???How to Access Blocked Websites Without Using any Software???

I have also did many googling and tried to find a way to access blocked websites. Finally i found an awesome trick to access blocked websites without using any software. And i'll share that trick with you all, i hope this trick will be useful to you while accessing websites at college or office. This trick is called as Bypass URL Filtering for Access Blocked Websites.

Lets see how to access blocked websites without using any software.

Go To Start -> Run -> In Run box type cmd and hit Enter

Now Open Command Prompt window will appear

In command prompt type Ping websites Address and Enter
For Example : If you want to access Facebook, type as follows
ping facebook.com

Now a IP Address will appear in command prompt to access facebook.com

After then type the particular IP Address (which appears in your command prompt) in address bar and open any websites. Now you can access any websites by using this simple method.
