HOW TO OPEN MULTIPLE APPS IN ANDROID WITHOUT CLOSING CURRENT APP

Hi friends, today i am going to
share a new interface of
multitasking in android. You can
easily run a new app without
closing the current one. Now you
are thinking it is possible as
default but believe me what i am
going to share
is absolutely different from your
thinking. You can open new app
without closing your current app in android very easily and fast .To know more about it keep reading the post.
. .

Here are some steps as usual ...
Just read and follow them carefully

STEP 1
First of all Install Swapps on your
android device. This is an app to
perform this task.

STEP 2.
Now configure this app which is
very easy.

That's it
This app will allow you better
interface of multitasking inst
