Doenertiers Ratting E-Book

Thank you for Purchasing my E-book.

The Method is pretty easy and will get you verry fast a lot of slaves(especially Girls).

We will use ask.fm for the Method.

This E-Book contains 1 Method but in 2 Different Ways. One Autopilot and one Semi-Autopilot. The first will work for sure and is the main method. The 2nd one is only a Gift for you, which will be more effective, because you have to do nearly nothing, BUT you should know Basics of Imacro Scripts.

Lets get into it:)

1: Things you need:

A server (FUD)

A Brain

Ask.fm Account(Optional)

2: The Method(Semi-Autopilot)

2.1:

Firstly you should make your server look like an image. Use an JPG Image as Icon and spoof the extension as .jpg . Here you can get a free Extension-spoofer: <u>Click</u>.

Now name your server something like Picture01 and upload it to Dropbox or Mediafire. ATTENTION YOU HAVE TO SHORT YOUR DOWNLOAD LINK WITH THE URL SHORTENER goo.gl, because Ask.fm will only accept Links in Questions, if they are shortened with goo.gl. If you don´t do this step the Person will never get the Message. Your downloadlink should now look like: "http://goo.gl/fssrTX2".
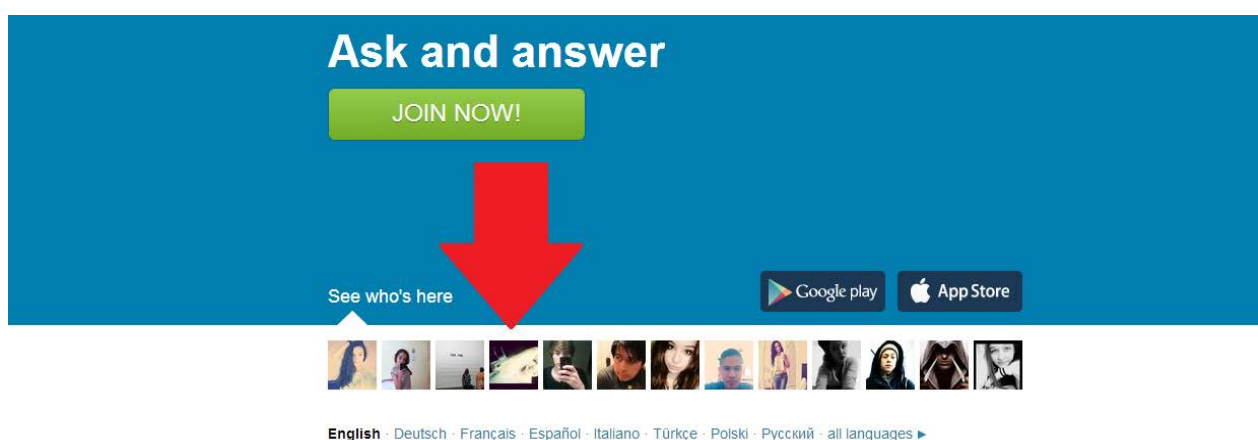

2.2:

Go to ask.fm . This is a Site where you can ask questions to registered members. You don´t have to register there, but I reccomend this because it looks more legit.

2.3:

You are now Ready for spreading:)

Go to the Bottom of the Site(Look at the Image), where you can see

Online members. Refresh the site in order to see other online People

Now here comes the easy part.

Post a question like „Is it not emberassing for you, that there are naked-pictures of you in the internet?-Put here link of your server-"(Has to be a goo.gl link.)

Thats it.

Just wait til the person reads your question and runs your server (Should be Fud).

3: The Method(Autopilot)

Extra Things you need for this:

Firefox

iMacro Click Here

iMacro Script Click Here

Remember: The Autopilot Method is Just an extra Method which I decided to give you for free, so DON'T be angry if it doesn´t always work, because the Program has some Bugs. That's why I recommend the Semi-Autopilot Method for People, who don't know the Basics of iMacro Scripts.
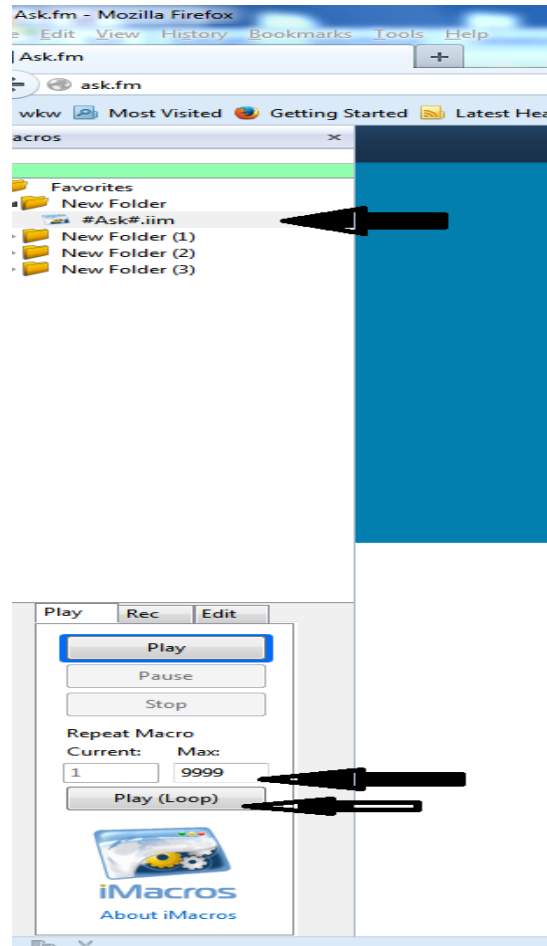

The Autopilot Method is the SAME as the first Method, but the good thing is you don´t have to do anything. The scripts will do everything for you.

After you are done with getting Firefox and iMacros plugin, go to C:/users/Your_username/iMacros/Macros and extract the Script "ask.rar" there.

Now Just open Firefox, select the Script "ask.iim" and set Loop from 1

to 9999.

The Last thing you have to do is press "play loop"

Now It will automatically click on online Members, paste the text you have in your clipboard in the question box and than send the question. Be sure you have a text like : "Is it not emberassing for you, that there are naked-pictures of you in the internet?-Put here link of your server-" in your clipboard. It is possible that you have to type in a Captcha after some People.

You are not allowed to ask questions about the iMacros in the Thread. If you have Problems ONLY PM ME! Thanks!

Thank you for buying my E-Book.
