how sad it is because it was supposed to be a present for your son. ;)

Missed estimated delivery date

 Go to the next page and pick any carrier you want. That's it. Now you have your prepaid label.

Info

I always recommend to use the pre-paid return label which Amazon offers you. If your package was shipped nationally and you followed all steps above, you should already have a prepaid return label. You can check this if you can see a barcode or the label.

If you wonder why it's better to use a pre-paid return label:

Prepaid labels already have a tracking number attached. The tracking number is also attached to your order. This allows Amazon to check the tracking right away on their system without going to the carrier's website. They can also ensure that the address on the label was correct, as it was created by themselves. If your Fake TID was successfully delivered, their system will say "return received".

You only get a pre-paid return label if the order was shipped **nationally**. So for Amazon.DE orders, the order must have been shipped to Germany.

If it was shipped to any other country, Amazon will not offer you a pre-paid label. With "pre-paid label", I mean a free label which was already and paid by Amazon.

BUT there is one way around this to get a prepaid return label for orders that were shipped internationally. Read more on the page. If you already have a prepaid label, go skip the next few pages where it says "international" at the bottom left.

0

i

If the package was shipped <u>internationally</u>

When a package from Amazon was shipped internationally, you have we options for returning the product:

- International return: The original order was shipped international and you return the order from your international country (where the order was originally shipped to)
- 2) National return: The order was shipped international, but you have the option to perform the fake TID from the same country as the shop. (e.g.: You can return Amazon.DE order from Germany) [RECOMMENDED]

If you are able to return it nationally, then I highly recommend you doing so. It comes with a slightly higher success rate, because Amazon gives you a prepaid return label for national returns. And they are way to refund.

- An explanation can be found on the previous page, if you still don't know why. I marked it with a red arrow.

If you do it without a prepaid label and want to ship it internationally it will require a little bit more when you talk to Amazon regarding the return, but it's still doable.

TO get a pre-paid return label you have to contact Amazon and tell them you want to ship it nationally. A step-by-step tutorial can be found on the next page. [RECOMMENDED]

If you can not return it nationally or want to use your own label you can get your label within few steps automatically. Go back 2 pages on this Ebook and follow the steps there.

Here I will explain you, how to get a prepaid return label, even though the original order was shipped international

 go add a random German address here: http://www.amazon.de/a/addresses

> You can generate a random address here: https://www.fakenamegenerator.com/gen-malegr-gr.php

Once you have done so, go ahead and contact Amazon through live chat and tell them the following:

> Hello, nice meeting you. I would like to return an item I purchased. I am currently on a business trip in Germany and took my item with me. Therefore, I would like to return it from Germany directly. Please pick DHL as carrier.

They might ask you for the reason of the return, just tell them it was supposed to be a present and it arrived too late.

If they tell you this is not possible (it is possible but some representatives never done this before), tell them it worked on your wife's account too few weeks ago and ask them to possible.

It's a very rare request from a customer, so they probably never did it before. So don't give up, as they can get you a label for sure.

 Refresh your order history at http://www.amazon.de/gp/css/order-history ...and wait until it shows you this:

That's it. Click on it and you have your return label.

n n а î n

а

Now once you have received your label, we are coming to the lake III part. Below I am going to use Option 2 which I explained few pages back already.

1) Manipulate the label (previously explained) remove your address - remove tracking number - remove return barcode + number 2) Print it and attach it on the letter/bubble wrapping DHL Retoure

Package will now be shipped completely empty. You can drop the package at a locker or local DHL shop.

You do not put anything inside the package, even though Amazon asks you to put a paper regarding the return inside the package. See below.

Once you finished this, you contact Amazon 14 days after your parcel arrived.

E

3) Wait for the parcel to arrive. In my case I used DHL Germany and can track the package now here:

https://www.dhl.de/de/privatkunden/dhlsendungsverfolgung.html

The tracking number of the return can be found below the first code on the return label. It usually starts with 27******.

