iNetStore V4.1 : Run inetstore.exe and follow the instructions on screen. From the newly created iNETstore program group run the Dolphin Speedstar server. Dolphin will, by default, run on Port 80. If you are already running a server on this port you must change the port settings of Dolphin under Options | Server Setup | HTTP Server to a free port - say Use This Port: 81. Dolphin will appear as an application in your task bar. Double click the icon to change its settings if necessary. If you are prompted by ODBC, select catalogue as the database. Right click the Dolphin Speedstar icon in the Taskbar. Select Browse Home . This should automatically start your default web browser and call the iNETstore home page on your server. Enter: s/n: 886 VT6676 589 30630