- 4) Now once your package has arrived, wait 14 days after delivery in order to grant you the highest success rate. The reason for that is, that the system usually does not allow a manual refund before 14 days after the return has been received. There is literally no option and it's impossible to speed it up if the system does not allow it. This is only required for Amazon(.de). For all other stores you wait 2-3 days minimum after delivery.
- 5) After waiting 14 days, go contact them through call, chat or Email (impressum@amazon.de) and tell them the following:

Hello,

I returned my package over 2 weeks ago and still did not receive a refund until today. I do not know the reason for that as I never received an Email. Me and my wife are utterly upset about the situation as it was supposed to be a present for our son. We are now waiting over 2 weeks for the refund. I do not understand why. I would appreciate it if you can go ahead and finally process a refund for me now.

Kind regards, YOUR NAME

6) Congratulations, that's it. They will now refund your order. If they do not refund your order right away and tell you to wait, go reply to their Email and tell them how frustrated you are and how long you are already waiting. You have to retry until they proceed with a refund. Sometimes it's better to start calling/chatting with them. Never give up, it might take some time! Some orders need 3-5 weeks.

PAYPAL REFUNDS

Now we are coming to a very high success method as of now. This method works for with a very similar success rate. This method is very easy to perform on PayPal, unlike other stores like Amazon etc.

The reason for that is very simple: It is PayPal who processes your Refund, mo the companies themselves.

Besides that it comes with a huge limit of You can even go higher, but orders above 15,000 EUR are being handled by a higher ranked department, It's not a big deal, but they have more and might check your account for fraudulent activity. So if they see 3-4 previous refunds with the same method, they will simply decline your dispute. You do not need to worry about any further actions, as this never happened before.

The main reason of this method being so successful with PayPal is, once you have uploaded proof of tracking, PayPal only checks if the package was address they provided earlier. This requires the tracking ID to be at 100% and they check if you shipped it to the correct address. This can be checked on the tracking as well.

Once again, I do not recommend performing this Refund method on can not afford this loss. This can end up very bad if you are unlucky, in fact they can rebill you.

> Here are few stores I personally refunded in 2019 and are confirmed to work as of today:

- Once you receive it, login to PayPal and open the transaction. You can find it somewhere here: >> [LINK: PAYPAL TRANSACTIONS] <<
- 3) Once you opened the transaction, scroll down and click on "Resolution Center" to open a dispute

4) Now you can decide between 4 options. Click on "I received an item what wasn't as described"

5) You will get transferred to a page where you have to describe the claim further. Simply fill out these details like on the image below.

This is a very inaccurate description, it's completely fine but I recommend to be more specific so they don't ask for proof of the defective item. If you ordered a graphics card for example, tell them you tried it on multiple computers together with your friend who works in an electronic store. He confirmed the defect as well. If you ordered clothes, claim they are damaged/worn/wrong size.

- It now depends on PayPal how long you will have to wait. Sometimes they update you within few days (when seller confirms/allows you to return the item). Usually it takes 10-12 days though.
- 8) You can try to speed up the whole process. To do so, go open the dispute (click on view) and scroll down. After some days you will have an option escalate to PayPal, so you do not have to wait for the sellers response. Just check everyday once or twice and you are good.
- 9) So when they reply, they might ask you to show proof of the defective item (damage report). You can simply send them a fake damage report where it confirms that your item is defective. I can provide you with a template for Saturn (German Store), Elgiganten (Denmark Store) and Currys (UK Store).
- If you are <u>outside</u> of Germany/Denmark, make sure to attach the following note when sending them the fake damage report.

Hello,

thank you for the quick reply. Unfortunately I am now on a business trip in Germany for the next 4 weeks, but I took the item with me and went to a local store called Saturn. They checked and confirmed the defective item. You can find the receipt attached. I hope we can get this solved very soon, because it was supposed to be a present for my son.

Kind regards, "YOURNAME"

If you are within Germany/Denmark, make sure to attach the following note when sending them the fake damage report.

13) Now when they have again and open the dispute head over to PayPal again and open the dispute here and fill out the required information. They will ask for the following information:

- tracking number
- carrier name
- copy of return label/receipt

Important:

If your PayPal is in Italy for example, and the return has been made from a different country, make sure to mention it to PayPal! You have an extra field to provide further information. If you fail to do so, PayPal might decline the dispute, as they can not verify the tracking.

I do not have any screenshot of this page available right now, where you have to fill out the information above, but I will update this Ebook once I do so.

That's it! It's now just a waiting came. It depends how fast PayPal will check your dispute. It usually only takes 25 days, but if you are unlucky it might take over 1 week. Your dispute will look like this now.

Possible scenario:

If you did everything right, but PayPal has itemed the claim ("decided in the sellers favor"), make sure not to accept it as a failed refund. It sometimes happens that PayPal closes it even though all the information you provided were valid. There is nothing to worry, you can easily contact PayPal through phone, chat or Email and get it solved right away. They will tell you the reason, which allows you to solve it together with them and your the reason.

Make sure to checkout the Q&A regarding PayPal Refunds on the next page.

PayPal Q&A

Page 1

You can Refund orders up to 180 days. Simply open a dispute. The whole process is the same.

It's not necessary to wait for the items to be delivered first, but it's recommended. Technically you can open the dispute whenever you have the option to, it does not affect the process.

If the company contacts you after PayPal refunded you and they rebill you, you need to contact them and make them believe you returned the item-/s to them. Everything was done through PayPal as the shop did not reply to your messages, therefore you were forced to involve PayPal.

PM Bob on Telegram to get access to a private store list with shops, that are safe to refund.

Once you uploaded proof of tracking (step 13), you can go ahead and call PayPal to speed up the process. They are able to verify the details you provided directly on phone and grant you a Refund afterwards. It's not required though. You can also wait, but it might take few days.

Technically you can refund any store. It will come with the same success rate. Only problem here is that you do not know upfront whether they rebill you after the Refund or not. Therefore it's recommended not to Refund small companies who can not afford the loss as they will most likely run after the money.

For most shops, PayPal does not see how many items you ordered. So simply claim "multiple" items were defective. PayPal does not take it that serious.

PayPal Q&A

Page 2

This is one very important part you need to take very serious in order not to get your account banned from PayPal.

You need to wait minimum 4-5 months between every Refund and also you need to have some traffic on your account. The longer you wait the less chance exist your account getting banned. If you do a second big Refund after few weeks, I can guarantee you that PayPal will not only close your account, but also close the dispute in the sellers favor. Keep in mind, they close your account and not only limit it. Means you can never use PayPal again.

Do not use the exact same reason for your second Refund again. Describe the damaged item in a different way and make sure to not Refund the same shop.

At point "11)" I tell you to simply box the company. What I mean by that is, you send an empty package to the company, as we need to provide PayPal with a tracking number which shows the package as delivered. If you purchased the Fake TID addon, I recommend doing Fake TID Option 2 to lower the chance of getting rebilled. But Fake TID is not necessarily required.

DETAILED TUTORIAL

Here are 2 very effective methods. One allows you a refund without even talking to a representative (Amazon.COM and Amazon.CO.UK only). It is fully automatic. And the other method allows you an instant replacement (tested on Amazon.DE only). A detailed guide can be found below. Enjoy:)

At this point, I would like to bring one specific method closer to you. This method has been created by me a few months ago and only works with Amazon.com and Amazon.co.uk as of now. Keep in mind, this does not work every time. Amazon needs to have a load of requests at a time, so they enable the chat bot.

Requirements:

- Account history (previous orders)
- Chat bot has to be enabled
- Maximum 200,00 EUR order (sometimes less)

Method:

- Login to your Amazon account
- 2) For Amazon.com go here:

 >> [LINK: AMAZON.COM CONTACT US] <<

 or for Amazon.co.uk go here:

 >> [LINK: AMAZON.CO.UK CONTACT US] <<
- Now click on "Start chatting" (if this option is not visible, then the chat bot is disabled and it will not work

Now when this window pops up, you are lucky and the auto-chat is enabled. If any other layout pops up, then try again later. At the bottom you always have choices to answer.

The sequence is very easy:

- -> "Got it"
- -> "An item I ordered"
- -> -pick order now-
- -> "Didn't get it"
- -> "Wasn't in parcel"
- -> "Ok sounds good"
- -> Refund done

Refund Total:

\$157.89

And that's it! Refund is now fully completed Info:

Now we are coming to the instant replacement method for any amount. This is very profitable for another accounts as you might get replied if you do it on your own account. If you do it on your own account, then you will have to use our Fake TID method afterwards.

Make sure the item is "shipped and sold by Amazon" (or fulfilled by Amazon). 3rd party sellers don't work, as Amazon can not create a replacement for such orders. Also make sure that the item is metal, otherwise it will not work obviously.

- 1) Go ahead and contact Amazon
- 2) Tell them your item is defective, you already tried to fix it by different ways. You asked your friends, went to a local electronic store etc. Unfortunately the local store confirmed the defect of the item
- Now tell them it is extremely urgent, because it was supposed to be a present for your son. It's his birthday in 2 days already.
- 4) Now when they ask you to return the item, ask them if there is any way to create an advanced replacement as it is very urgent and your only possibility to get this item on time. Tell them you will return the item right away, but you need an advanced replacement to be processed right now.
- 5) They should now offer you a recommendation and send you a return label via Email. If they told you it's not possible, go ahead and act very disappointed and how sad this is from such a big company. Ask them to check with their supervisor if their system does not allow an advanced replacement to be processed. If they still decline it, close the chat and retry. It does not work every time, but I can assure you after 3-4 tries it will work. I have done this on multiple 1000 EUR+ orders.

- 6) Now if you attempt this on cracked accounts and want to thange the shipping accross, here is how:
 - When a replacement is created, you only have 1 or 2 minutes to manually change the address yourself
 - Make sure to add the address to the account already, so you are not losing any time afterwards.
 - Once the replacement is created, open the order and there you can see a button which — says "edit".
 - 4. Click the button and choose the correct shipping address. That's it.

FIND REFUNABLE STORES

There are already many working stores mentioned here in this Ebook. But what if all these shops are patched in 2 years? I am here explaining you the best way to find out new refundable stores without attempting and wasting your time trying to refund multiple stores. This includes finding out the methods.

- First thing to do is, head over to a popular Refunding forum. Biggest forums are currently Nulled and MPGH.
- Open a thread and check the latest customer vouches (last page of thread).
- There you will see many vouches for refundable stores.
- After checking a few vouches, there might be some hints about the method which helps you to find out the method.
- 5) Now when you found a refundable store, go ahead and invest like 20 EUR and order some random item there. Try to refund it with the known methods. One of the methods will always work as refunding is not about the method, but understanding the system.

If you have like 2 or 3 failed attempts and did not manage to refund the order, do not give up! There are plenty other ways around it. Please check out the next page for further information.

Don't look at the stores people offer -Look at the vouches! This method is not really friendly to other Refunders as you basically steal their methods. So make sure to send them the payment if they really managed to refund the order. They have your personal information so I suggest not scamming them.

If you have like 2-3 failed attempts, go get a Refunder to refund your order. Here is what you are going to do:

- 1) Order an item for 10-20 EUR
- Contact a Refunder and claim the order is 200 EUR so he accepts the order
- 3) Now once he finished the refund, go ahead and contact the company and ask for a chat transcript or copy of all recent Emails. They are legally forced to provide you all the details they have saved about you.
- Once they have sent you this information, you should be able to find out the method the Refunder used

Chat transcript:

You can find another example on the next page

I decided to check Vouches of 2 well known Refunders on

Nulled. I will not mention them here in order not to trash talk their sales and leak their methods. Here is a vouch for a 400 EUR item and another one for 2900.00 EUR.

Screenshot 1 says "We refunded your order, your return is therefore fully completed*

And Screenshot 2 says "For your return, we processed a refund of 2900,00 EUR*

They returned something?

Yes correct. They both used the Fake TID method. The currently best and most effective refund method which is also explained in this Ebook here (Addon purchase required).
